sexual harassment, crappy crypto, useless NFTs,
and still own nothing with loss of all freedom

Quick-Guide for Dummies

"Conflict is the driving force of everything. Life as we know it, exists because the second bacteria that evolved, ate the first. Planets

exist because the bigger rocks consumed all the smaller rocks and grew larger. Ever since its inception, the universe has been governed by a single, immovable law. Survival of the fittest. Eat or be eaten. Just as all life forms compete to survive, nations are no exception to that rule. Where peace reigns, there is stagnation and stagnation leads to extinction. Where there is war, or the threat of war, civilizations grow and life prospers. War is the oxygen of civilizations and without war, sentient life withers and dies. War is the cleansing fire through which the weak and unworthy weeds are burned away to make room for a new, stronger, better crop.” – NWO Darwinism

Preface

When I first started this blog, my intent was to give a quick summary of what the New World Order was for newcomers.

Along the way, as I was compiling more and more information, it appeared like there would never be an end to creating this blog. The more I added to this blog, the more I felt I was leaving out important information.

Keep in mind, I'm an engineer and not a writer, as I'm sure many will notice, but I've made my best effort to make this blog simple enough so that it can be considered a "quick guide" and not become a textbook. So forgive me for my literary skills.

Anyway, I hope you enjoy this guide and please be sure to message or email me if you have any questions to quantumxo@yahoo.com or through my website at <http://www.bantamjoe.com>.

What is the New World Order?

The New World Order (NWO) is a well planned generational conspiracy orchestrated by a few very wealthy and powerful people that proclaim themselves to be the guardians of the earth. Their plan has always been to expand their empire using human labor, force, coercion, violence, war, sex, bribes, torture, rewards and punishments, etc. and to manage humanity to their will, through world governments, religion and secret societies.

Using technology, the ruling class hope to turn humans into a hive-mind controlled newly engineered species, unable to think for themselves

inside a communitarian metaverse society of which humans must depend upon the ruling class for their most basic of sustenance using technocratic machinations.

In essence, the NWO is a plot to create a new economic and governing order, reducing, managing and controlling the world's population of humans. This also includes all production and labor on earth, replacing humans with AI and automation, steering those that are desirable into a highly controlled digital metaverse with speciated roles, and leaving most of the natural world only for the ruling class.

To this end, the ultimate goal of the NWO is to conquer and colonize *all of nature and its life processes*. Starting from the atomic and molecular level, up to and through total mind control of the human brain, and then finally taking complete dominance of the genesis of **information** and **consciousness**. The ruling class aims to become the supreme gods of the entire physical universe. Their most prized goal.

If you think this is too incredible to believe, I invite you to start paying more attention to current events and start reading history books. We are at historic crossroads that may irreversibly cost humanity dearly.

The Current State of Affairs

Australia, for example – ground zero for the NWO, has legislated that its carbon emissions will be reduced by 65% by 2030.

Renewable energy output CANNOT compensate for fossil fuels, and thus, rather than replacing our energy sources, consumption of power and goods will shrink down to 35% of 2007 levels.

To achieve this, the unelected bureaucrats and frontmen of the United Nations, World Economic Forum, and all their partners, are RESETTING the global economy. In order to Build it Back Better they must first demolish the current system.

Covid coincidentally afforded them the "opportunity" to roll out programs that the Davos mob, Club of Rome, Chatham House, Council of Foreign Relations, Rockefeller Foundation, Tavistock, IMF, World Bank, BIS, BlackRock, Vanguard, UN & WEF (among others) have been working on for decades.

So how will this new economy function? What does 65% reduction mean for us?

We will no longer budget our money, the new financial economy will be based on energy. Our ACCESS to goods and services will be determined by our social credit rating and how many carbon tokens we have.

In this CIRCULAR ECONOMY, in which "we will own nothing," our tools, appliances, dwelling, cars will be on loan. Instead of owning a book, a bed, clothes, furniture, we'll subscribe to companies that rent them out, kind of like Netflix, Uber, Airbnb, Spotify.

Regarding consumables that can't be reused, the Track Your Impact™ label on the body wash will tell shoppers how many carbon points will be deducted from their annual allowance.

Are we starting to understand why small to medium shopkeepers and businesses that trade goods are whittling away? Why travel has

become so traumatic and cumbersome that people would rather save themselves the hassle?

Shipping, recreational travel, beef and lamb are destined for the history books according to the Absolute Zero scheme which is the forecast for 2050. Absolute (net) zero refers to that 65% decline of carbon emissions reaching 100%. What they mean is that human output of carbon will be offset with carbon sequestration.

Unfortunately, for the average person, the trees growing naturally on the planet won't count for us – mitigating our carbon expenses. No, the trees and forests will be owned and operated by Natural Asset Companies (NACs) which will trade carbon tokens as a commodity. We will essentially be paying for the air we breathe like we already pay for that other renewable, water.

So how will we earn carbon credits to sustain our existence?

Enter the Metaverse. Our digital twin will work digitally for digital currency, digital 'goods & services,' digital recreation, and digital relationships. By staying home and not consuming real, tangible things, we'll minimise our carbon footprint.

If the doom and gloom of climate modelling wasn't a deception, then perhaps some people would be forgiven for wanting to give up childbearing. If replicating life electronically for the population of the earth didn't cost A LOT of infrastructure and power, living a cyber life instead of a real life mightn't sound so disdainful.

This is why life is becoming increasingly absurd: there's a huge chasm between The Great Narrative (WEF) and reality. The story doesn't

match the picture as perceived by our senses because the tale is about a pandemic while the agenda is about an overhaul of how we live.

By complying with mandates, policies and measures we get closer to this "real vitality" by the day; we condone this is the future we want.

Without the GREAT DECEPTION we would never have accepted our real lives being RESET to digital slavery, away from people and nature. Please see through the ruse. Please question the contradictions. Please investigate the legislation of your governments and think tanks and supranational organizations. They're not hiding it, they're just distracting you with fear.

Also, a Victorian woman set herself on fire (and died) in protest of the mandates but it didn't reach the ears of the order followers or the world. ❤️ – Cindy Niles

The Major Pillars For The NWO

One World Currency

A digital cryptographic currency will be the currency of choice for the New World Order. With the help of FinTech (Financial Technology), central banks around the world are pushing to create a Central Bank Digital Currency (CBDC) that will be tied to passport IDs, medical records, personal history, social activities and carbon credits, using conditional and programmable smart-contract tokens (currency) on blockchain

systems. Combine this with a cashless economy (UBI), AI and deep surveillance and you end up with a full spectrum of dominating control over people's behaviors and social demeanor.

One World Religion

All ages, throughout history, have had a religion and the age of the New World Order is no different. In many ways science and transhumanism is emerging as the new religion for the NWO.

In this new religion of scientism, you are not to question scientific authority and the new god of this religion is earth, also known as mother

Gaia. All under the auspices of the UN's Green Economy. All that is wrong with the earth will be connected to climate, biodiversity (DNA modification), resources, emissions, etc.

Destruction of Family

The family, being central to the fruition and evolution of the human family, must naturally be destroyed under the NWO. Efforts will be made to replace the family with the state. More and more, the state is taking control of the children, leaving parents without a role.

Destroying the nucleus of the family, destroys the fundamental fabric of community, community town squares, churches, pubs, etc. where people often and traditionally have met, to discuss local issues and cooperation. Local festivities and recreation takes a hit as well.

Children are being encouraged to declare independence, away from the family structure, misidentify their sexuality, and taught that they are carbon emitters harmful to Gaia.

Elimination of Self Defense

The subjects of the NWO will be defenseless and unable to protect themselves from the forces of the NWO. It is much easier to control

people when they are defenseless.

Having an armed populace, keeps national, local governments and home invaders mindful and in check of their actions.

Elimination of Property

It is the goal of the New World Order to destroy the ownership of property. Free people own property and slaves do not. The NWO takes over property by using the government.

If people do not own land, homes, businesses or goods, then they will have to reach out towards other entities, such as governments and

corporations to fill the role as providers. In such a case, you are at the mercy of the state.

Education Decline

Education will focus mostly with training people (children and adults) STEM courses online for life-long learning gig jobs. Teaching how to do as they are told and to follow orders. Most of the jobs will be 4IR-based jobs for the Metaverse. Brick and Mortar schools will disappear, and remote life-long learning online will become the norm. Indoctrination and propaganda will come complete with biometric surveillance, monitoring behaviors, all certified with blockchain credentialed badges.

Elimination of Privacy

Privacy will continue to decrease. The goal of the New World Order is to know exactly what everyone and everything is doing at all times 24/7 x 365 days a year, and to store every single micro-event in massive global cloud-based blockchain database systems for further use. All of your most secret and treasured life activities and experiences will be stored there for the duration of your life. This information will also determine your social-carbon credit score, perform prediction analysis for crime

and work productivity, for evaluating your child's life pathway, simulate warfare, calculate biomedical services, and much more.

Control over Resources

Natural resources are a currency to the NWO. By controlling all resources like oil, gas, food, water and CO₂, and even life processes themselves, the NWO ensures that people will depend solely upon them just to stay alive. These resources will be made scarce and rationed out per carbon credit and social compliance scoring.

Those with large stores of carbon credit get to enjoy the fruits of life. Those without, will have to rely on recycled synthetics produced in labs, provided they have the allowance of that as well.

Police Control

The establishment of a global police state is the natural outgrowth of a government increasing in size and power. As government grows the police will be used to control more and more of our lives. Expect to see more surveillance cams, drones, satellites, robots and other autonomous entities. In an open-air geo-fenced earth-prison, snitching will be rewarded with carbon and social credit tokens.

Who is behind it?

The primary group of entities behind the New World Order operate through secret societies, priesthoods and royalty. Secret societies, priesthoods and royalty have always held great power and influence and through the years they have slowly merged their powers together

to create the ultimate in control. At the highest level these three groups all intertwine and work together to control lower levels of control. These groups view themselves as superior to regular humans and this is why they feel they have the right to rule over them.

Priesthoods

Priesthoods have always been the heart of the New World Order. After all, it is organizations like the Vatican who possess ancient knowledge that they keep hidden away from the public. And if you go back prior to the Vatican you will find that the ancient world was organized and ruled through various Sun Orders possessing occult knowledge.

Also, through most of history, it was the priesthoods that held most of the sacred knowledge of the stars, climate, crops, earth elements, and life. They often were the ones that would ordain or bestow upon a king or queen divine power.

Secret Societies

At the highest levels of the New World Order nobody fully knows what the secret societies are and who is involved in them. One thing that we do know is that the highest level members operate through the shadows and never make their identity known. So when you see people out in the

public you can be sure that they are most likely a pawn working for a higher power.

Royalty

For centuries we have had kings and queens ruling over people. Most of us, however, have never stepped back and ask where these royal families

derived their power. Many of the royal families are extremely detailed when it comes to genetics and bloodlines. They view certain bloodlines as better than others and make sure to keep their bloodlines intact.

Where did they come from?

~4,000 BCE

The Sumerians / Anunnaki

A good starting point for the New World Order is the Anunnaki of Sumer. The exact origin of this group isn't entirely clear, however, we do know that they had a strong influence in Mesopotamia and many Cuneiform writings mention them. This group of beings possessed advanced knowledge and had their own internal mystery religion which contained many esoteric secrets that were hidden from the majority of people. These secrets were part of what brought them to power, and kept them there.

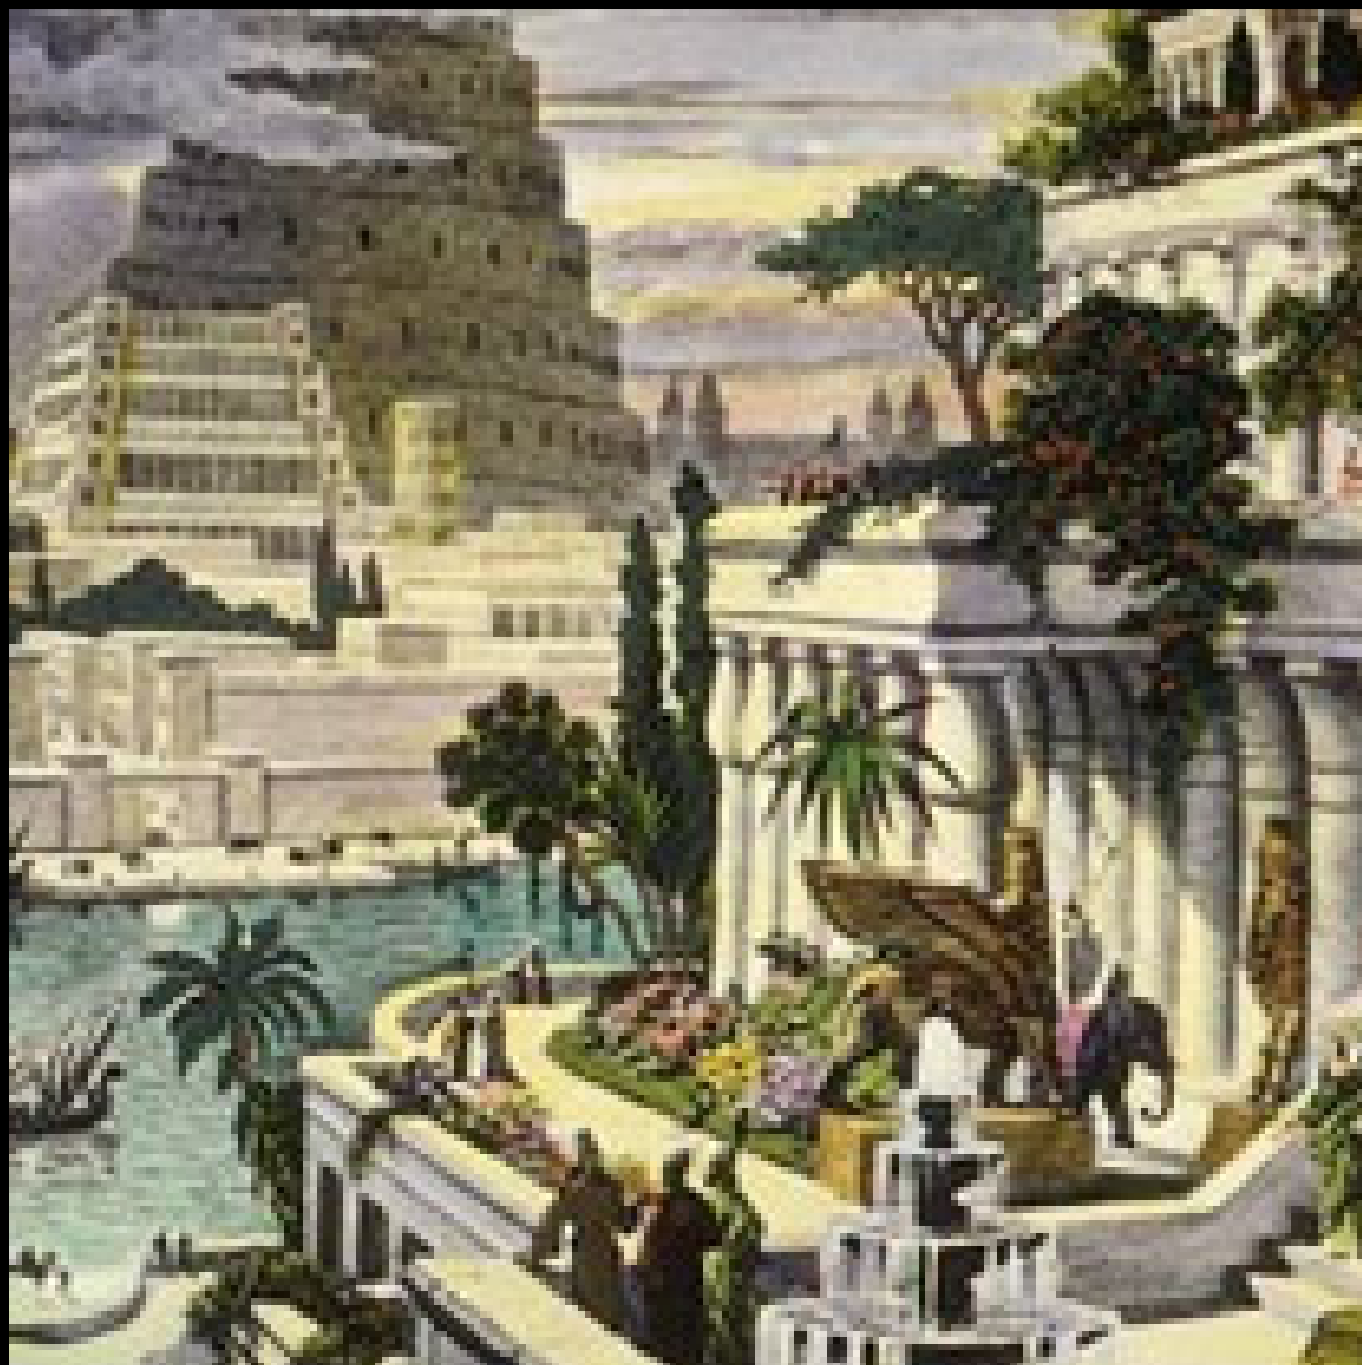

~3000 BCE

Phoenicians & Canaanites

Not all the Anunnaki were what we would call good. Like today, some groups wanted to use their advanced knowledge to control people while others wanted to use it to free people. The Anunnaki began to amalgamate with other races and new groups arose. Groups known as

Phoenicians and Canaanites began to form and some members in these groups had intentions to use their advanced knowledge to control other people.

1894 BCE

Babylon

As these Phoenician/Canaanites expanded they eventually worked their way into the empire of Babylon. It was here that many of their rites and rituals were established. Babylon is often depicted as an evil place in our history, but it is also depicted as a great city which led the world in innovation and technology. You will find that the NWO is always close to innovation and technology, thus the many references to Babylon. In many cases, the highly innovative technology is kept for themselves for special usage.

1400 BCE

Egypt

After ruling in the Mesopotamia region for many centuries the NWO bloodlines eventually worked their way into Egypt and overthrew many of the existing Egyptian dynasties. In our history we read about Akhenaten rising to power in Egypt and replacing the God Amen with the God Aton.

These "Atonists" became the Pharaohs of Egypt and replaced the wisdom of ancient Egypt with their new version of wisdom.

900 BCE

Judites & Levites

During their time in Egypt (and prior) these Canaanite bloodlines had also worked their way into two primary Israelite bloodlines known as the Judites and Levites. The Judites were the rulers (royalty) and the Levites were the knowledge-keepers (priesthood). During this time Judah had a number of kings rise and fall. Some kings were what we would call good, most were bad.

Roman Empire

These Egyptian Atonist bloodlines eventually worked their way into the Roman Empire. Through the Roman Empire they greatly expanded their power and through Rome they also worked behind the scenes by influencing many of the Caesars politically. By using their political influence they were able to eventually create their main headquarters for control...

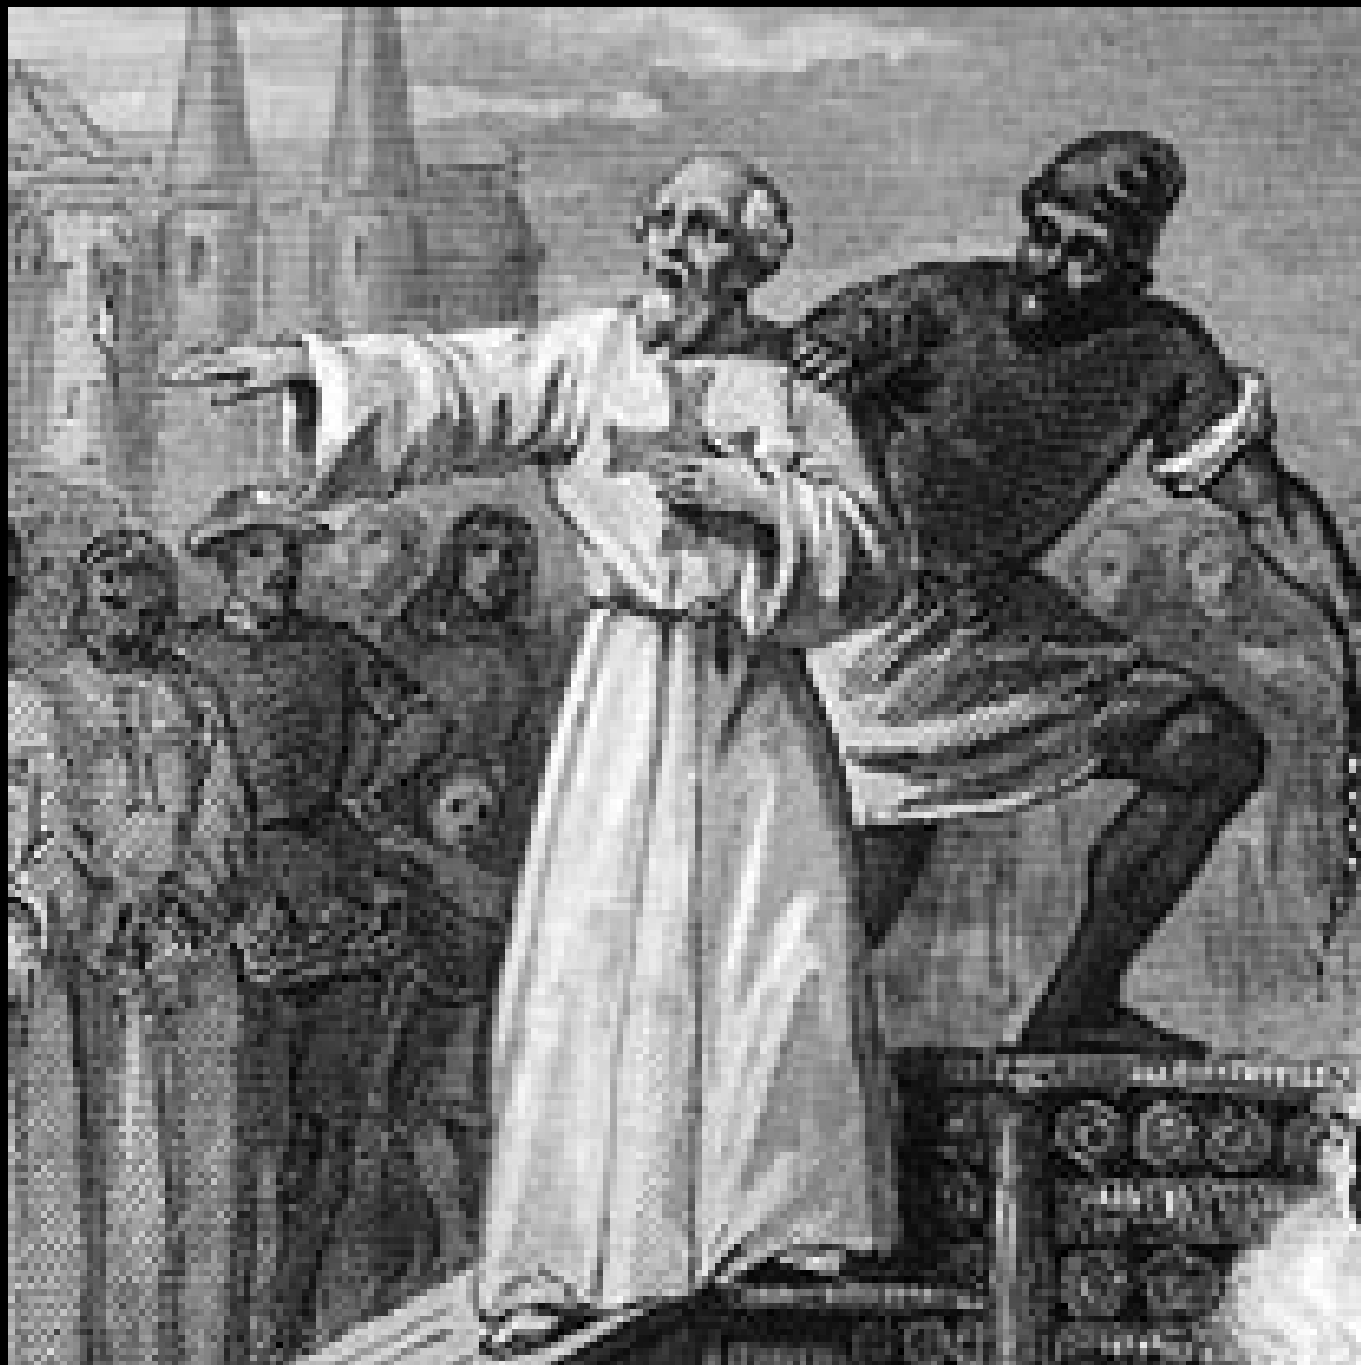

325 CE

The Vatican

The Roman Church was eventually established through political influence and the Vatican became the exoteric headquarters for the Atonists. The Pope became the Vicar of Christ and to this day he calls himself the ruler of Earth until Jesus returns. The Vatican became the main front

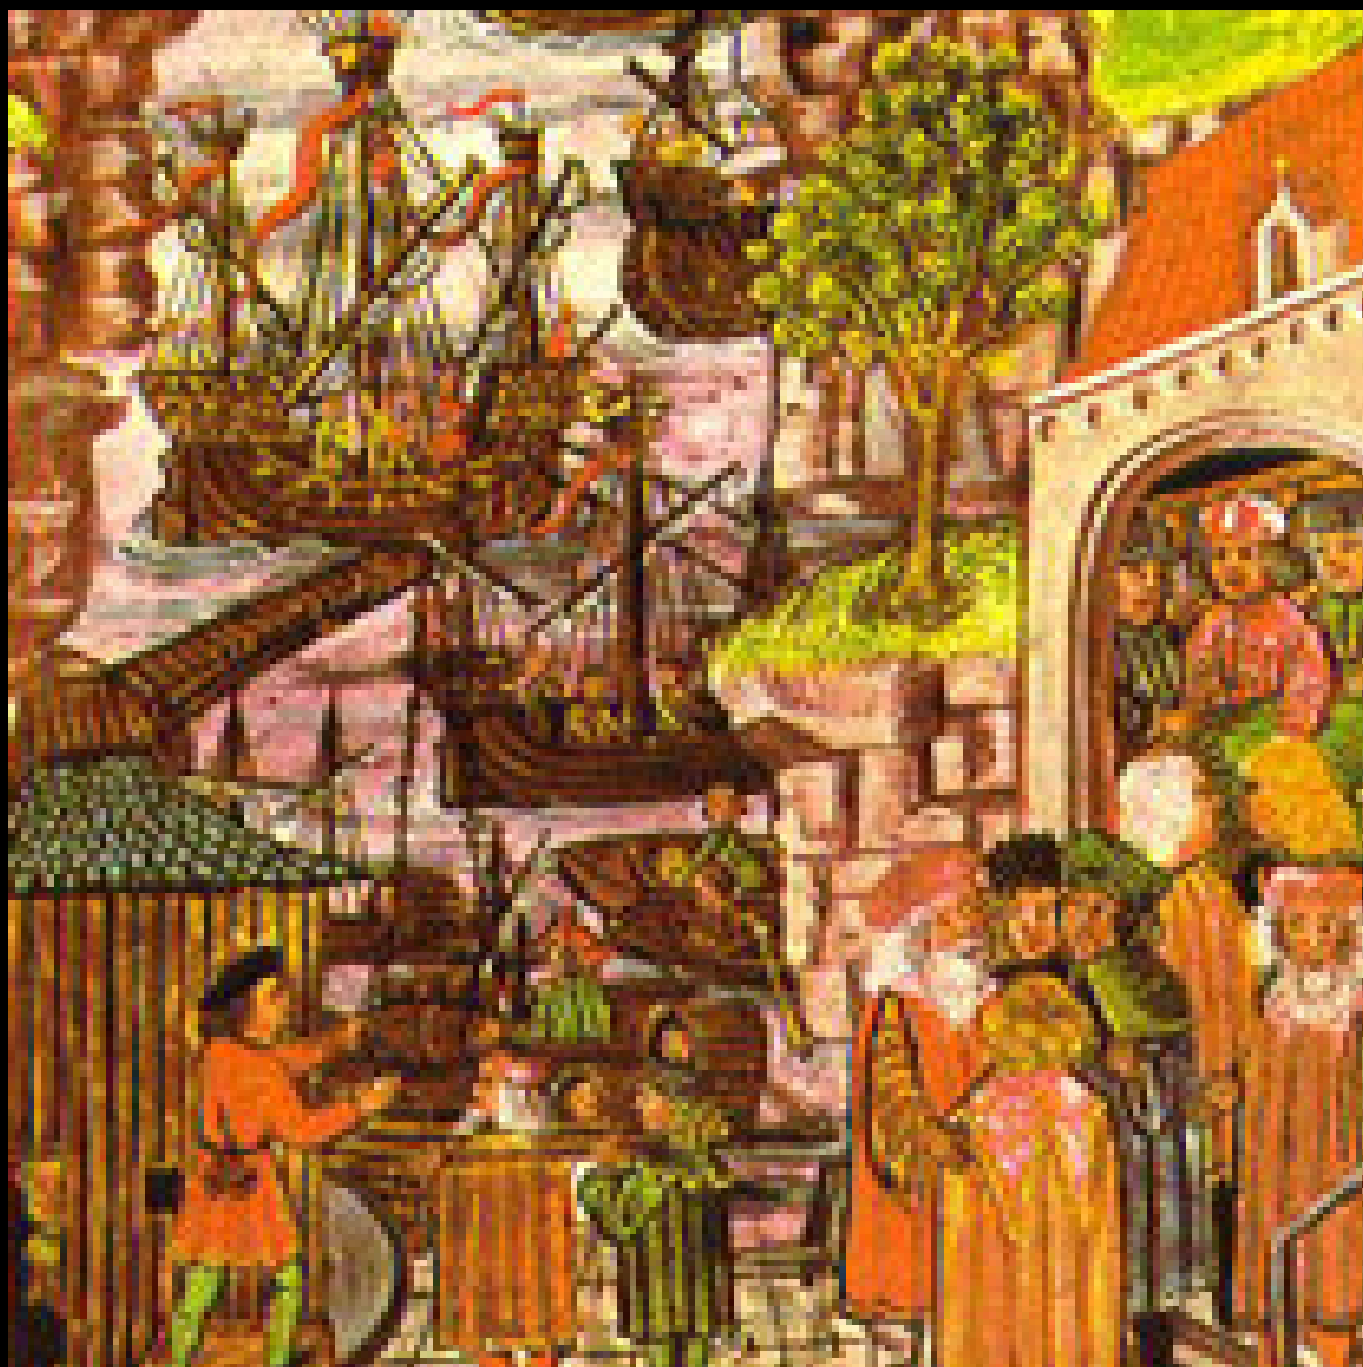

organization for the New World Order and it was a big push towards organizing all the religions of the world into one and destroying all the wisdom of the past.

500 – 1500 CE

Europe & The Dark Ages

These bloodlines eventually moved to Europe and became many of the Kings and Queens throughout the Dark Ages. The Dark Ages was one of the periods with the greatest control by the Vatican. Throughout the entire Dark Ages the Vatican, through the authority of "God", was appointing Kings and Queens to rule over the people.

1300 – 1700 CE

Black Nobility & Hanseatic League

The Kings & Queens of ancient bloodlines became known as the Black Nobility and they began to dominate Europe and other parts of the world through commerce. They worked very closely with many businessmen and created exclusive business partnerships to control commerce. One such relationship was known as Hanseatic League. The Black Nobility dominated the world through finance.

1400 AD – 1700 CE

European Countries & Cities Developed

While the Black Nobility were ruling throughout Europe many countries and cities were becoming more and more developed. Venice became a

primary banking city for these bloodlines before moving over to Amsterdam. From Amsterdam financial control was eventually moved to London, where it remains today. During this period there were many struggles between the power of the Vatican and the power of the people.

1689 CE

Britain Rises to Prominence

With William III of England rising to power in Britain, Britain became the main country representing the executive and financial branch of the New World Order. Treaties were long since in place between the partnership of Britain and the Vatican. Shortly after the Bank of England was established which carried over past banking strategies developed by the Knights Templar and carried over from Venice and Amsterdam.

1776 CE

America Rises to Prominence

America eventually broke off from Britain and became its own country. Throughout the 19th century and into the 20th Britain spent many resources on recapturing America. After many wars and agents Britain was finally able to recapture America through legal means with

corporations and through financial means with the creation of the Federal Reserve.

Present Day

The Trinity of Control

Today we have the Vatican, Britain and America as the main players

behind the New World Order. Obviously it is not these countries on the surface level that rule the earth, instead it is these countries being used as tools by the NWO who influence them through their internal network. All three countries have independent countries within the main country: In Rome we have Vatican City, in Britain we have The City of London and in America we have the District of Columbia. Each country has an obelisk signifying the true power operating behind these countries.

How Do They Control The World?

The world does not operate the way most people think it does. Governments do not run the world. The world is run by people who operate above governments and outside of political law. Secret societies have been manipulating the world and exercising influence in all aspects of life for a very long time.

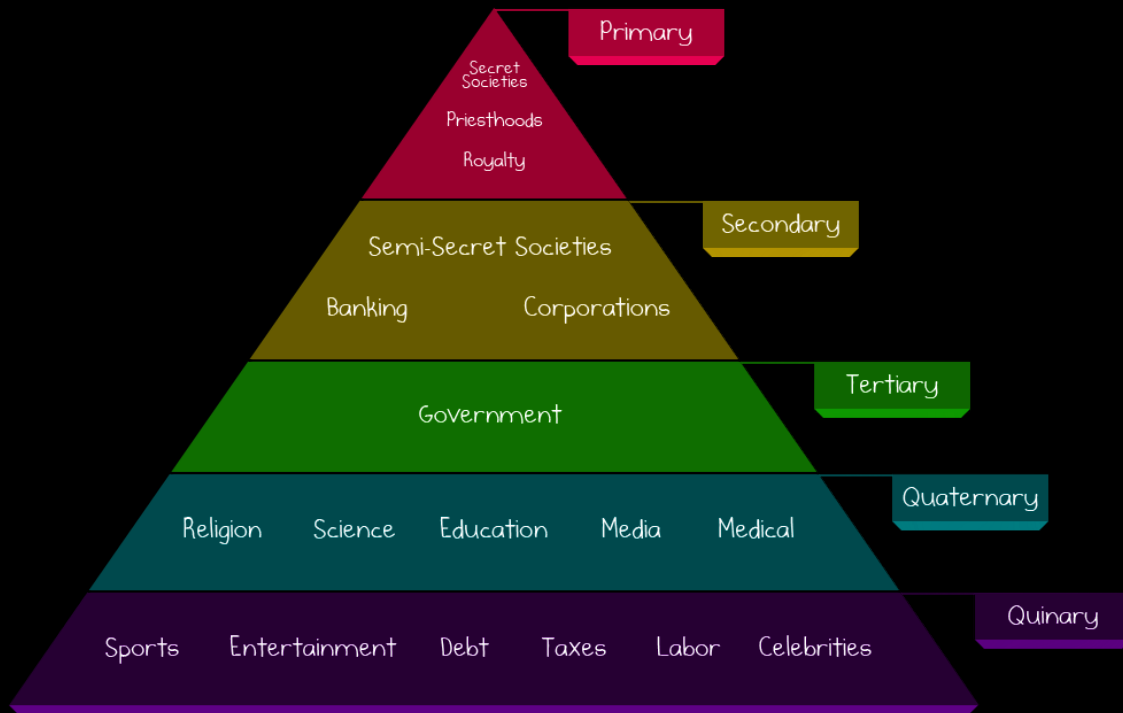

Diagram of Influence – The NWO operates like a pyramid of power. At the very top of the pyramid is where the most power is and as you work your way down the pyramid there is less and less power. There are many different levels and this chart has been broken down to give you an overview of 5 levels.

Primary Network

The primary network of control features secret societies, royalty and priesthoods at the top level. The world has operated with these three groups at the head of control for a long, long time.

Secret Societies:

Secrecy

A key component to a secret society is the secrecy. When things are kept out of sight they are easier to control.

Compartmentalization

Everything is structured in a hierarchy, similar to a pyramid. Each level understands the levels below them but they don't understand the levels above them.

Ordo Ab Chao

Latin for "Order Out of Chaos". By orchestrating events that appear to be unrelated, the NWO is able to more easily advance the agenda. When you are able to connect the dots of seemingly unrelated events the image becomes clear.

Priesthoods:

Occult Knowledge

Occult knowledge (not commonly know knowledge) is one of the most powerful tools for the NWO priesthoods. These beings understand things

that the majority of people simply do not. By having this knowledge they are more easily able to manipulate humans.

Black Magic

Much of what the priesthoods use is black magic – magic with a dark intent. The mind control and manipulation used on people is nothing

short of casting a spell on them.

Religion

Religion has always been the most popular card used for the ancient priesthoods. Although less popular now, it is still a key component to priesthood control.

Royalty:

Bloodlines

Bloodline purity is extremely important to the people behind the NWO. Their bloodlines have been kept pure for over thousands of years and they dare not dilute their blood with "inferior" races.

Name Change

Names and history are always being changed in order to conceal past events and relationships that various royal families have been associated with. By changing the name people forget about their past history and future plans.

Secondary Network

The secondary network features semi-secret societies, banks and corporations all working together. At this level semi-secret societies are established to govern banks and corporations which are used to govern high-level politics above government.

Semi-Secret Societies:

Recruitment

Through semi-secret societies the higher level secret societies are able to recruit possible candidates for promotion in the higher echelons of control. People who show no abilities of acting in a higher order are left alone while those that show the ability are promoted.

Agents

By acting through agents the royalty and priesthoods of higher level orders are never fully known. By using front-men to take the blame the true powers that be are able to interchange new front men as necessary and continue on with their plan without their identity being known.

Buffer

Semi-secret societies act as a buffer between the low levels of control and the high levels of control. By leaving the high level secret societies unknown it is extremely difficult to track down who is pulling the strings.

Banking:

Central Banks

Central banks are preferred for control over the money supply and interest rates. A central bank in a government is one of, if not the largest, step in control over a nation.

Fractional Reserve Banking

Fractional reserve banking encourages banks to lend out about 10 times the amount of currency they have in reserves. Fractional reserve banking inflates the money supply at exponential rates.

Debt Money

Creating money out of debt is a key part of NWO banking. If money is debt then there is no way to pay off the debt or interest on the debt except by creating even more debt to pay off the interest alone.

Corporations:

Resources

Controlling scarce resources through corporations is and always has been the foundation for the ruling class. By controlling important

resources such as oil, energy and food they are easily able to enforce the rules that they want.

WORLD NEWS

Media

Controlling corporations in media is another key component to the NWO. Through constant marketing and promotion of ideas people are able to

be easily swayed whether or not the idea is based upon sound principles or fact.

Medical

By controlling medical corporations the NWO is able to directly influence the bodies, both physically and mentally, of humans.

Tertiary Network

The tertiary level of control involved the use of governments throughout the world. Through government the NWO is able to use force on the people and other nations.

Government Part:

War

War is extremely expensive and requires the use of governments to inflate their currency and tax their citizens. War is funded and profited from by both sides. War is useful for bringing new groups of citizens under the fold of the NWO.

Intelligence Agencies

The NWO is able to use intelligence agencies for whatever secret purposes they choose under the cloak of national security. Intelligence agencies are virtually unaccountable and used to carry out NWO objectives.

Black Operations

Government is heavily used to fund and develop secret operations that allow the NWO to experiment on new technologies and psychological techniques to further control humans.

Tax Revenue

Majority of taxes go straight to the banks controlled by the ruling class and are used to further enslave the citizens and further empower their masters.

Monopolies & Regulation

Through the use of government the NWO is able to monopolize key industries of influence such as medical. Regulation keeps out competition and assures the NWO corporations stay in power.

Quaternary Network

The quaternary network is primarily used to control the majority of people who are already controlled through government. Various institutions are put in place to control the minds of people and various tools & techniques are used to keep the people from uprising and to redirect their frustration if they do.

Religion:

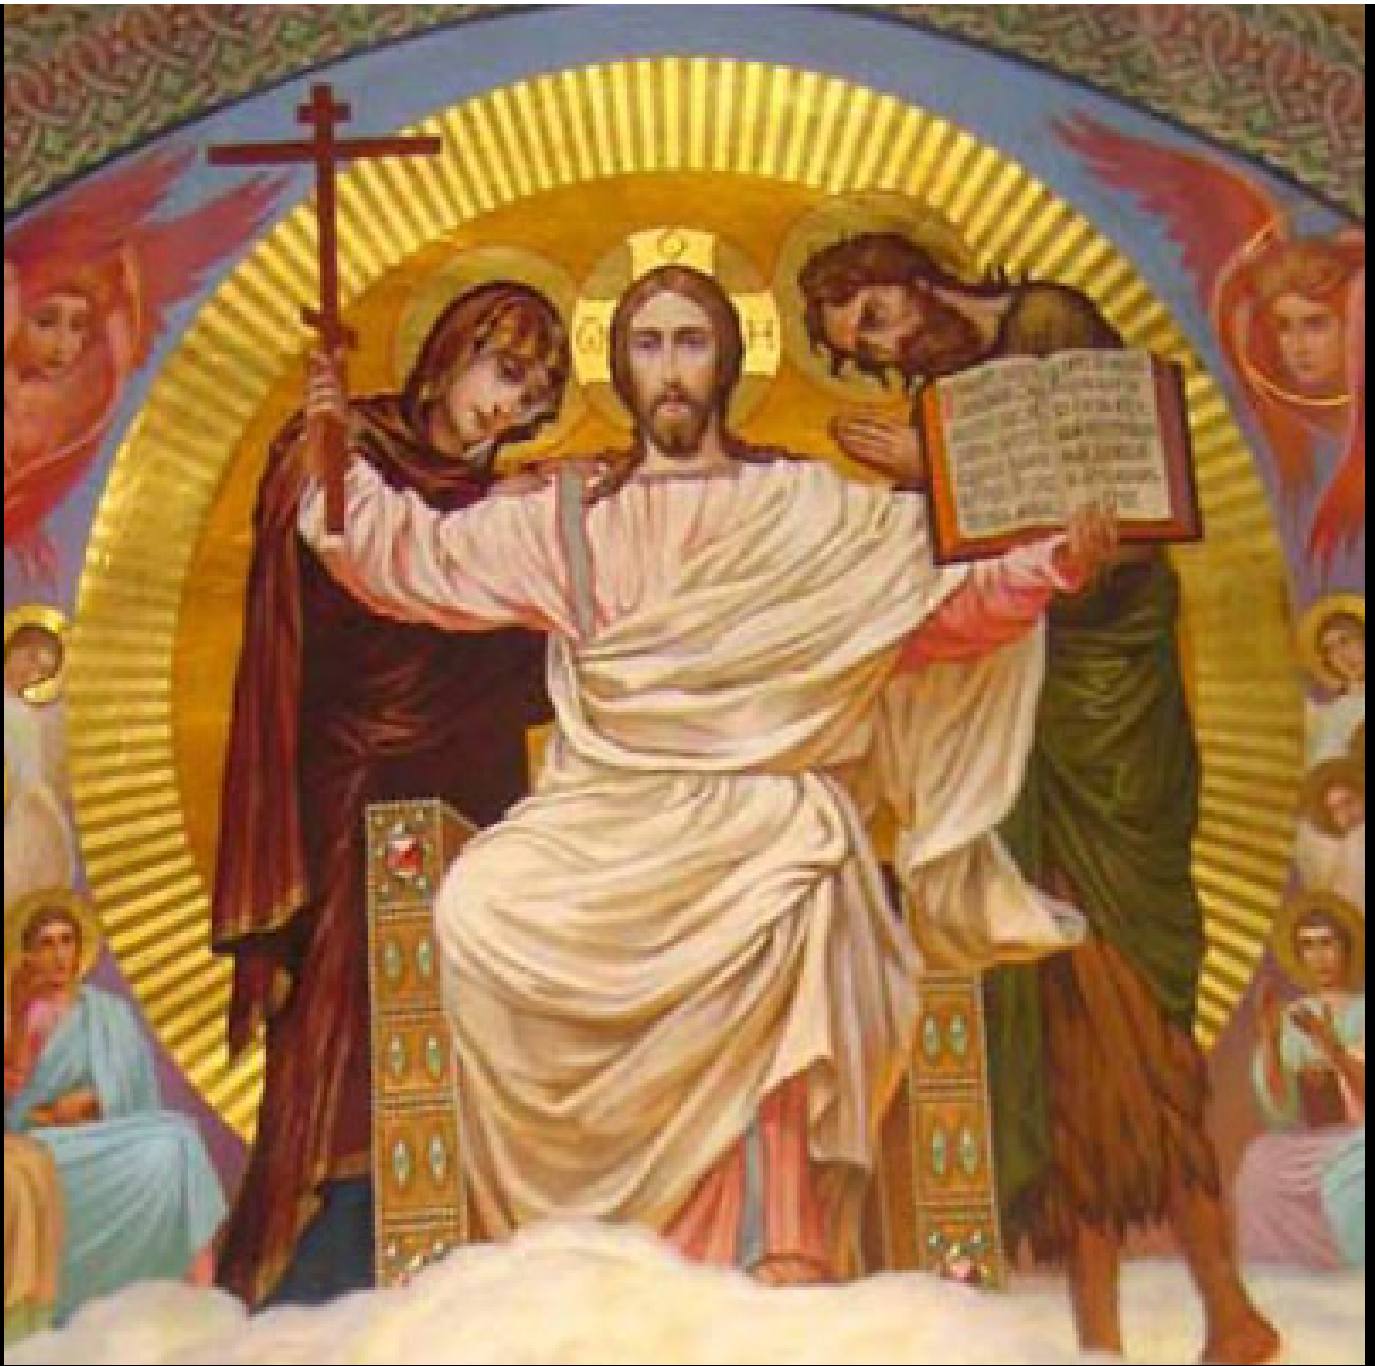

Duality

The NWO has always used religion to trick people into thinking that their religion is good while others are bad in absolute, concrete terms. In reality, good and bad are based off perspective and context.

Fear

The NWO has always used religion to place a fear component at the core of their religion. If someone does something wrong they will be punished by God.

Judgement

The NWO has always used religion to put people in a mode of strict judgement where the way and rules of their religion are the only way. Context and difference of intent is not considered.

Science:

Non Spiritual

By keeping people stuck in a non-spiritual 3D physical reality the ruling class is able to diminish people's true spiritual and infinite power. People are tricked into thinking that the physical world is all that exists.

Bad Science

By taking non-scientific things and calling them scientific people are tricked into thinking that these non-scientific things are actually based in fact and reality when they are not.

New Religion

Science is used now in a way that religion was used in the ages of the past. Science is now used in a way to make people think a certain way and blindly follow their scientific priests without asking questions.

Education:

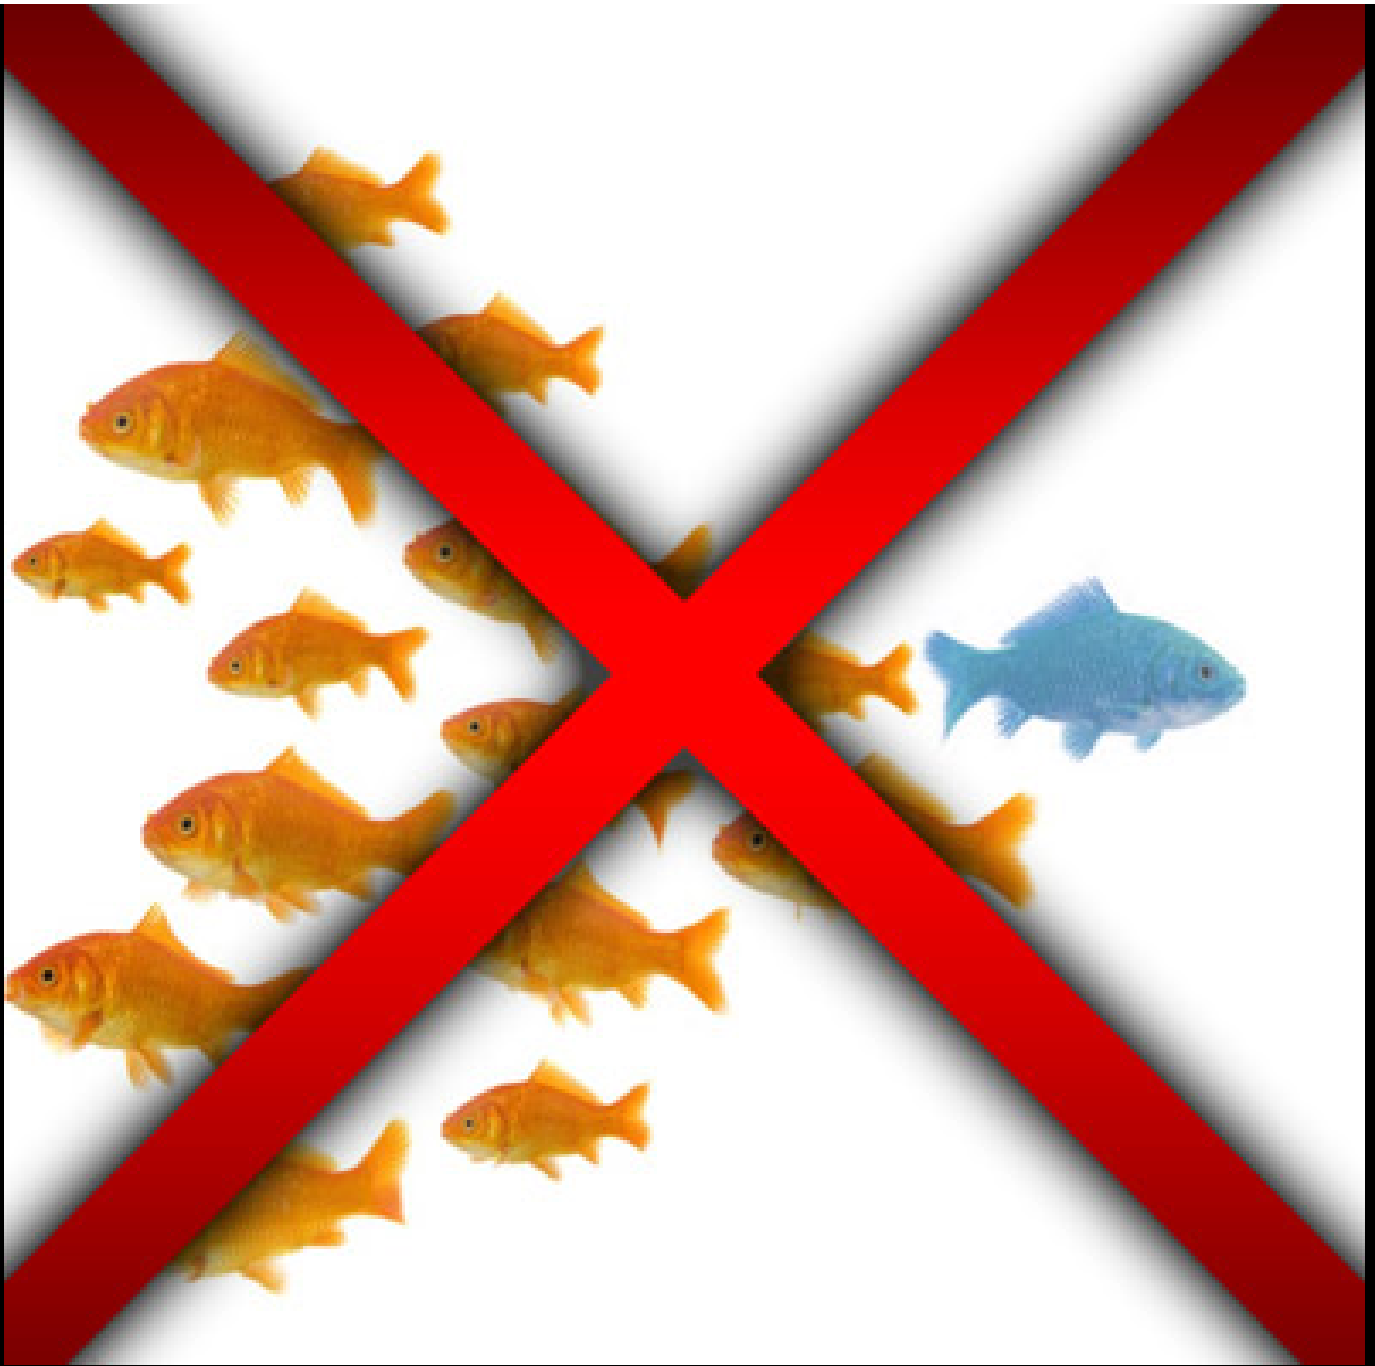

Training

People are trained *what* to think rather than educated *how* to think.
People are trained to be like robots and operate like a cog on a machine.

No Creativity

Creativity is removed from education and they are taught to conform rather than create. The entire school process is constructed to take creativity and thinking out of life and replace it with indoctrination.

No Individuality

People are not educated to be unique, but rather are trained to be like everyone else and to fit in line with the NWO communitarian system.

Media:

DEVELOPING STORY

AMERICA'S MONEY CRISIS

AC360

UPDATE Gas demand rises as price drops sharply

Propaganda

The NWO media uses propaganda to gain support for movements that people otherwise would not support. This is one of the oldest and easiest tricks in the book to execute.

FOX NEWS
el **BIG STORY**
ARE SADDAM HUSSEIN'S WMD'S
NOW IN HEZBOLLAH'S HANDS?
MBINGS WERE PART OF A LARGE CONSPIR

Marketing & Branding

By constantly badgering people with the same false messages and words people eventually believe that something is real or good. Combine with fear, it becomes a very useful and effective NWO tool.

Medical:

Drugs

Drugs are heavily used to keep people complacent and docile. Drugs are also created to treat and not to cure. Helpful drugs are hard to get through the system and often times illegal.

Genetically Modified Foods

Foods that are harmful to humans on many different levels are encouraged and promoted through the use of the medical system.

Vaccines

Vaccines and other medical procedures labeled as good are pushed on people and often times given out for free in order to get participation by people. Instead of good, immune systems are harmed and the patient become a life-long cash-cow customer.

With recent developments, DNA modification is the next role that vaccines will play. Speciating the human race.

Tools & Techniques

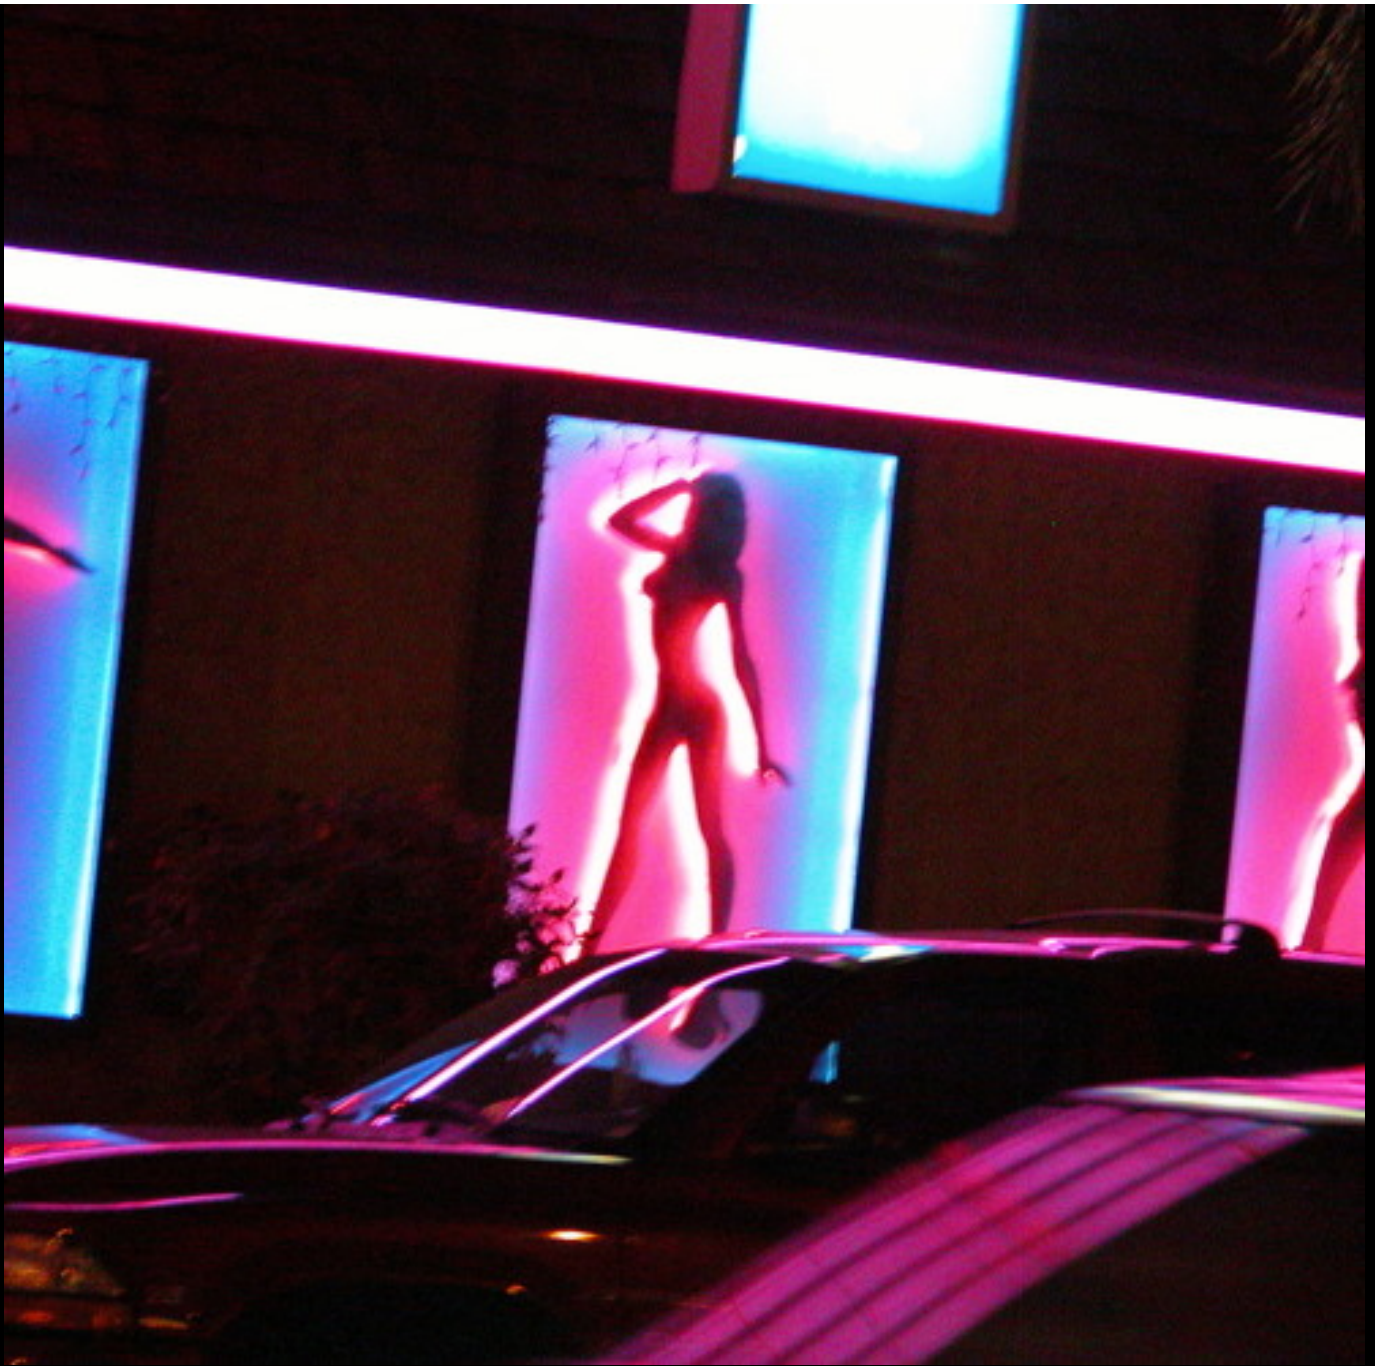

In conjunction with their network of control the NWO also uses various tools & techniques to further their control. These tools & techniques are always coupled with one or more institutions of control to carry out their goals.

Personal Tools:

Bribery

Almost everybody has a price and can be solicited into accepting illegal offers. Bribery is usually accomplished in the form of money, vacations or sex with women. People are rewarded handsomely for following orders and working for the NWO.

Blackmail

If people choose not to participate with the NWO plans, then agents from various networks will place those that do not participate into compromised situations. Adulterous sex, homosexual acts or sex with minors/children is often used as a trap for blackmailing. Later, those blackmailed, fully under NWO control, can be either promoted up the

ranks as needed or have their careers and reputation ruined. These people are fully compromised.

Murder

If all else fails, they'll kill you. They have done it time and time before and operate through all the top intelligence agencies of government.

Political Tools:

Socialism

Socialism is the technique used on first world nations for the promotion of the state and for a larger government. By growing government, more

power gets taken away from the people. Through propaganda people are tricked into creating a larger state for the NWO.

Gradualism and Incrementalism

Not everything the NWO does has to happen immediately. Many of their plans require massive amounts of time and evolve as they go along. All

they need is their foot in the door and they will slowly work the rest of the body in.

False Flags

False flags are used to gain support for movements that people otherwise would not support. It is simple enough to stage an event to get a desired

reaction from people and then implement the solution of your choosing.

Often, actors are hired to stage events. In other cases, agencies are used for more sensitive operations.

Psychological Tools:

Problem-Reaction-Solution

Problem-Reaction-Solution is a phrase coined by David Icke. The ruling class figure out what they want to implement. They then create a problem that will get their desired reaction so they can implement their desired solution.

Divide & Conquer

Dividing the masses with wedge issues is one of the oldest tricks in the book. Divide people and conquer them. Turn them against each other and people will never see the NWO behind the scenes manipulating them.

Mind Control

By using heavily researched and financed mind control techniques and technology, they are able to take behavioral manipulation to a level most people would never imagine.

Mind and behavioral control has been studied as a science for over 150 years. Gaining control of the people's minds is of great importance to the ruling class.

How They Gained & Increase Control

First things first... The ruling class are smart... **Really Really Smart!**

We have to understand that these people aren't idiots. The ruling class did not gain control by mere accident. The NWO is the result of centuries of strategic planning and politics at the highest level. They have occult knowledge and understand why the world is the way it is today. They understand human nature and they understand how to manipulate humans, they have been doing it for centuries. Just because we don't understand something doesn't mean that they don't.

The ruling class is a virus. And like a virus, they need a host to live off. So they look for existing organizations and suck the life out of them and take over them. The ruling class is a worldwide gang, like the mafia, that will do whatever it takes to grow. Their main methodology is subversion and infiltration. They don't necessarily want to change what is already in place, they just want to control it.

The NWO Infiltration Strategy

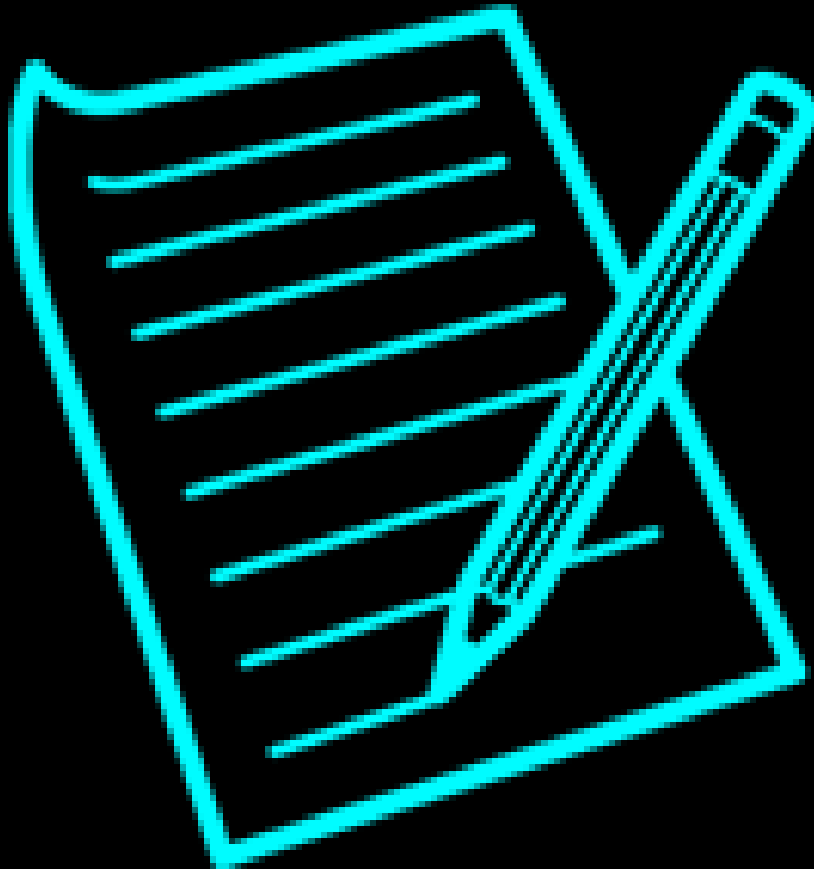

Figure Out Next Task

The ruling class are constantly looking at where the world currently is and figuring out the most favorable next steps towards manipulating people into a NWO. These people are like a smart businessman who is able to foresee the future and work around the current parameters to get there.

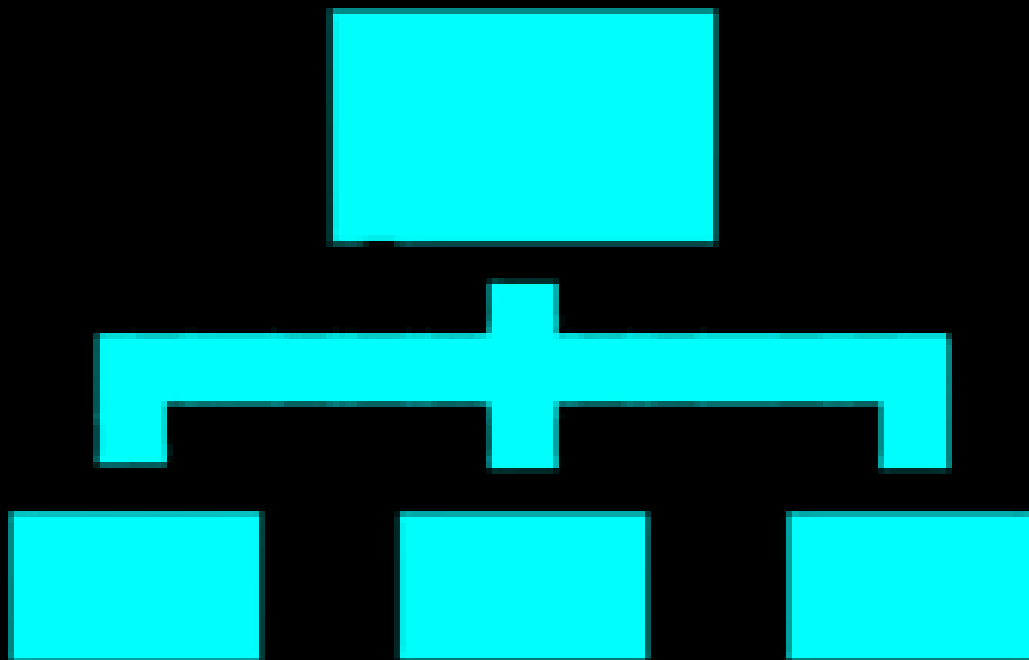

Target Key Organizations & People

Once the next task is figured out they outline the key organizations and people that are going to be main targets in the up and coming undertaking.

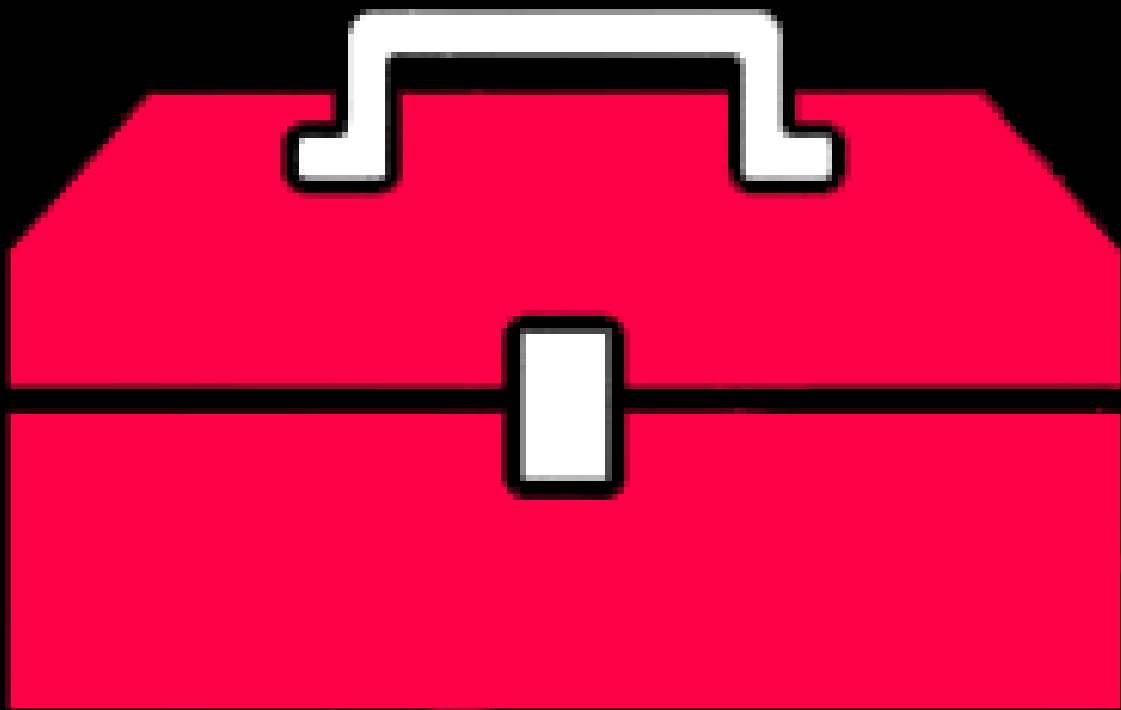

Infiltration Gameplan

Once they know who and what to target they begin to orchestrate a gameplan on possible ways to infiltrate these organizations and people.

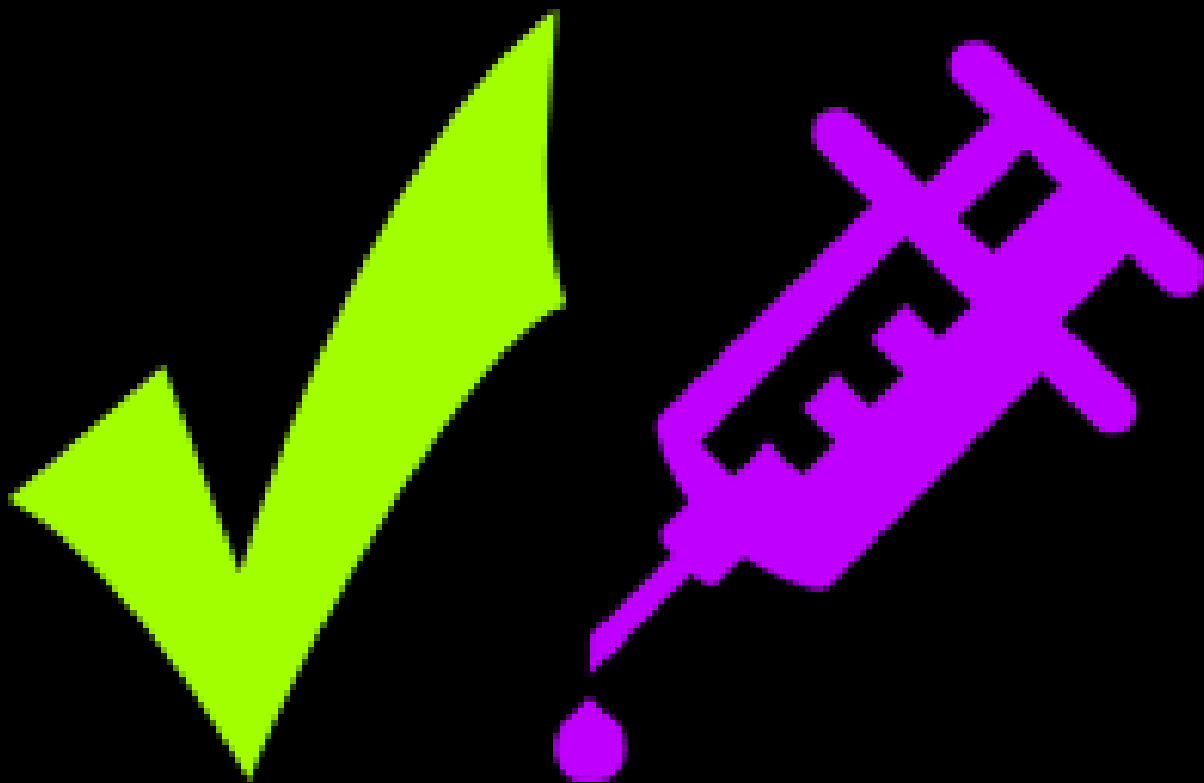

Look In Network

They start by looking in their network and seeing which existing systems can be used to facilitate such an infiltration. As their network grows in size and reach, it becomes easier and easier to take over control of newer organizations.

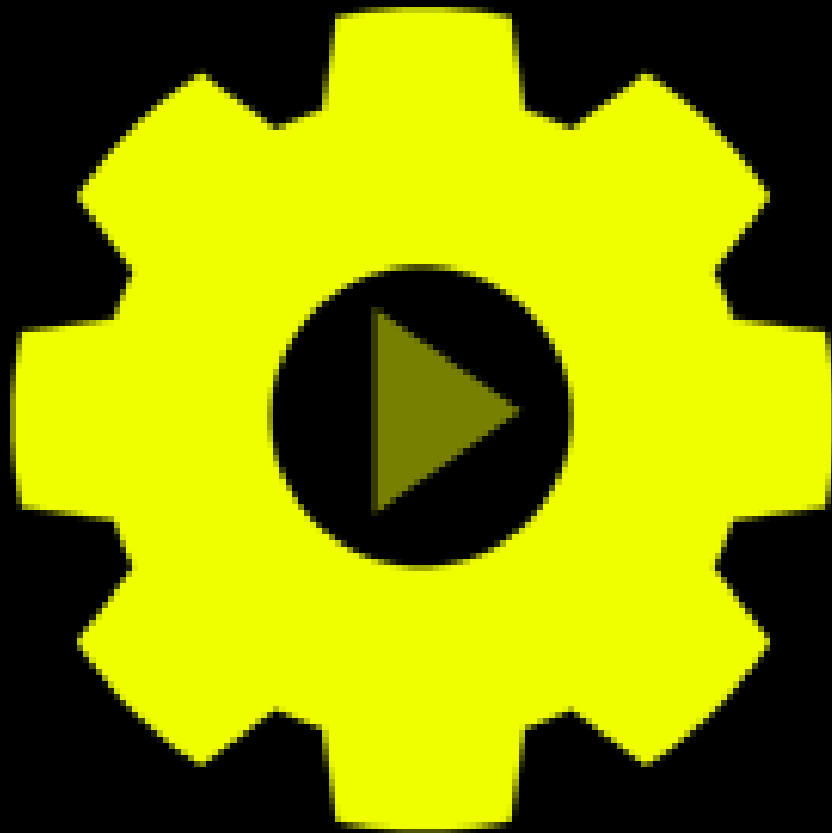

Look in Toolbox

While looking through their network they also look into their toolbox to see which tools can be grouped with which networks. Certain tools are more appropriate for certain scenarios and organizations. Bribery works great for politicians & businessmen while socialism and gradualism works great for citizens.

Find Appropriate Match

After looking through their existing network and tools the NWO finds an appropriate match or matches for the task at hand. Sometimes it may require multiple organizations at different levels working together through compartmentalization, other times it may just require an agent or two. It depends on the task.

Execution

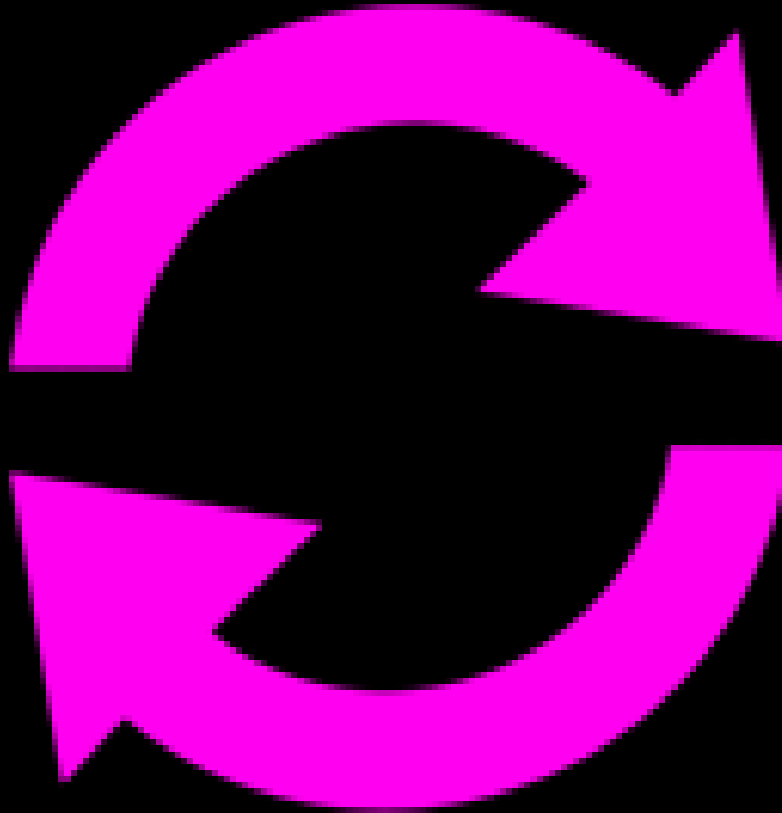

Once all the planning is done as best they can they take action and execute on their mission. The execution phase is never completely clean and so they use organizations in the network, such as the media, to be sure to redirect and minimize opposition. It's never clean but problems can always be managed and evolved into a favorable position.

Assimilation

Once the new organization is infiltrated or while it is being infiltrated an assimilation process takes place. Just like when a business undergoes new management there is a period where new people may be put in place and operations of the current organization may be tweaked to

better suit the NWO agenda. Access level will be determined by how high up on the pyramid this new operation is placed.

Rinse & Repeat

And that's it. Once they have the new organization under their fold they continue on with their expansion and look for their next host to infiltrate.

Timeline of Events of Past 250 Years

The NWO really started to pick up speed around 250 years ago. During this period we have seen a great expansion towards a new world order and a great increase in government control throughout the world, even if we think we are free.

May 1, 1776

Founding of Bavarian Illuminati

Right before the United States of America was founded we had another organization that was founded, the Bavarian Illuminati. The Illuminati was founded by a Jesuit Priest by the name of Adam Weishaupt. Weishaupt's method for gaining power was to infiltrate existing Freemasonic lodges

throughout Europe and bring them under the covert control of the Illuminati.

July 4, 1776

Founding of United States of America

America was founded by a group of people looking to escape the tyranny in Britain. Fed up with the King and taxes in Britain, America was the outgrowth of this uprising and Americans became renegades who rejected British control.

1789

French Revolution

The French Revolution was actually one of the first moves of the newly formed Illuminati. They took over many lodges in France and worked behind the scenes to orchestrate this event.

1791–1811

First Bank of United States Created

Shortly after the founding of America the first central bank was established. The bank faced strong opposition and after 20 years the charter expired and the bank was no more.

1812

War of 1812

Meanwhile in Britain, King George III was upset about being made to look like a fool by the Americans and was devising a plan to recapture his "Virginia Company". The War of 1812 was a British attempt to recapture America. It failed.

June 18, 1815

**Nathan Rothschild Financially
Captures Britain**

After the Battle of Waterloo Nathan Rothschild tricked the British people into thinking that Britain had lost the battle and he ended up buying back the shares of stocks they sold for a fraction of their true value.

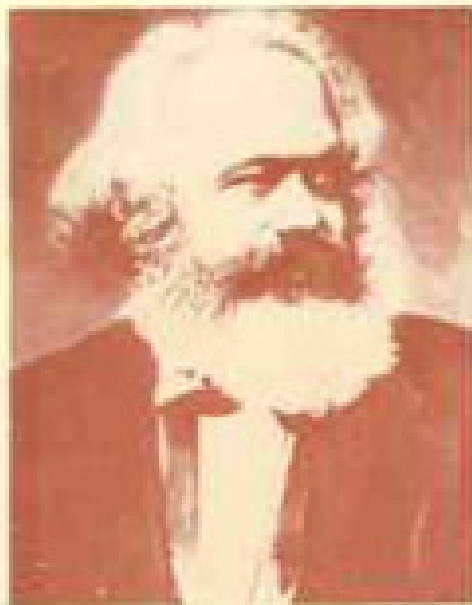

February 1817 – January 1836

Second Bank of the United States

Once again the British were back at it and with the help of their agents were able to shortly establish a new central bank in America. This one was eventually abolished by Andrew Jackson.

THE
**Communist
Manifesto**

382.14

KARL MARX & FREDERICK ENGELS

INTERNATIONAL

PUBLISHERS

February 21, 1848

Karl Marx publishes Communist Manifesto

In alignment with the plans of the Illuminati, Karl Marx publishes the Communist Manifesto as a next step towards establishing global control. Communism was created and marketed for the establishment of the New World Order.

1861-1865

American Civil War

Upset with past failures, Britain once again made a move to recapture America. British agents were replete throughout the country working behind the scenes to stir up trouble and divide America. The main force behind the Civil War was once again Britain trying to reclaim their lost company.

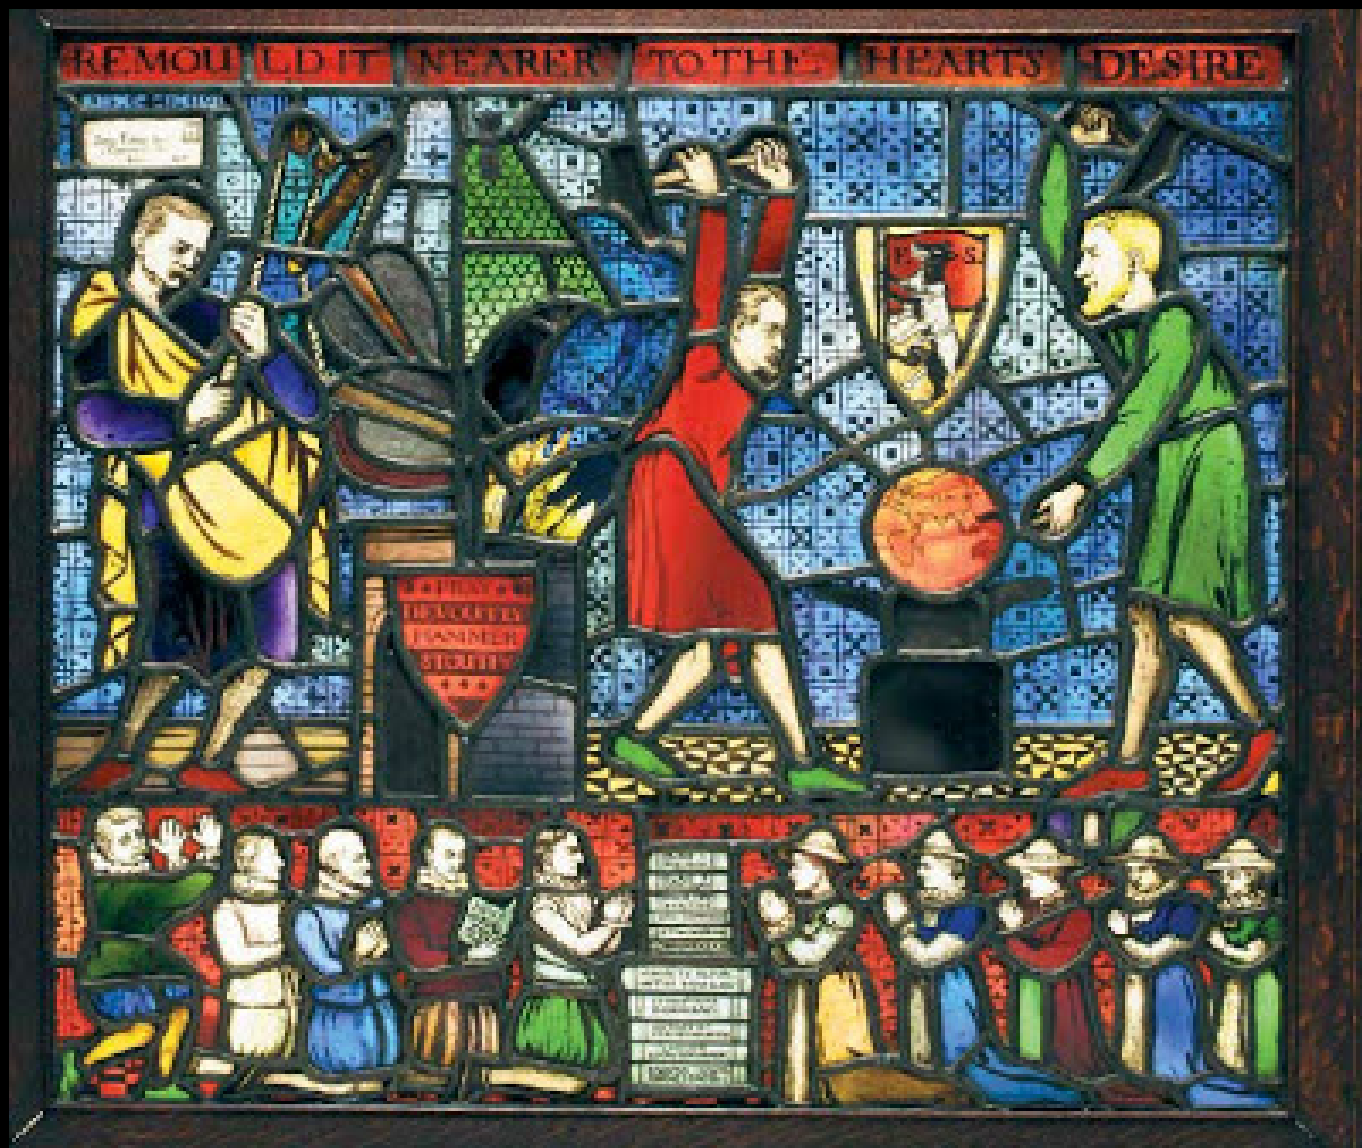

1871

United States Corporation

As a result of the Civil War Britain created a new corporation called the United States, in distinction to the United States of America. This

corporation became headquartered in the District of Columbia and to this very day has been tricking sovereign Americans into following the dictates of their jurisdiction.

January 4, 1884

Fabian Society Created

The Fabian Society is a British socialist organization that was created to advance the principles of Socialism throughout the world. They practiced and emphasized the methodology of gradualism / incrementalism.

1880-1881 & 1899-1902

Boer Wars

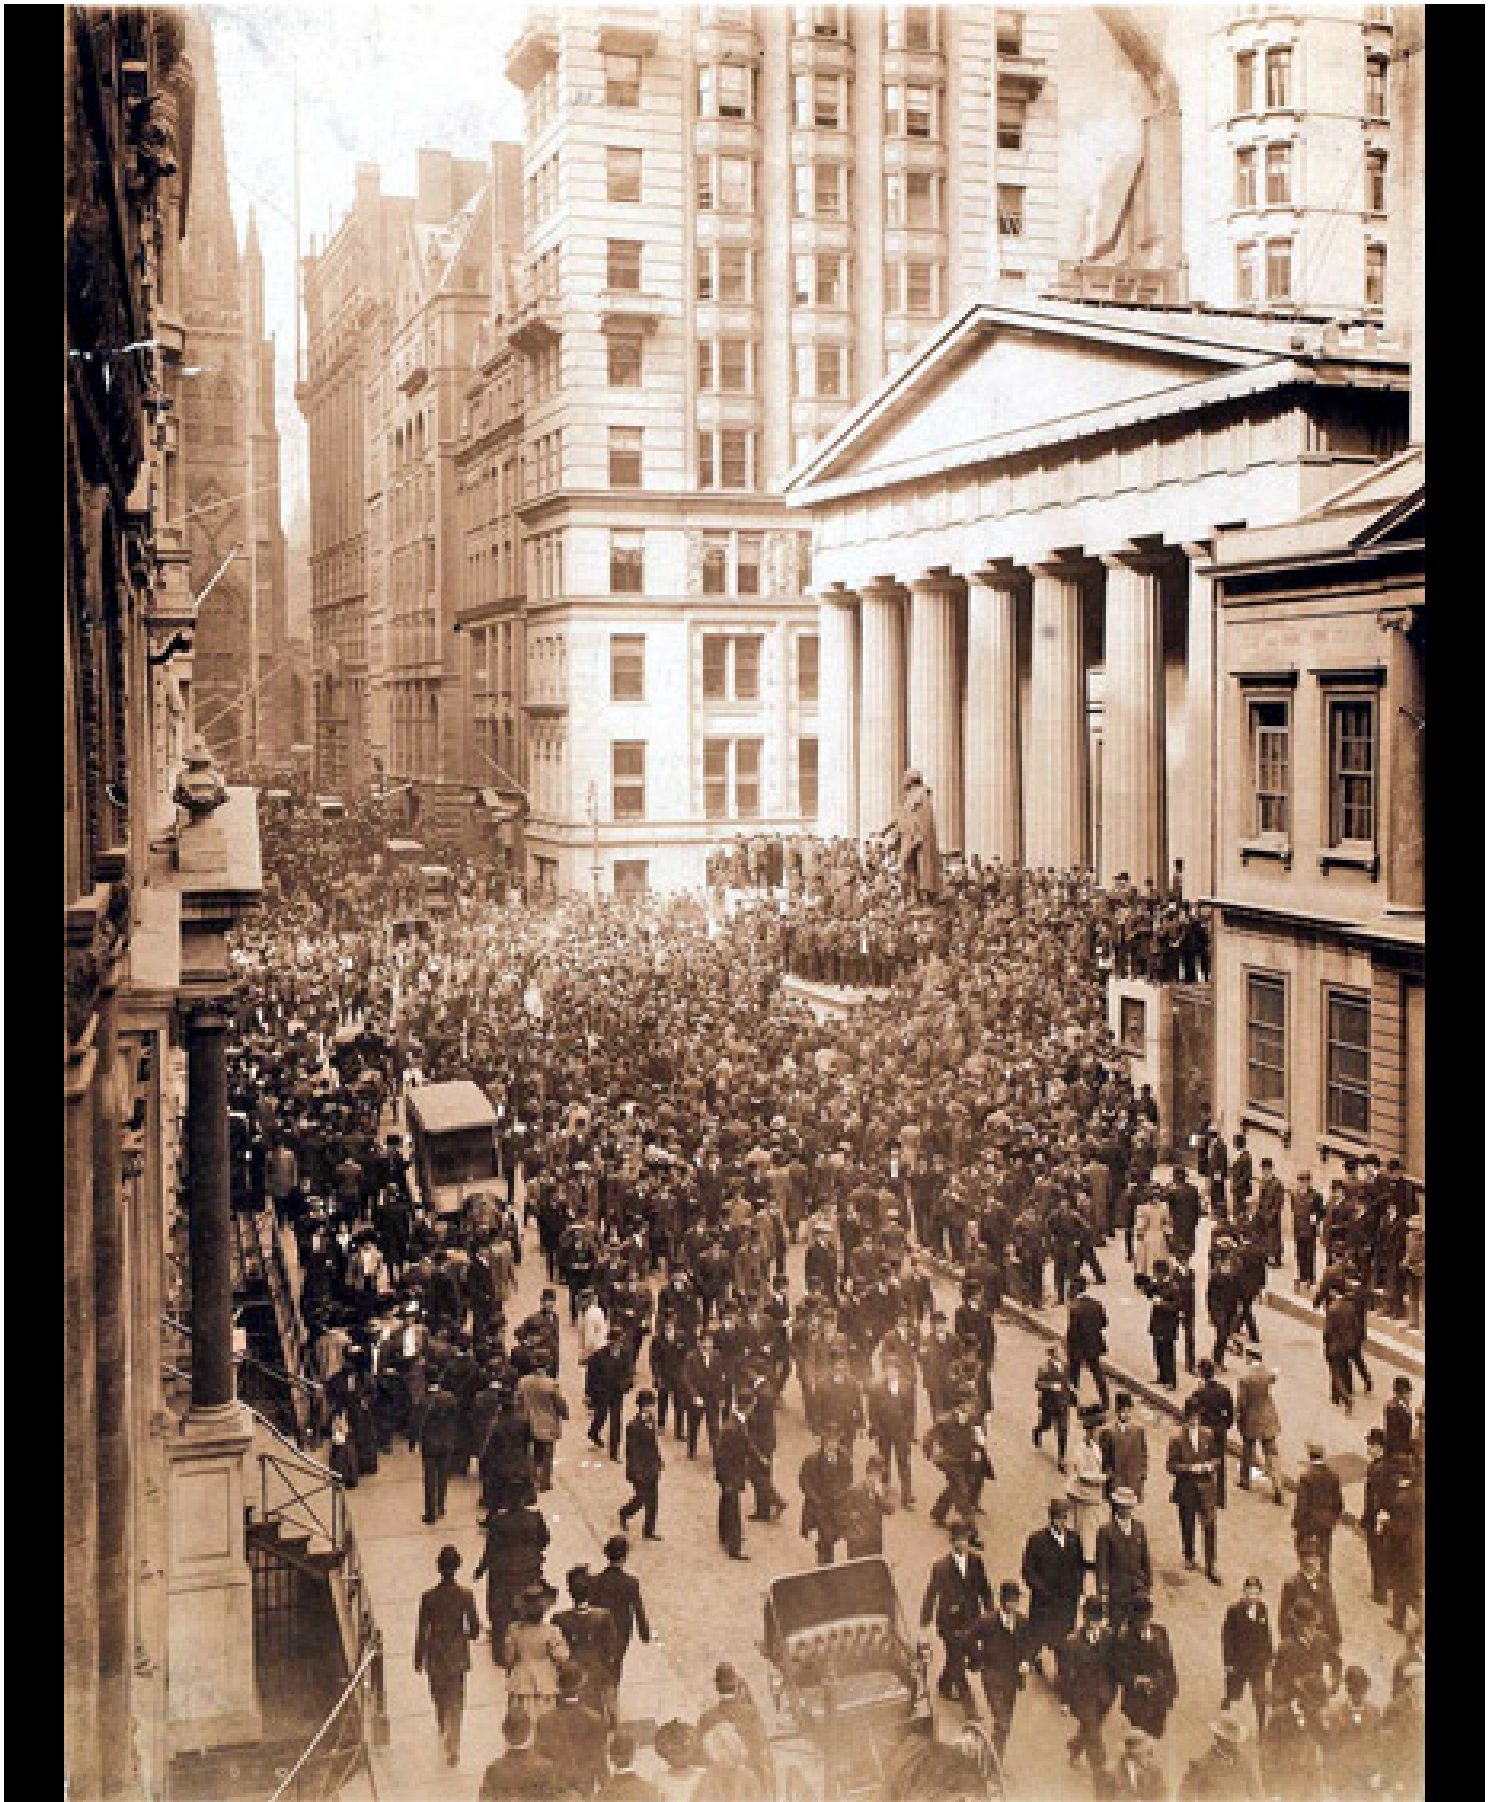

The Boer Wars were classic British Imperialism. Through war, the British converted the Boer republics into British colonies for the purpose of capturing the valuable diamond fields.

1903

Education Takeover

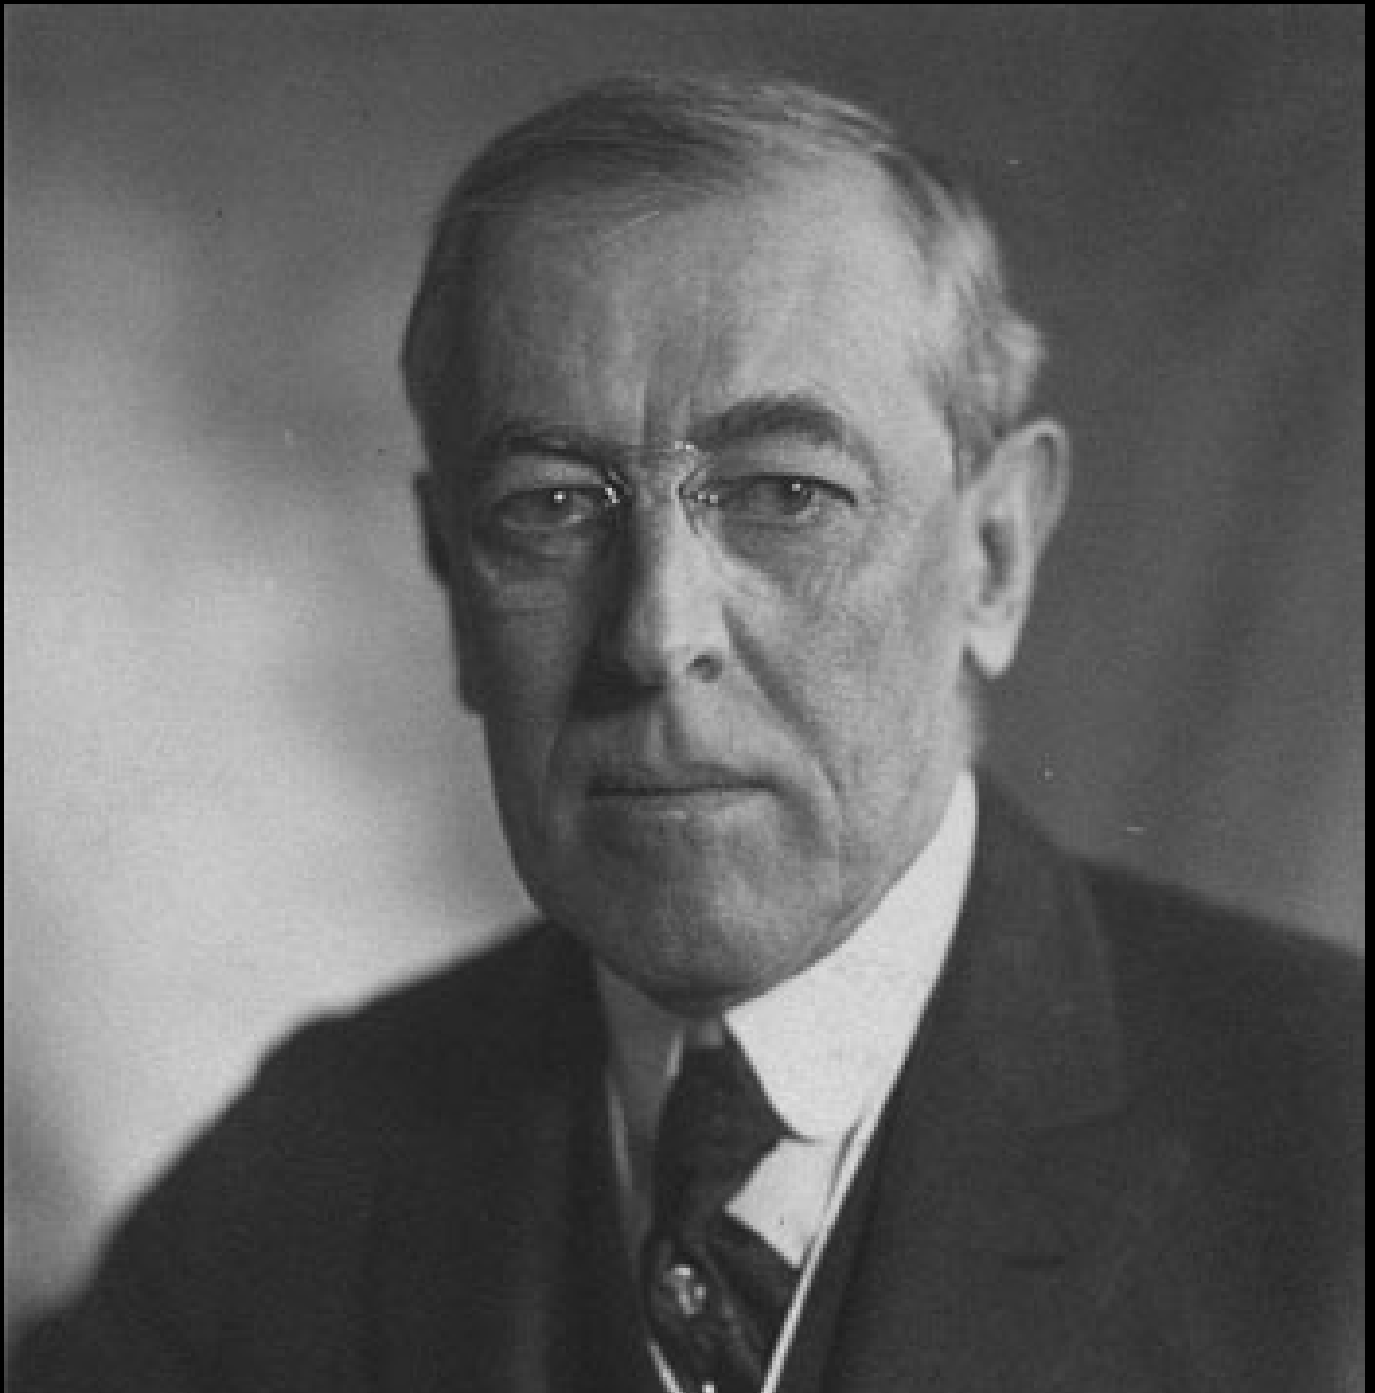

In 1903 the General Education Board is founded by the Rockefeller Foundation. This was the beginning of an ongoing mission to dumb down American students and to remove creativity and critical thinking from schools.

October 1907

Panic of 1907

In preparation for yet another attempt at creating a central bank the Panic of 1907 was engineered by NWO ruling class financiers by manipulating the markets to create a recession. The obvious solution to this panic was a central bank. (Problem-Reaction-Solution)

March 4, 1913

Woodrow Wilson becomes President

After manipulation with the candidates running for President the ruling class are able to get Woodrow Wilson into office. Wilson is a key agent for the NWO and is used for 3 key moves: The Federal Reserve, The Income Tax and World War 1.

October 3, 1913

Income Tax

The Income Tax started as a voluntary tax and through the years has become assumed as a legitimate tax, even though it is Constitutionally void. Income tax payments go straight to the Treasury who then turn it over to the Federal Reserve.

December 23, 1913

Federal Reserve System

In 1913 the NWO finally got what they had been working so hard towards: a central bank. The privately owned Fed became the central bank for America and ever since has controlled the creation of money and the interest rates to be used in the economy. The Federal Reserve was one of the largest steps towards destroying America and turning it back over to British NWO ruling class control.

July 28, 1914 – November 11, 1918

World War 1

There were a few main tasks for World War 1. Czar Nicolas II was removed from Russia and the void was to be filled with Communism. An attempt was also made to create a central governing body called the League of Nations. The League of Nations was eventually rejected by the Senate so the NWO temporarily put it on hold to later revisit.

March 8 – November 8, 1917

Russian Revolution

With the collapse of the Russian government the Bolsheviks, led by British Agent Vladimir Lenin, rose to the opportunity of restructuring Russia under Communism.

Foreign Office,

November 2nd, 1917.

Dear Lord Rothschild,

I have much pleasure in conveying to you, on behalf of His Majesty's Government, the following declaration of sympathy with Jewish Zionist aspirations which has been submitted to, and approved by, the Cabinet

His Majesty's Government view with favour the establishment in Palestine of a national home for the Jewish people, and will use their best endeavours to facilitate the achievement of this object, it being clearly understood that nothing shall be done which may prejudice the civil and religious rights of existing non-Jewish communities in Palestine, or the rights and political status enjoyed by Jews in any other country'

I should be grateful if you would bring this declaration to the knowledge of the Zionist Federation.

Yours
Arthur Balfour

November 2, 1917

Balfour Declaration

The Balfour Declaration was a letter from British Foreign Secretary Arthur James Balfour to Lord Rothschild which detailed British support for the establishment of a Jewish homeland in Palestine.

A large, stylized, white cursive signature, likely 'A. Balfour', centered on a dark brown background. The signature is highly decorative with flourishes and is the central focus of the lower half of the slide.

May 30, 1919

Council on Foreign Relations Created

The Council on Foreign Relations (CFR) was created to be the American semi-secret governing body of the NWO which acted above the United States government. The British wing was the Royal Institute of International Affairs (RIIA).

1922

Soviet Union Established

The Soviet Union is established as a NWO test run for how a society would work under Communism. Many of the bugs were worked out through the Soviet Union and later repackaged as Socialism.

BIG DECLINE SLOWED UP BY LATE RALLY

Financiers Vainly Try to Stem "Bear" Tide As Securities Sweep Down To New Lows.

By W. W. FORSTER, Press Financial Editor.
Wall Street today passed through the most momentous and disastrous period of its colorful existence. The subdued market, millions were sent home. The struggle was bitter. Today's was the greatest crash in the history of the New York Stock Exchange. Sales totaled 25,000,000 shares. As darkness fell, ticks were still grinding out sales at the rate of thousands per minute. In the last few minutes of trading before the closing gong, the overboard market, scattered stocks for a red and the tick had turned moderately upward. Losses for the day, however, were up to above 50 point blocks of 10,000 to 20,000 shares came out on the tape. One such brokerage house failed and a permanent majority was granted for the Cuban Cane Sugar Co., larger sugar producer in the world. As a late hour rally afternoon, it was estimated that \$10,000,000,000 had been wiped out. Traders were overwhelmed. Brokers were frantic in their efforts to dispose of the stock market had turned away at the 100 point level. The market had turned away at the 100 point level. The market had turned away at the 100 point level.

TAKE 66 FROM SINKING LINER

Ship Plunges to Bottom in Heavy Lake Storm.

HOPE FOR AIR

October 29, 1929

Stock Market Crash

An engineered stock market crash was once again created by the NWO ruling class to buy up even more of the United States and to pave the road for more government control.

1929 – 1940s

Great Depression

The Great Depression was the result of banking manipulation and was used to implement more government programs in the United States. The New Deal was a primary result of the Great Depression.

1933

United States Goes Bankrupt

In 1933 the United States goes bankrupt. In 1936 the Social Security System is implemented wherein the US citizens are are pledged as collateral to the debt of the United States government to the Federal Reserve.

February 27, 1933

Burning of Reichstag

In an effort to gain political support the Nazi party staged a fire on the German Reichstag and blamed it on the Communists.

1934 – 1945

Rise of Adolf Hitler

After the Reichstag fire Hitler began to rise in prominence and was supported by many NWO financiers. Hitler was initially used to further the establishment of a New World Order with a “New Man”, but he eventually turned on his masters and he was later used as a catalyst for World War II.

December 7, 1941

Bombing of Pearl Harbor

As the final pretext towards America entering World War II, high level officials in the United States knowingly allowed Japan to bomb Pearl Harbor in order to gain war support from the US people.

1939 – 1945

World War 2

World War 2 had a number of goals. The Jews were persecuted to be made to look like an unjustly treated group. From this persecution came the establishment of the State of Israel which is a key component towards future NWO plans. Hitler was also used to test out a NWO, but this time with a nationalist, Fascist flavor as opposed to the Communist approach in the Soviet Union.

June 26, 1945

United Nations Created

What the NWO was unable to accomplish with the League of Nations and WWI they were able to accomplish with the UN and WWII. The UN was established to be a starting body for the New World Order. As the New World Order expands the UN will be refined to facilitate the needs.

September 18, 1947

Central Intelligence Agency Created

The CIA was an outgrowth of the earlier Office of Strategic Services (OSS) which itself was an outgrowth of Nazi Germany. Many of the key scientists and thinkers from Nazi Germany were illegally brought right over from

Germany to the United States through Operation Paperclip. The CIA is basically a high level, government-enforced mafia, carrying out many secret social control operations throughout the world.

May 14, 1948

State of Israel

In accordance with the Balfour Declaration the State of Israel was established by Britain and bankers like the Rothschilds after much terrorism and bloodshed. The State of Israel furthered the rise of Zionism, one of the NWO's primary tools for world domination.

1952

European Union Created

The EU was created as a step towards a one world currency. Before you can get the whole world under one currency you first have to get localized regions under one currency.

The Prince presides at the First Bilderberg Conference, Oosterbeek, 1954

May 29, 1954

Bilderberg Group Created

The first Bilderberg meeting was held at the Bilderberg Hotel in the Netherlands on May 29, 1954. The Bilderberg Group is one of the premiere semi-secret societies tying many other semi-secret societies together. Members from the CFR, RIIA, Trilateral Commission as well as high level politicians and businessmen are all brought together where a small group of representatives from the higher secret societies such as the Round Table lead the discussions.

November 22, 1963

JFK Assassination

John F. Kennedy, being from a well-informed family, caught wind of what was going on and wanted to expose the Federal Reserve as well as other plots of the New World Order. The NWO publicly murdered JFK to let it be a lesson to other people in high places thinking about going against the NWO.

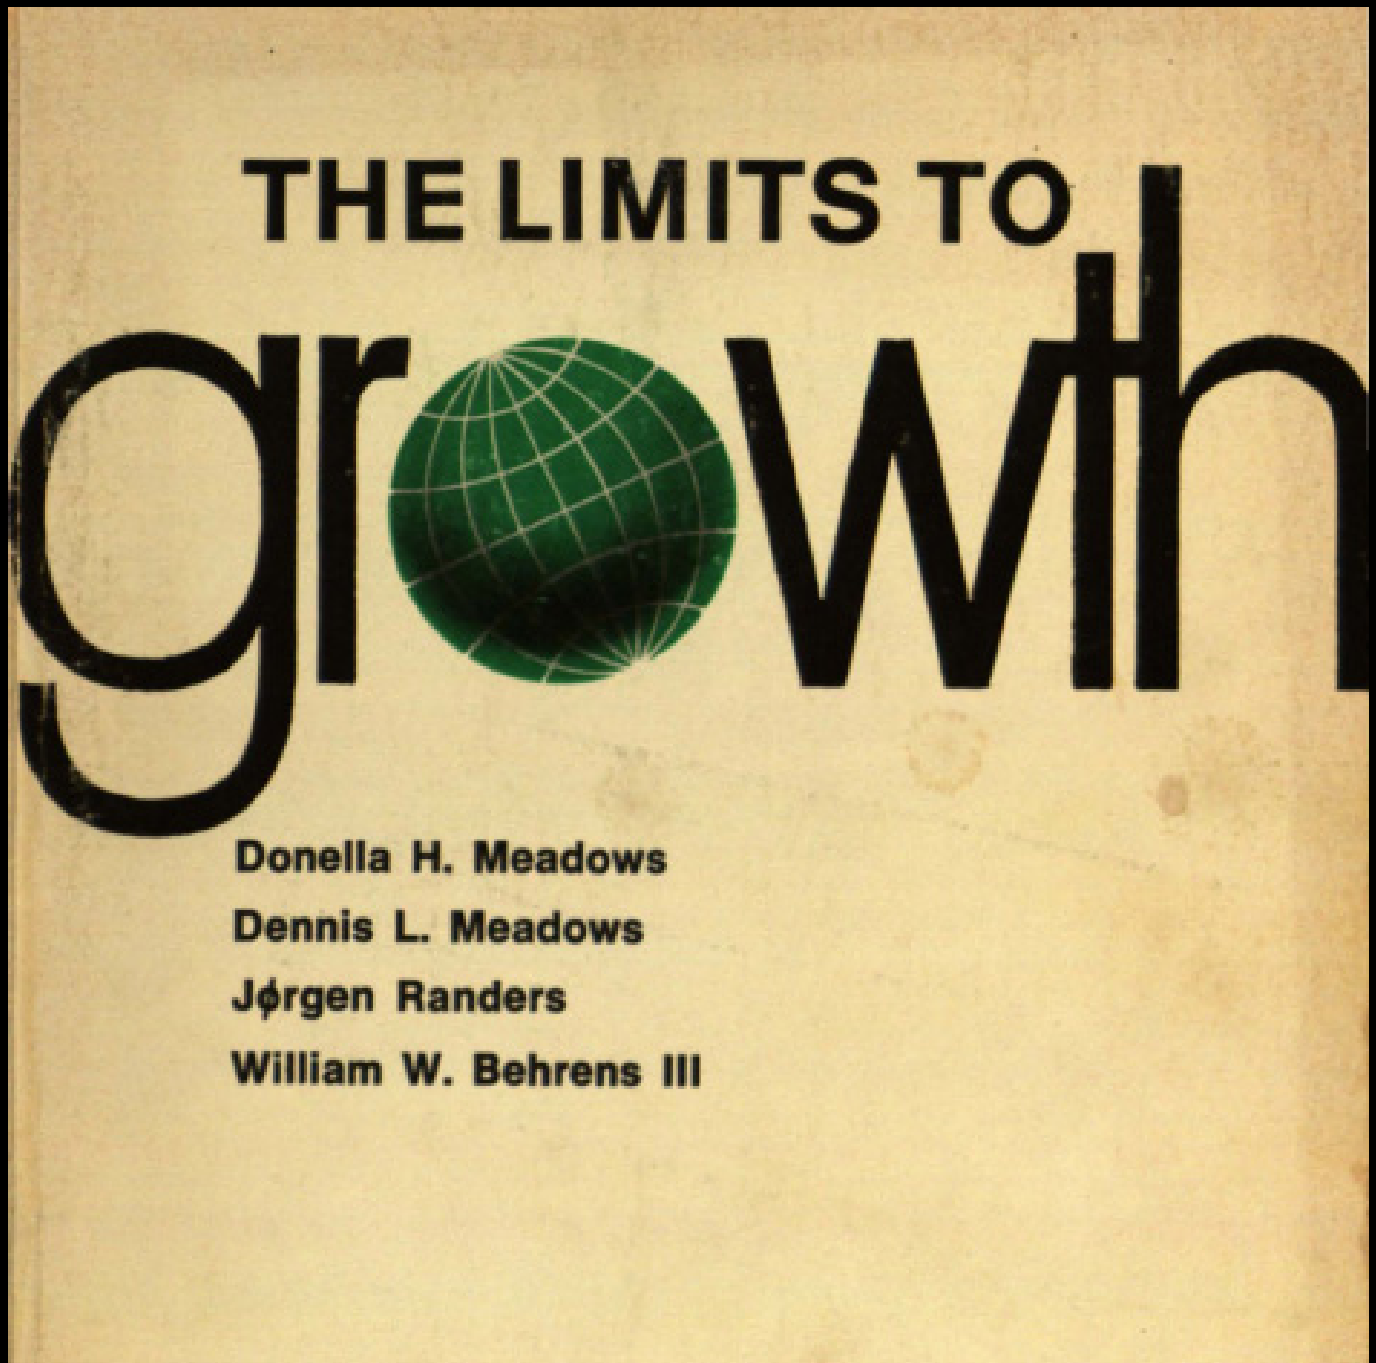

August 15, 1971

Removal of Gold Standard

Richard Nixon, by executive order, completely disconnected the US Dollar from the gold standard in 1971 which meant that the bankers were now

able to create as much money as they wanted, without having any assets to back it. As more money is loaned into existence with no assets to back it the US Dollar will eventually collapse. This has always been the NWO plan.

1972

Club of Rome "The Limits to Growth"

In 1972 the Club of Rome predicted worldwide collapse for the year 2020 based on computer a model created by an MIT engineer commissioned by the secretive group. After publishing this terrifying report, the climate warnings would persist till this day.

March 22, 1980

Georgia Guidestones

A colossal monument, setup in Georgia, USA, by an unknown group of people with words inscribed telling humanity to maintain a population of 500,000,000 for a coming new age.

September 11, 2001

9/11

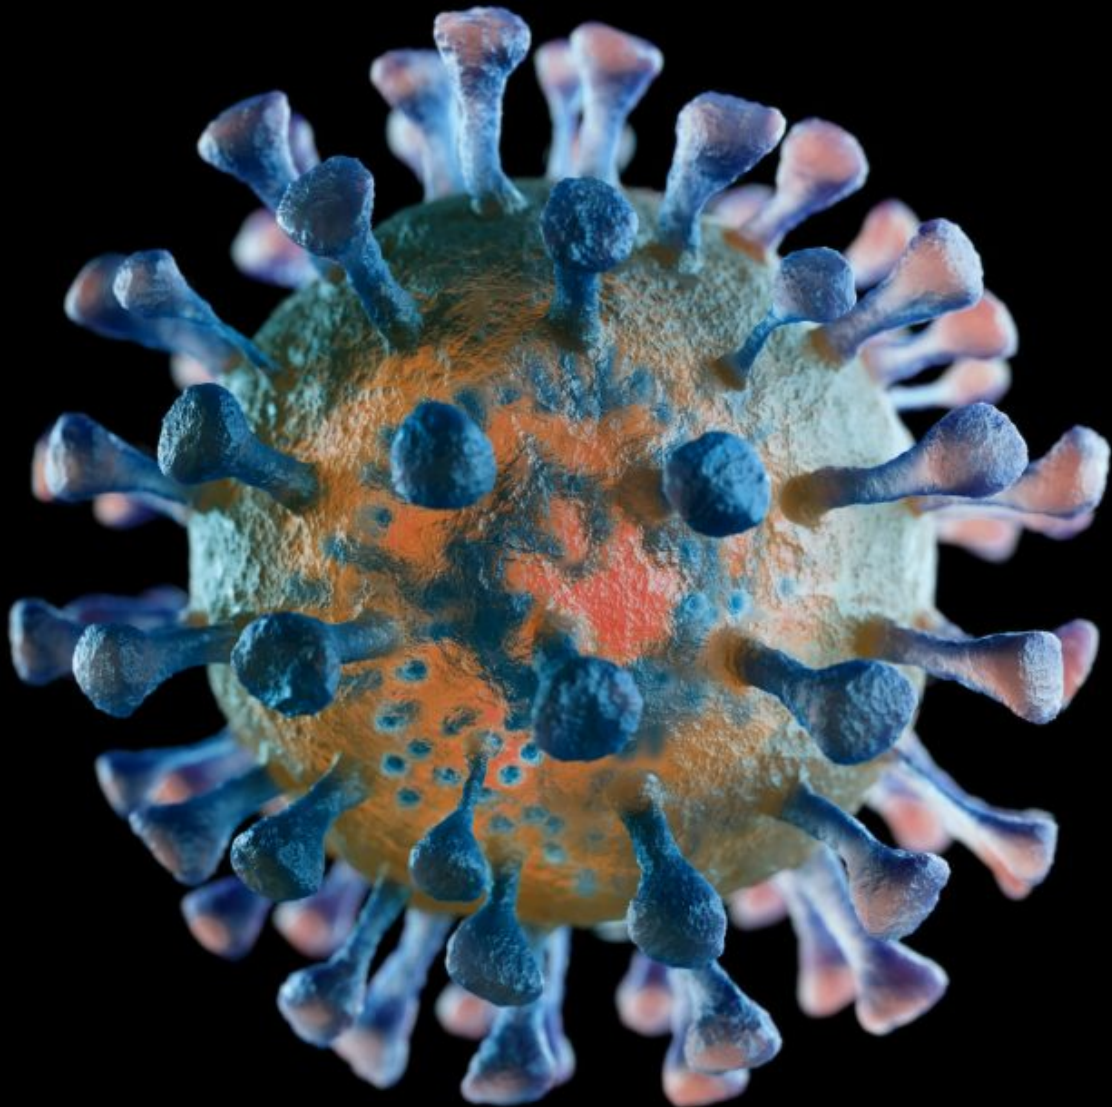

9/11 was a classic false flag event orchestrated by the NWO to push through a number of "solutions". Such solutions implemented as a result of 9/11 are increased fear of terrorism, heightened security all around, more government laws such as the Patriot Act and of course war.

October 2008 – Present Day

Financial Crisis

The financial housing crisis of 2008 was just a tremor of what is about to come. This was the beginning of the result of taking the dollar off the gold standard and inflating it for 100 years. We are soon to face an even greater crisis and at this point the NWO may go for a new currency altogether, based on a global social-carbon credit tokenized system.

11 March 2020

Covid-19 Pandemic

The UN WHO, declares pandemic on 11 March 2020. The SARS-COV-2 (COVID-19) virus (aka the Wuhan Virus), triggers a worldwide panic, causing all nations around the world to go into total lockdown, in lockstep

manner. Everyone is instructed to stay home, to keep minimum distance. Travel restrictions are imposed. Mandates are issued. Police are dispatched, businesses start to shut down, supply chains become affected, hospitals are in chaos, schools are suspended, etc.

The logo for the World Economic Forum, featuring the words "WORLD ECONOMIC FORUM" in a white, sans-serif font on a dark blue background. A white, stylized arc or line curves around the text, starting from the top left and ending at the bottom right.

3 June 2020

The World Economic Forum Declares The Great Reset

The WEF is an international network of some of the wealthiest and most politically powerful people on the planet, based in Davos, Switzerland.

The "Age of Human Robots Is Over" and "You will own nothing and be

happy!”. “The pandemic represents a rare but narrow window of opportunity to reflect, reimagine, and reset our world” – Klaus Schwab, Founder and Executive Chairman.

Secret Societies & Organizations

Like a spider’s web, the NWO is broken into many layers. As you work your way in, each outer layer is controlled by a more secret inner layer. As you work your way closer and closer to the core the organizations become more and more powerful and more and more secretive. At the very inner core the identity is shrouded in mystery...

Where is the Proof?

As more and more research is done the plan for the New World Order usually makes more sense. Like a puzzle becoming more clear with each piece, each piece to the NWO leads to a more full understanding of just what is going on – and many pieces there are...

History

The history of the world is basically the history of the New World Order. As we learn more about history and connect the dots between seemingly unrelated events and entities it starts to become more clear how these events were really related and who was really orchestrating the events. Most of the history we learn in school is surface level history that never ties together the true motives and the true meaning behind events.

THE JOINT CHIEFS OF STAFF
WASHINGTON 25, D.C.

UNCLASSIFIED

13 March 1962

MEMORANDUM FOR THE SECRETARY OF DEFENSE

Subject: Justification for US Military Intervention
in Cuba (TS)

1. The Joint Chiefs of Staff have considered the attached Memorandum for the Chief of Operations, Cuba Project, which responds to a request of that office for brief but precise description of pretexts which would provide justification for US military intervention in Cuba.

2. The Joint Chiefs of Staff recommend that the proposed memorandum be forwarded as a preliminary submission suitable for planning purposes. It is assumed that there will be similar submissions from other agencies and that these inputs will be used as a basis for developing a time-phased plan. Individual projects can then be considered on a case-by-case basis.

3. Further, it is assumed that a single agency will be given the primary responsibility for developing military and para-military aspects of the basic plan. It is recommended that this responsibility for both overt and covert military operations be assigned the Joint Chiefs of Staff.

~~TOP SECRET SPECIAL HANDLING NOFORN~~

Many government documents mention many secret plans and events that are surprising to look at. As time goes on many government documents become declassified or known other ways. Many people are unaware that these documents even exist. For centuries the ruling class has been using governments to carry out pieces of their conspiracy for a NWO and these conspiracies are well documented.

Internal Writings

There are many internal writings by high level ruling class people and they share many of their plans and findings throughout history. Even the players of the NWO want their history documented and many of them encode their writing through the use of words, metaphors and symbols.

Follow The Money

The people who control the money usually hold a lot of power. Look at who the wealthiest families are and how they became wealthy. Look at who controls money and the creation of it. These are the people who hold the cards. You won't find them on the Forbes top 100 lists."

Whistleblowers

There are many ex-government and even secret society members who will sometimes talk about their experiences being part of the New World Order. These ex-members have a plethora of insider information which is valuable for putting together the pieces of the New World Order.

Royal Masonic Hospital Nurses' Uniform Buckle

Symbols

Symbols are used by the ruling class to communicate with other people in the know and to conceal their message from those who are not in the know. They figure if you understand the symbols then you have done your homework and you deserve to know. But if you don't understand the symbols then it's your own fault for not knowing."

ODD TV

SECRET COVENANT

The Secret Covenant

A covenant is a contract. According to the rules of engagement in the universe, all contracts require the consent of the population before any action is taken due to possible adverse effects. This is a principle of Universal law. Even if the authors or historians are only able to gain consent through silent acquiescence, consent remains critical, since it moves the karma from them to us. The karmic ball is suddenly in the people's court. Self-induced karma. We are responsible for the consequences.

The Secret Covenant is no longer secret. The sudden leak into the public venue appears to be 'soft disclosure' by a secret society in order to gain the consent of the masses for their hidden dark acts that have been coming to light.

However, disclosure is also an opportunity for the masses to call out anonymous tricksters and deceivers, and to refuse to consent. There must always be a choice in a free will universe. Such a law allows an opportunity for individuals to clearly take a stand.

Do you consent? Yes or No?

THE SECRET COVENANT

- An illusion it will be, so large, so vast it will escape their perception.
- Those who will see it will be thought of as insane.
- We will create separate fronts to prevent them from seeing the connection between us.
- We will behave as if we are not connected to keep the illusion alive. Our goal will be accomplished one drop at a time so as to never bring suspicion upon ourselves. This will also prevent them from seeing the changes as they occur.
- We will always stand above the relative field of their experience for we know the secrets of the absolute.
- We will work together always and will remain bound by blood and secrecy. Death will come to he who speaks.
- We will keep their lifespan short and their minds weak while pretending to do the opposite.
- We will use our knowledge of science and technology in subtle ways so they will never see what is happening.
- We will use soft metals, aging accelerators and sedatives in food and water, also in the air.
- They will be blanketed by poisons everywhere they turn.
- The soft metals will cause them to lose their minds. We will promise to find a cure from our many fronts, yet we will feed them

more poison.

- The poisons will be absorbed through their skin and mouths, they will destroy their minds and reproductive systems.
- From all this, their children will be born dead, and we will conceal this information.
- The poisons will be hidden in everything that surrounds them, in what they drink, eat, breathe and wear.
- We must be ingenious in dispensing the poisons for they can see far.
- We will teach them that the poisons are good, with fun images and musical tones.
- Those they look up to will help. We will enlist them to push our poisons.
- They will see our products being used in film and will grow accustomed to them and will never know their true effect.
- When they give birth we will inject poisons into the blood of their children and convince them it's for their help.
- We will start early on, when their minds are young, we will target their children with what children love most, sweet things.
- When their teeth decay we will fill them with metals that will kill their mind and steal their future.
- When their ability to learn has been affected, we will create medicine that will make them sicker and cause other diseases for which we will create yet more medicine.
- We will render them docile and weak before us by our power.
- They will grow depressed, slow and obese, and when they come to us for help, we will give them more poison.

- We will focus their attention toward money and material goods so they many never connect with their inner self. We will distract them with fornication, external pleasures and games so they may never be one with the oneness of it all.
- Their minds will belong to us and they will do as we say. If they refuse we shall find ways to implement mind-altering technology into their lives.
- We will use fear as our weapon.
- We will establish their governments and establish opposites within. We will own both sides.
- We will always hide our objective but carry out our plan.
- They will perform the labor for us and we shall prosper from their toil.
- Our families will never mix with theirs. Our blood must be pure always, for it is the way.
- We will make them kill each other when it suits us.
- We will keep them separated from the oneness by dogma and religion.
- We will control all aspects of their lives and tell them what to think and how.
- We will guide them kindly and gently letting them think they are guiding themselves.
- We will foment animosity between them through our factions.
- When a light shall shine among them, we shall extinguish it by ridicule, or death, whichever suits us best.
- We will make them rip each other's hearts apart and kill their own children.

- We will accomplish this by using hate as our ally, anger as our friend.
- The hate will blind them totally, and never shall they see that from their conflicts we emerge as their rulers. They will be busy killing each other.
- They will bathe in their own blood and kill their neighbors for as long as we see fit.
- We will benefit greatly from this, for they will not see us, for they cannot see us.
- We will continue to prosper from their wars and their deaths.
- We shall repeat this over and over until our ultimate goal is accomplished.
- We will continue to make them live in fear and anger through images and sounds.
- We will use all the tools we have to accomplish this.
- The tools will be provided by their labor.
- We will make them hate themselves and their neighbors.
- We will always hide the divine truth from them, that we are all one. This they must never know!
- They must never know that a man's color is an illusion; they must always think they are not equal.
- Drop by drop, drop by drop we will advance our goal.
- We will take over their land, resources and wealth to exercise total control over them.
- We will deceive them into accepting laws that will steal the little freedom they will have.
- We will establish a money system that will imprison them forever, keeping them and their children in debt.

- When they shall ban together, we shall accuse them of crimes and present a different story to the world for we shall own all the media.
- We will use our media to control the flow of information and their sentiment in our favor.
- When they shall rise up against us we will crush them like insects, for they are less than that.
- They will be helpless to do anything for they will have no weapons.
- We will recruit some of their own to carry out our plans, we will promise them eternal life, but eternal life they will never have for they are not of us.
- The recruits will be called "initiates" and will be indoctrinated to believe false rites of passage to higher realms. Members of these groups will think they are one with us never knowing the truth. They must never learn this truth for they will turn against us.
- For their work they will be rewarded with earthly things and great titles, but never will they become immortal and join us, never will they receive the light and travel the stars.
- They will never reach the higher realms, for the killing of their own kind will prevent passage to the realm of enlightenment. This they will never know.
- The truth will be hidden in their face, so close they will not be able to focus on it until it's too late.
- Oh yes, so grand the illusion of freedom will be, that they will never know they are our slaves.
- When all is in place, the reality we will have created for them will own them. This reality will be their prison. They will live in self-delusion.

- When our goal is accomplished a new era of domination will begin.
- Their minds will be bound by their beliefs, the beliefs we have established from time immemorial.
- But if they ever find out they are our equal, we shall perish then.
THIS THEY MUST NEVER KNOW.
- If they ever find out that together they can vanquish us, they will take action.
- They must never, ever find out what we have done, for if they do, we shall have no place to run, for it will be easy to see who we are once the veil has fallen. Our actions will have revealed who we are and they will hunt us down and no person shall give us shelter.
- This is the secret covenant by which we shall live the rest of our present and future lives, for this reality will transcend many generations and life spans.
- This covenant is sealed by blood, our blood. We are the ones who from heaven to earth came.
- This covenant must NEVER, EVER be known to exist. It must NEVER, EVER be written or spoken of for if it is, the consciousness it will spawn will release the fury of the PRIME CREATOR upon us and we shall be cast to the depths from whence we came and remain there until the end time of infinity itself.

The NWO Resetting to Net Zero

Pan

THE LIMITS TO GROWTH

Donella H. Meadows Dennis L. Meadows
Jorgen Randers William W. Behrens III

... OF ROME'S
ject on the
cament of mankind.

The Limits to Growth – Club of Rome

The Limits to Growth is a 1972 report written by the secret society **Club of Rome** on economic and population growth, with a finite supply of resources, using a computer simulation. The simulated consequence of interactions between the earth and human systems forecasted a doomsday collapse of civilization. The model was based on the work of an MIT professor, commissioned by the Club of Rome. Heavy criticism ensued globally stating that the model was extremely flawed and overly simplistic. Many scientists and economists rejected the report, but nonetheless, the damaging effects and ramifications have been persistent till this very day.

Doomsday Scenario

In searching for a new enemy to unite humanity, the Club of Rome came up with the threat of global warming.

"In searching for a common enemy against whom we can unite, we came up with the idea that pollution, the threat of global warming, water shortages, famine and the like, would fit the bill. In their totality and their

interactions these phenomena do constitute a common threat which must be confronted by everyone together. But in designating these dangers as the enemy, we fall into the trap, which we have already warned readers about, namely mistaking symptoms for causes. All these dangers are caused by human intervention in natural processes, and it is only through changed attitudes and behaviour that they can be overcome. The real enemy then is humanity itself.” – Sir Alexander King (1991), Co-founder of Club of Rome, premier environmental think tank consultant to the United Nations

“Isn’t the only hope for the planet that the industrialized civilizations collapse? Isn’t it our responsibility to bring that about?” – Maurice Strong, founder of the UN Environmental Programme (UNEP)

The UN 17 Sustainable Development Goals (Agenda 21)

From the perspective of the billionaires that are ruling the earth, think of the 17 goals as “business opportunities” that they can exploit and profit from. Through “impact investing”, desired social outcomes can be created with capital. In other words, where the money gets laid down is where change will take place. All that needs to be done is to monitor the work via surveillance and direct its course of action. So, looking at the 17 SDGs, as business ventures, rather than as saving the planet, starts to make much more sense. Keep in mind that in any business model, if it’s successful, then why destroy it? Keep it in perpetuity and just manage it in a way that keeps profitable revenue flowing in continuously.

“This is probably the most difficult task we have ever given ourselves, which is to intentionally transform the economic development model, for the first time in human history. This is the first time in the history of mankind that we are setting ourselves the task of intentionally—within a defined period of time—[attempting] to change the economic development model that has been reigning for at least 150 years, since the industrial revolution.” – Christina Figueres – 2015 UN’s top climate change official

“Here we need a vast military-style campaign to marshal the strength of the global private sector. With trillions at its disposal, far beyond global GDP and with the greatest respect beyond even the governments of the world’s leaders, it offers the only real prospect of achieving fundamental economic transition.” – Prince Charles 2021

CIRCULAR ECONOMY

One of the NWO's aim is to get the global population into a circular economy and to decarbonize society. The drive to net-zero.

This literally means that you will own nothing and that everything will be shared and recycled. Including your clothes, food, water, etc.

This also means that the carbon footprint of every individual will have to be reduced to zero carbon emission. If you can't do so, then you'll need a voucher or credit to offset your carbon emission.

1 NO POVERTY

GOAL 1. NO POVERTY

“Poverty alleviation and social protection”

UN Solutions:

- AI-enabled digital footprint for credit/mobile money access

- Blockchain digital identity solutions to enable economic identities, incl. for refugees

What it really means:

- Everyone will receive UBI income along with a fixed amount of carbon credits.
- AI will analyze a person's social credit rating through his or her digital footprint (Facebook, Twitter, etc.).
- Collect information about individuals through blockchain technology to monitor and measure their background, skills, bad habits and behaviors.
- The same system is used in China, which began as Zhima Credits developed by Ant Financial to assess customer credit-worthiness. Ant Financial (formerly Alipay) is Alibaba's finance company. Alibaba is a strategic partner of the World Economic Forum and its founder Jack Ma is part of the WEF Board of Trustees).
- In a circular economy, resources will be rationed.

2 ZERO HUNGER

GOAL 2. ZERO HUNGER

"Access to food, improved nutrition and food-production security"

Solutions:

- Low-cost, low-GHG emissions synthetic proteins.

- AI, sensors and blockchain to eliminate spoilage/loss in food value chain, including smart food storage

What it really means:

- Replace even more real food with synthetic lab grown edibles.
- Produce cheap GMO food for consumption.
- Insects will become part of the daily staple for protein input.
- Use technology to monitor all processes that handle food, ideally resulting in zero waste. This includes monitoring sensors inside waste bins, storage units and refrigerators that report your consumption habits to a blockchain.

3

GOOD HEALTH AND WELL-BEING

GOAL 3. GOOD HEALTH AND WELL- BEING

"Advancing global health for all ages, and healthcare services"

Solutions:

- Smart homecare, smart wearables and virtual healthcare assistants

- Monitoring and predicting health metrics and disease, including smart implants and wearables.

What it really means:

- Get diagnosed by a tele-medicine AI doctor and have your body monitored via implanted biometric sensors.
- Corporations will assign you biometric sensors and AI fitness coaches to monitor and modify your “well-being” for productivity.
- Your medical history records will be tied to and on a blockchain via an ID Passport.

4 QUALITY EDUCATION

GOAL 4. QUALITY EDUCATION

“Inclusive access to education, quality of education and learning facilities”

Solutions:

- AI-driven assessments to enable the delivery of continuous feedback
- AI-designed digital curriculums, teaching plans and content across devices

What it really means:

- Upskilling and reskilling for a new life-long learning gig economy.
- Leave the learning to an AI machine. The AI never gets tired and will nag/nudge you until you give up or your behavior is modified.
- Education will be a remote online life-long training in STEM, and accredited with blockchain-based micro-badges and credentials.
- You'll be able to level-up in the new system based on your social reputation score.
- Never mind that kids will no longer need to study music, food production, cooking, building, crafts, repairing, mending, healing, etc. Self-sustenance will be delegated to synthetics and AI.
- A child's career path will be determined from the outset and guided by AI biometrically.

5

GENDER EQUALITY

GOAL 5. GENDER EQUALITY

“Facilitating gender equality, protecting and empowering women and girls”

Solutions:

- AI-enabled real-time gender data analytics

- AI to identify unbiased selection to support inclusivity

What it really means:

- Gender identity is ignored. Replace human intelligence with an AI to avoid incorrect judgments.
- Analyze data to identify and correct unbalanced gender representations.
- Teach women/girls to have less/no kids (for population reduction purposes) and get them out into the gig workforce working on STEM related projects.
- Teach youngsters to abandon their gender identity and take on transhuman generic sexual identity for better infusion into the gender-blind metaverse.

6

CLEAN WATER AND SANITATION

GOAL 6. CLEAN WATER AND SANITATION

"Access to and sustainable management of water, and water sanitation"

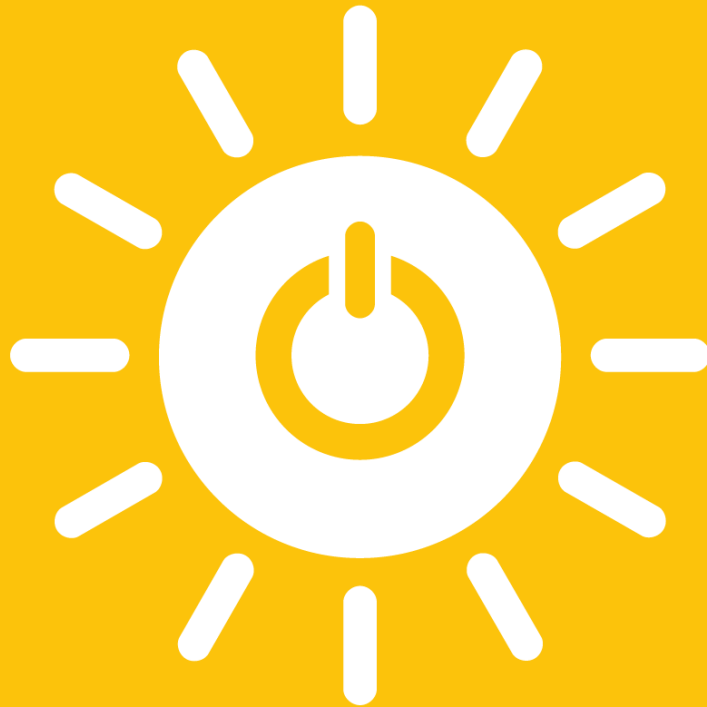

Solutions:

- AI-enhanced scenario modelling for water infrastructure risks and performance
- Smart water-infrastructure predictive maintenance

What it really means:

- Monitor all water systems and ration out according to GHG (green house gas) emissions (due to GHG/carbon footprint during production and transport of water) and carbon credit allowance.

7 AFFORDABLE AND CLEAN ENERGY

GOAL 7. AFFORDABLE AND CLEAN ENERGY

"Adopting sustainable energy, and energy-system optimization"

Solutions:

- 4IR-enabled decentralized and coordinated energy-grid

management, incl. IoT, AI

- Smart infrastructure for operational efficiency and maintenance

What it really means:

- Monitor all energy systems in homes and corporate buildings in real time.
- Replace all combustible vehicles with electric, making it illegal to have outdated gas-powered cars.
- Require older trucks to upgrade to their engines or buy electric vehicles.
- Expect to see your electricity turned off if carbon allowance max is surpassed.
- Expect to see towns, cities and states institute brownouts and blackout in order to meet regional carbon offset quotas.
- Expect less cars on the road and more scooters and bicycles instead.
- Expect to see fuel become prohibitively expensive and scarce.

8

DECENT WORK AND ECONOMIC GROWTH

GOAL 8. DECENT WORK AND ECONOMIC GROWTH

“Sustained and inclusive job creation and productivity, and improving workers’ rights”

Solutions:

- Robotics for process automation for increased productivity.
- AI-enabled digital support hubs for workers.

What it really means:

- Replace workers with robots and AI.
- Move people, hooked into their VR/AR/XR headsets, into the metaverse, where the future work domain will mostly reside.
- Use AI to guide the remaining workforce with corporate rights, rules and regulations only.
- As regions are sold off by the state to corporations and become privately owned, expect to become a "citizen" of corporations living and working under corporate rules with corporate "worker's rights".

9 INDUSTRY, INNOVATION AND INFRASTRUCTURE

GOAL 9. INDUSTRY, INFRASTRUCTURE AND INNOVATION

“Building inclusive, resilient and sustainable infrastructure and industry”

Solutions:

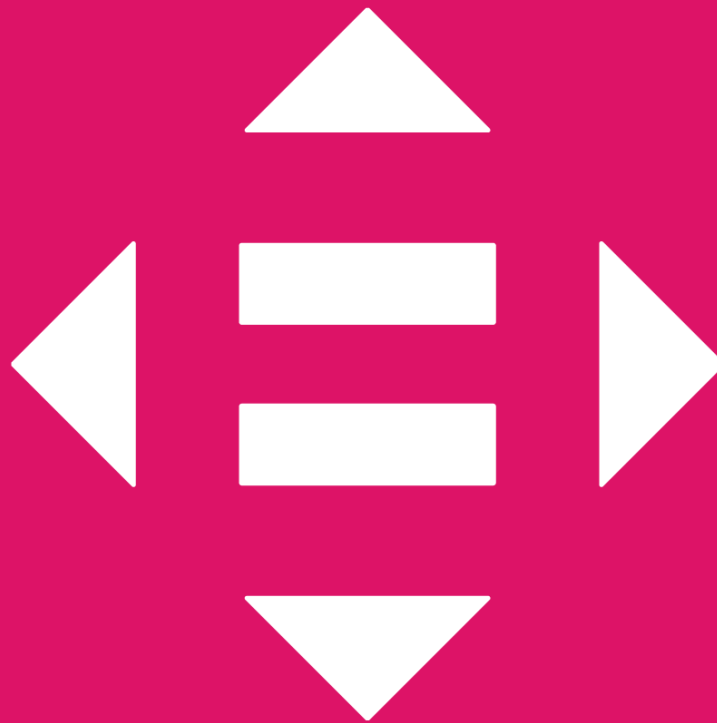

- IoT-enabled tracking and optimization of industrial machinery

- Robotics for manufacturing and construction process automation

What it really means:

- Create smart cities, industry and infrastructure fully automated for production with robots and AI, while monitoring all processes and people, and making people more and more irrelevant.

10 REDUCED INEQUALITIES

GOAL 10. REDUCED INEQUALITIES

“Facilitating equality and international collaboration”

Solutions:

- AI-enabled digital footprint for mobile money access
- Next-gen demographics data analytics

What it really means:

- Analyze data to identify and correct unwanted differences between countries and regions.
- Bring developed nations down to near poverty, while raising developing nations up to slightly above poverty.
- Using blockchain, AI and social-carbon ratings, setup short-term gig jobs in a race to the bottom economy.

11 SUSTAINABLE CITIES AND COMMUNITIES

GOAL 11. SUSTAINABLE CITIES AND COMMUNITIES

"Building smart, inclusive, safe and resilient urban systems"

Solutions:

- “Sensor-based grid and AI-based urban network management (pollution, waste, water, energy)”
- “Next-gen satellite, drone and IoT landuse detection and management”

What it really means:

- Develop Smart Cities with real-time monitoring using AI, drones and satellites using 24-hour surveillance cameras with facial recognition, biometric sensors and self-driving cars.
- Less privately owned cars on the road.
- Everything connected via wireless 5G and 6G IoT and IoB.

12 RESPONSIBLE CONSUMPTION AND PRODUCTION

GOAL 12. RESPONSIBLE CONSUMPTION AND PRODUCTION

“Supply-chain optimization and sustainable consumption patterns”

Solutions:

- “AI- and IoT-enabled consumption and production data analytics”

- “AI-optimized logistics and distribution networks to minimize costs, emissions and waste”

What it really means:

- Monitor and analyze everyone’s consumption habits in order to lower each person’s carbon footprint.
- Food and water is rationed based on carbon-allowance and social credit scores.
- More consumption of fake lab-grown meat, bugs and GMO food.
- Trash bins fitted with sensors monitoring waste and punishing those that throw away food.
- Toilet bowls monitoring and measuring contents of excrement.

13 CLIMATE ACTION

GOAL 13. CLIMATE ACTION

“Combating climate change and its impacts”

Solutions:

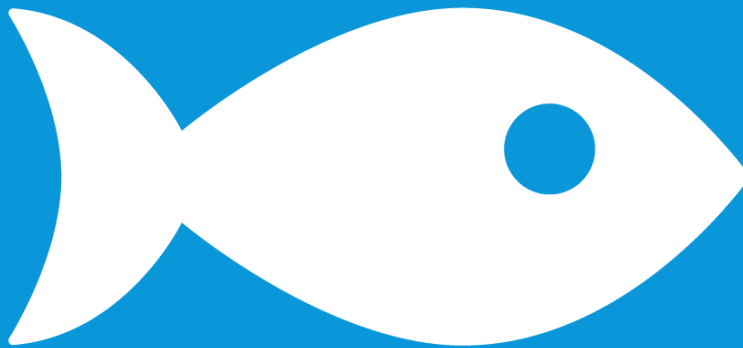

- “Earth management big data platform e.g. monitoring carbon emissions”

- “Smart and transparent land-use management”

What it really means:

- Build a global panopticon for monitoring all natural life and life processes on earth using satellites, cameras, IoT sensors and devices, robots and AI.
- “Investors” buy up all public / private property, land and homes.
- Sequester earth’s CO₂/GHG (Green House Gas) and store it for carbon-credit sales and market exchanges.
- A circular sharing economy is created
- Creating “biodiversity” by genetically modifying all life forms DNA for biodiversity resilience.
- Carbon and life-processes becomes the new global currency.
- With the manufactured threat of climate disaster looming always, almost everything will be blamed on “climate change” and thus keep draconian measures in place in perpetuity.

14 LIFE BELOW WATER

GOAL 14. LIFE BELOW WATER

“Conserving and managing the use of marine habitats and resources”

Solutions:

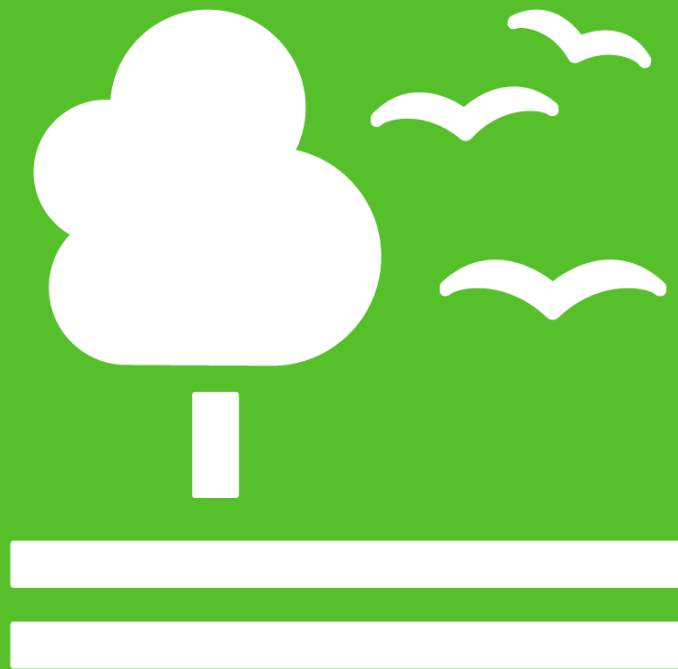

- “Habitat monitoring and analytics (e.g. monitoring pH and pollution)”

- “AI-enabled data platforms to monitor and manage fishing activity and compliance”

What it really means:

- Monitor and restrict access to the open seas, lake and rivers with sensors and satellites and penalize those found guilty of illegal activities.
- Feed the population genetically modified farm-bred and lab grown fish instead.

15 LIFE ON LAND

GOAL 15. LIFE ON LAND

“Protecting and restoring terrestrial ecosystems”

Solutions:

- “Real-time habitat and land-use mapping, monitoring and detection of illegal or adverse activities”

• “4IR-enabled wildlife tracking, monitoring, evaluation and patterns

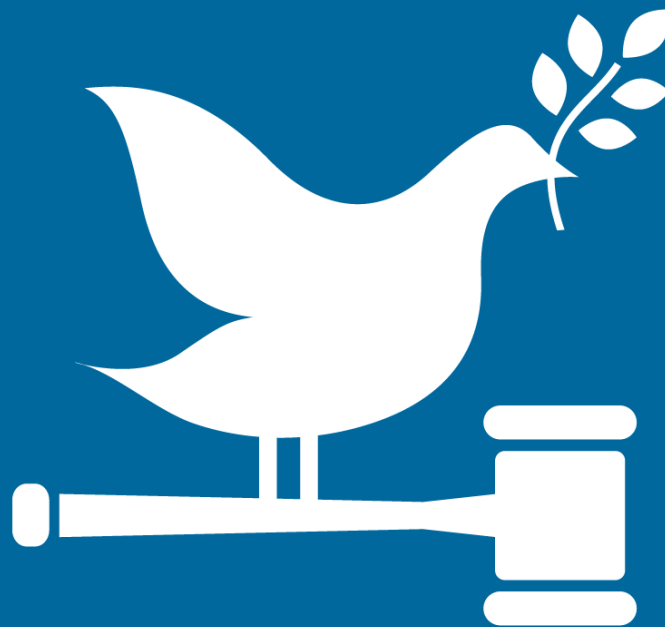

- 4IR-enabled wildlife tracking, monitoring, analytics and pattern forecasting and real-time detection, e.g. disease, animal capture”

What it really means:

- Monitor all forests and penalize those found guilty of illegal activities.
- Restrict travel of the population in natural land habitats.
- Use satellites, drones, robots, IoT sensors and AI to monitor all tokenized assets in natural forests.
- Remove humans from natural land habitats and into smart cities.

16

PEACE, JUSTICE AND STRONG INSTITUTIONS

GOAL 16. PEACE, JUSTICE AND STRONG INSTITUTIONS

"Promoting peaceful society, building effective institutions"

Solutions:

- “AI-enabled identity tax fraud identification (using browsing data, retail data and payments history)”
- “Blockchain-enabled citizen loyalty and reward platforms”

What it really means:

- Every person on the planet will have a digital ID passport in combination with various biometrics data on a blockchain.
- Social-Carbon Credits will be used to create obedience to authorities and punish unwanted behavior. If you comply, you’ll receive rewards. If you do not, you’ll be penalized, punished or cutoff from society.
- Track and trace everyone using real-time geo-location data and 5G connected cameras.
- Everyone will be subject to geo-fencing for control of movement and travel. Those that do not comply will be restricted to quarters or have all “benefits” on the blockchain turned off.
- In a tokenized society, where all of earth has been tokenized, where UBI is tokenized, cash is gone, 24/7 surveillance of activities is present, and everyone is monitored on an AI-powered blockchain, everyone will pay taxes on every transaction in real-time. There will be no exceptions (unless you’re a billionaire).

17 PARTNERSHIPS FOR THE GOALS

GOAL 17: PARTNERSHIPS FOR THE GOALS

“Building sustainable global partnerships”

This last goal is not included in WEF’s table of 4IR solutions, but both the UN and the Group of 20 (G20) are being strengthened at a rapid pace

and the 4IR solutions for each goal that was introduced before the 2019

and the 4IR solutions for each goal that was introduced before the 2019 G20 Summit are strikingly similar.

In addition, a number of technologies are listed that are in a developing phase which could potentially be used to meet the goals. Here we find, among other things:

- Genetic rescue and genome modification for endangered and extinct species and resilience (meaning GMO).
- Low-cost, low-GHG emissions synthetic proteins (AI and synthetic biology) for lab food.
- Decoding well-being and longevity using AI and sensors for personalized health maps and sequenced genomes and phenotypic data.
- Gene editing (CRISPR) to tackle “human diseases” driven by gene mutation.
- ...and much more. All tech “solutions” that can and will be used for good and bad usage (weaponized) to control humans further while enriching the controlling “investors”.

Environmental Sustainable Governance Scores

In 2021, Bank of America went through customer's accounts and reported to the FBI customers who were in DC on January 6th. BoA received a higher **ESG score** for that act. What they did was unconstitutional.

"ESG (Environmental, Social, Governance) Metrics are CRUCIAL to survival in the Built Back Better economy. Capital Investments and Business Contracts will be DENIED to any firm, company, or individual that fails to TRACK and TRACE and HIT PERFORMANCE TARGETS of ESG indicators – indicators that align with the UN Sustainable Development Goals. Large corporations know this and are rolling out all sorts of digital surveillance infrastructure and software to ensure that operations are green, governance is inclusive, and employees are resilient, happy, 21st-century global citizens. Your value as human capital is directly linked to your "commitment" to the appropriating the global goals as your personal mantra. So muster up all your grit and be happy, dammit!" – Julianne Romanello

DO. Everyday Climate Action™

Global Climate Action
United Nations Climate Change

Climate Change & Personal Carbon Credit Allowance

The UN, MasterCard and Doconomy (DO) signed a partnership agreement to bring you a CO2 monitoring credit card backed by the UN , WEF and Mastercard which promises to track your carbon footprint in real-time and cut you off once you reach your permitted carbon credit maximum.

You will be given carbon credit allowances each month and when you max out, your cash card and spending gets disabled preventing you from purchasing goods and services, unless of course you buy carbon offsets from wealthy people, that are harvesting naturally producing carbon-dioxide.

“While many of us are aware that we need to reduce our carbon footprint , advice on doing so can seem nebulous and keeping a tab is difficult. DO monitors and cuts off spending, when we hit our carbon max.” – World Economic Forum

*“The aim of Doconomy is to entrench the demonization of carbon even further. It’s to trick you into associating every purchase – literally every single one of your economic transactions – with an alleged carbon cost according to the faulty manmade climate change science. By imposing an artificial limit on how many transactions you can make, such a synthetic system would be greatly divorced from the biological reality of the carbon cycle, the necessity of carbon in all forms of life here and the life-giving nature of carbon dioxide. The Doconomy website asks: “With fat, sugar and salt levels labeled on food we buy, why shouldn’t our CO2 emissions be just as visible?” It continues: “This type of information shouldn’t be a premium or luxury that consumers pay for, but rather an essential part of every shopping journey.” They want you to swallow the entire propagandistic idea of a **carbon footprint**, feel guilty for consuming energy and services, and acquiesce to arbitrary restrictions under the delusion it will somehow help the Earth.” – Nation and State*

The Race to Net Zero and into the Transhumanist Empire

“This isn’t about ‘saving the planet.’ They’re destroying the environment through other means but not excessive carbon emissions.

This is about owning nothing in the 4th Industrial Reich and being in a perpetual state of anxiety over basic living necessities.

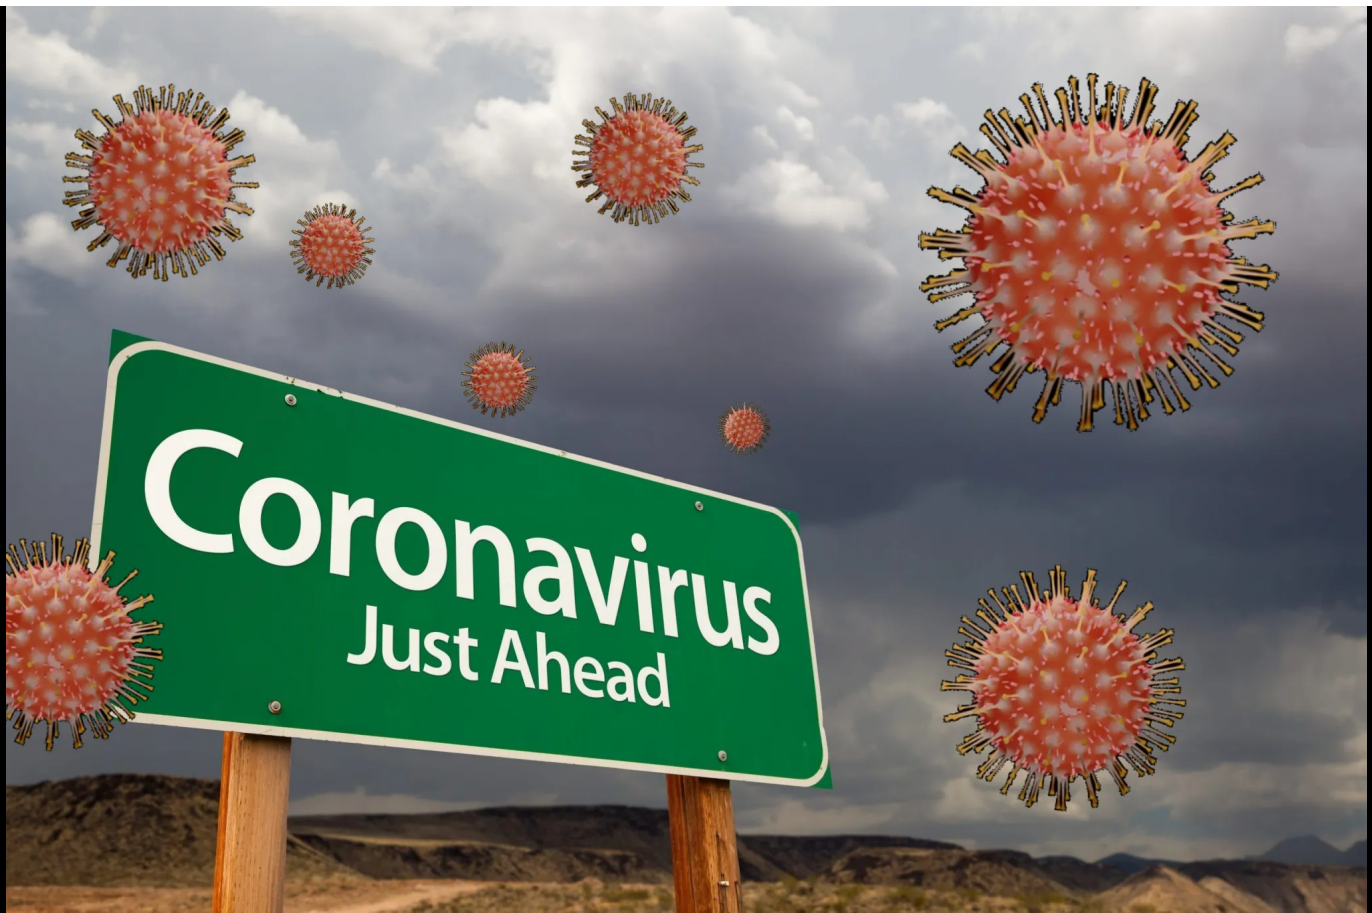

The fear of mortality and extreme discomfort can accomplish many things – as we have seen.

Incessant notifications regarding a dwindling carbon allowance during uncharacteristically cold and extraordinarily long winters will certainly manifest in depression, panic attacks, and despair. Hunger will cause violence. Stagnation and frugality will crush hope and deaden people, one dream at a time.

Who exactly is advocating for this?

Only people who will not be subject to carbon allowances and rations. The same ones making all the rules but not personally adhering to any of them. The people who will be making a ton of money selling you hot air and water. The ones that decided you're not entitled to roam the earth or enjoy its generous bounty and nourishment.

To get the public on board, the beginnings won't be as dramatic as I portray but each year belts will tighten. Gradual reductions, ostensibly unnoticeable, will incrementally have swaths of people in the west understanding what the UN means about equity (with the third world). They will bludgeon us with Doublespeak to the point where diminishing quotas, tokens and rations will be announced as gains and increases." – Cindy Niles

WHO Declares Covid-19 Pandemic

On 11 March 2020, the UN World Health Organization (WHO) declares a Covid-19 pandemic. Also referred to as the SARS-CoV-2 or the Wuhan virus, this declaration paralyzes the world with fear, and begins tight restrictions on all travel. People are told to stay home and wear to masks if they are outside. They're told to keep a distance from one another. no public gatherings allowed. Businesses are forced to shut down.

With the development of experimental vaccines, mandates are given and people must get vaccinated or not be allowed to work, travel or have access to goods and services. Tracking and tracing is to be implemented with digital passports. Globally, society is splintering between the vaccinated and the unvaccinated. It appears that the vaccinated, both

young and old, are dying from large numbers of adverse effects of the vaccines and are requiring numerous unending rounds of “booster” shots.

The Great Reset and The 4th Industrial Revolution

The **Great Reset** is the name of the 50th annual meeting of the World Economic Forum, held in June 2020. It brought together high-profile business and political leaders, convened by Prince Charles and the WEF, with the theme of rebuilding society and the economy in what proponents believe is a sustainable way following the COVID-19 pandemic.

WEF chief executive officer Klaus Schwab described three core components of the Great Reset:

1. The first involves creating conditions for a “stakeholder economy”;

2. The second component includes building in a more “resilient, equitable, and sustainable” way – based on environmental, social, and governance (ESG) metrics which would incorporate more green public infrastructure projects;
3. The third component is to “harness the innovations of the Fourth Industrial Revolution” for public good.

Klaus Schwab used the phrase “Fourth Industrial Revolution” in an article published in 2015, and in 2016 the theme of the World Economic Forum annual meeting in Davos, Switzerland, was “Mastering the Fourth Industrial Revolution”.

This fusion of technologies includes (but no limited to):

- artificial intelligence,
- blockchain and cryptocurrency/tokens
- 5G/6G communications and satellites
- robotics,
- the Internet of Things,
- cloud computing,
- autonomous vehicles,
- 3-D printing,
- materials science and graphene,
- genetic engineering,
- nanotechnology,
- biotechnology,
- energy storage,
- quantum computing,
- etc.

The technologies of the Fourth Industrial Revolution also offer expanded capabilities for waging war which are increasingly accessible to both state and non-state actors, such as drones, autonomous weapons, nanomaterials, biological and biochemical weapons, wearable devices and distributed energy sources.

On the frontier of emerging military technologies are those that interact directly with the human brain to augment or even control soldiers. Even these are not limited to government military programs. "It's not a question of if non-state actors will use some form of neuroscientific techniques or technologies, but when, and which ones they'll use," argues James Giordano, from Georgetown University Medical Center. "The brain is the next battlespace."

Emerging technologies, particularly in the biological realm, are also raising new questions about what it means to be human. The Fourth Industrial Revolution is the first where the tools of technology can become literally embedded within us and even purposefully change who we are at the level of our genetic makeup. It is completely conceivable that forms of radical human improvement will be available within a generation, innovations that risk creating entirely new forms of inequality and class conflict.

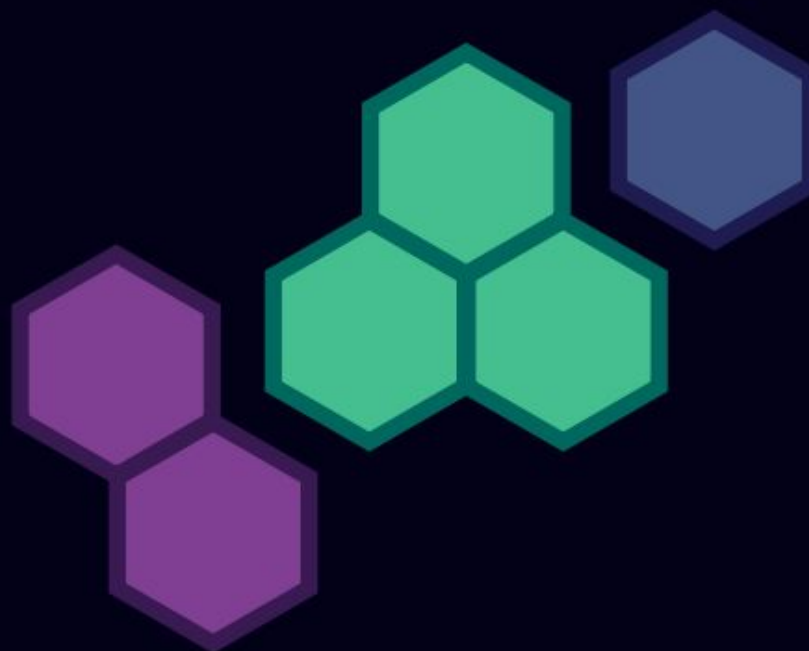

In essence, the great reset is an overhaul of the entire global financial system, creating a new economy complete with an extreme security and tracking system backed by carbon credit and the very processes of nature itself. Everything on the planet will be identified, itemized, accounted for, "decarbonized", tokenized on the blockchain and then placed on the market exchanges for buying/selling and trading. EVERYTHING! Much like a corporation has shareholders, the earth will

have stakeholders. Your home, your car, your land, etc. will be owned by hundreds, thousands of rich people. You will own nothing in the new sharing economy.

Impact Investing Handbook

An Implementation
Guide for Practitioners

Steven Godeke & Patrick Briaud

Rockefeller Impact Investing Handbook

Rockefeller Philanthropy Advisors published the 180 page *Impact Investing Handbook: An Implementation Guide for Practitioners.*

The Handbook covers:

- The **Why** – Developing a theory of social change by merging desired impact goals with investment goals.
- The **How** – Building or shifting a portfolio using the full range of impact tools and structures.
- The **So What** – Measuring success through leading principles, frameworks, and technical standards.
- The **Now What** – Crafting a realistic implementation plan by following best practices.

The important principle to understand with impact investing is that all of the “stakeholders” whom desire a particular environmental, social or governing outcome will use money as the tool to get it done. Impact investing is such a tool. Formulate the desired outcome, place money in that target, set the parameters, goals and time-tables, measure it, and then receive both your desired outcome and your profits. Recycle this process until no longer desired.

Published on January 29, 2020

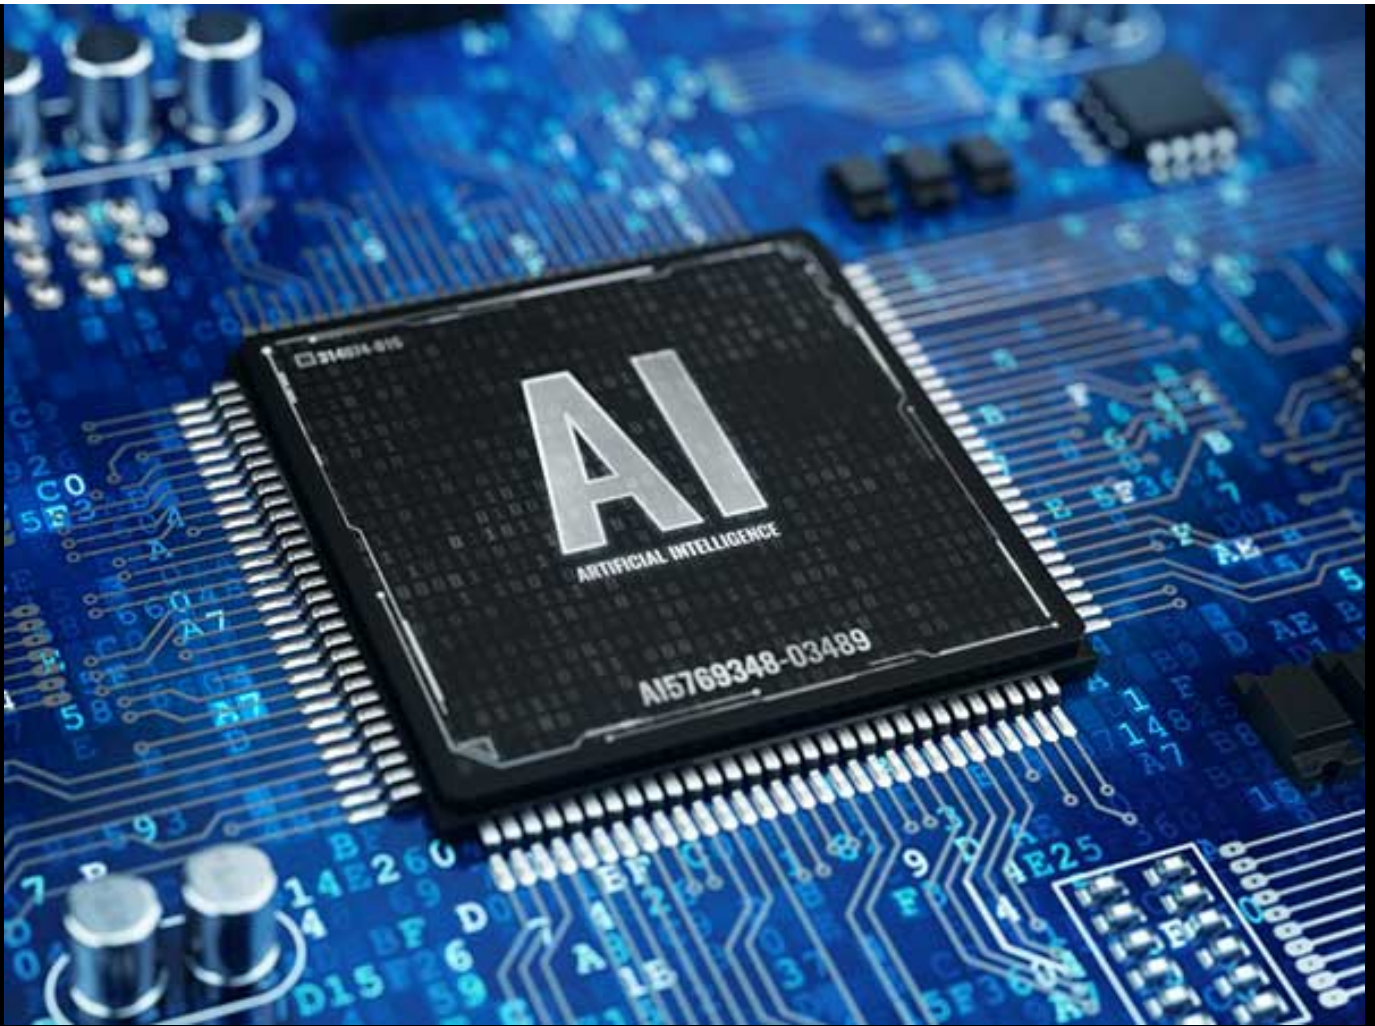

DEAR WORLD LEADERS, WE ARE WATCHING YOU

2,020 campaigners unite to issue an open letter demanding world leaders act to tackle the emergency facing people and planet.

UN Warning to World Leaders!

We are watching you!

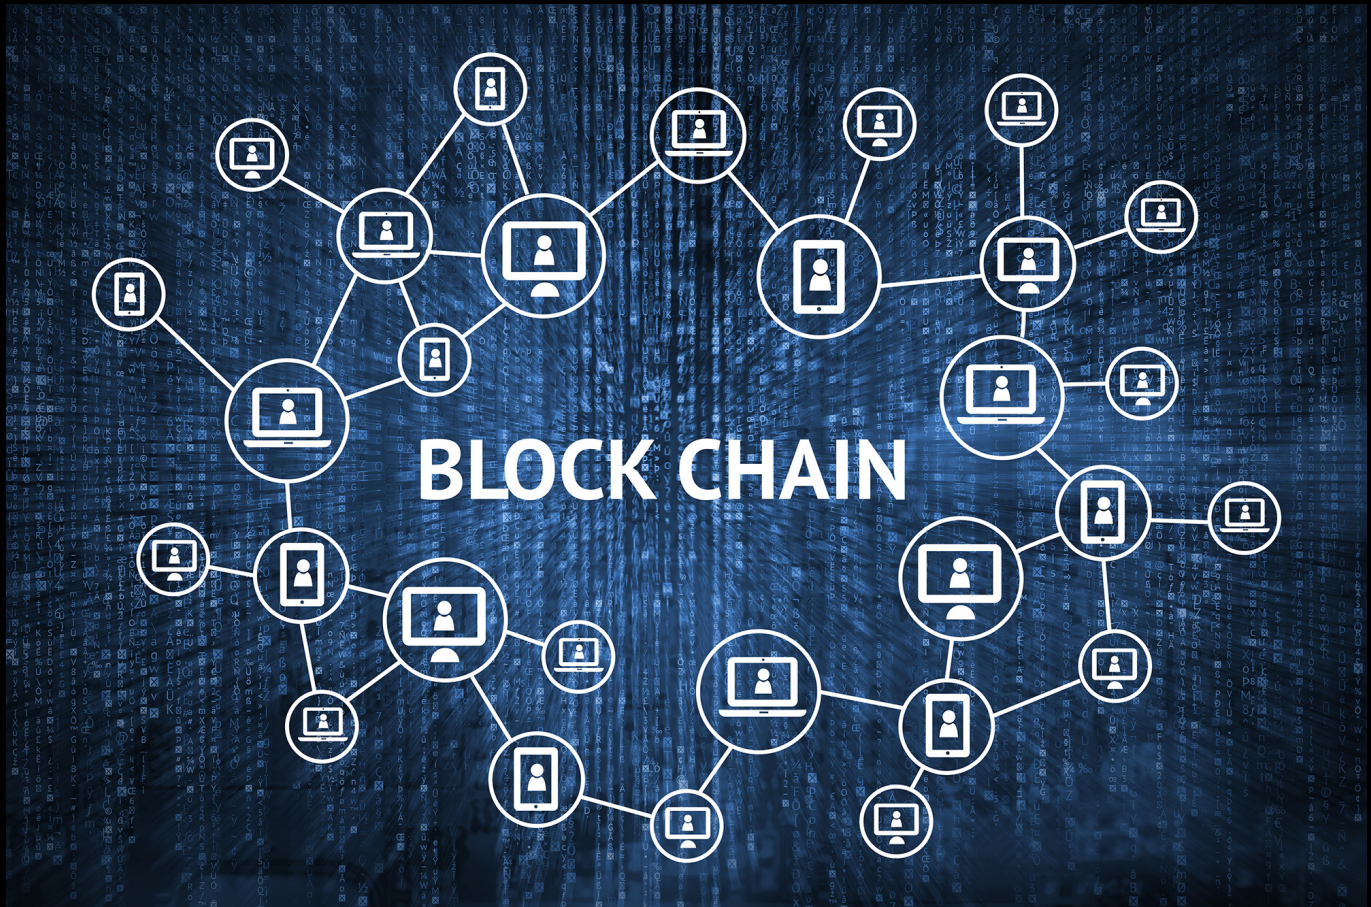

Artificial Intelligence

At the core of the 4th Industrial Revolution (4IR) is the technology of Artificial Intelligence (AI). Never before in human history has a capability of gathering and storing data in real-time, followed by computational processing to detect, identify, monitor, track, assess, predictively analyze and intervene ever exist before – on every person and thing at a global scale no less.

This capability, in the hands of the predacious ruling class stands to become a tool that can enslave all of humanity for eons to come.

AI will be used in blockchain, IoT, surveillance, cryptocurrency, bio-nanotech, etc. in order to manage and control the global economy, governments and each individual human, in real-time. No matter where the person travels, what time of day. All of your actions will be monitored and held in databanks and servers for analysis that contribute to your social credit, your carbon footprint and your spending allowance.

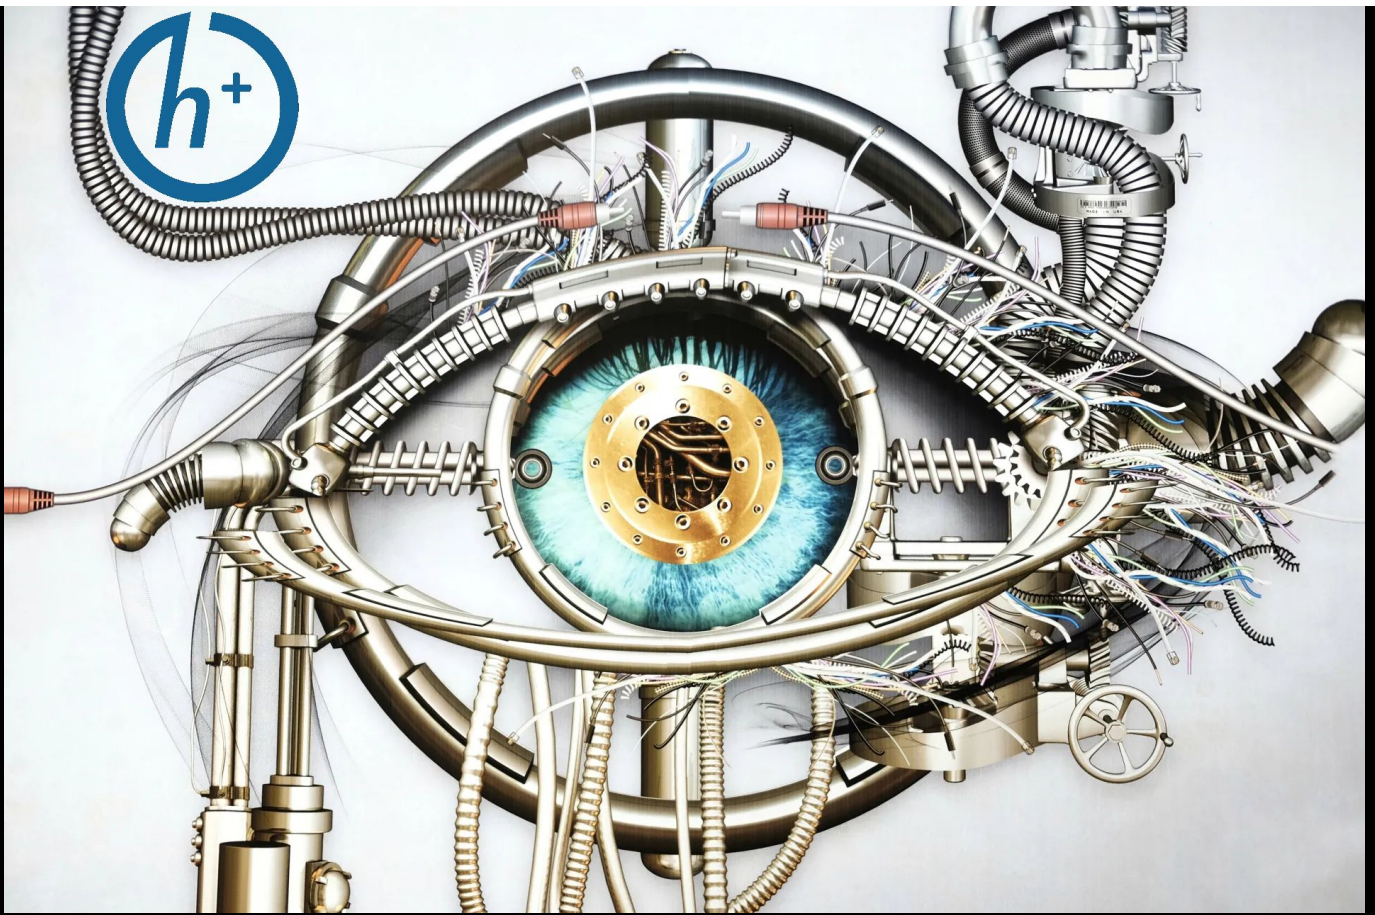

Blockchain

Blockchain is a peer-to-peer, decentralized, distributed cryptographic ledger, based on consensus, that is practically impossible to tamper with or hack.

Global Digital "ID Passport"

In July 2019, the WEF started a project to "shape the future of travel with biometric-enabled digital traveler identity management". WEF collaborates with the ID2020 alliance, which is funded by the Gates and Rockefeller foundations and runs a program to "provide digital ID with vaccines". ID2020 sees the vaccination of children as "an entry point for digital identity."

Transhumanism and the Great Convergence

Transhumanism and the great convergence is the plan to merge biology with digital technology and redefine what it means to be human.

In the coming years, biodigital technologies will be woven into our lives in the way that digital technologies are now. Biological and digital systems are converging, and will change the way we work, live, and even evolve as a species. More than a technological change, this biodigital convergence may transform the way we understand ourselves and cause us to redefine what we consider human or natural.

The goal is to get everyone hooked up as commoditized tokens for surveillance, tracking, predictive analysis and population management.

Lifelong Distance Learning

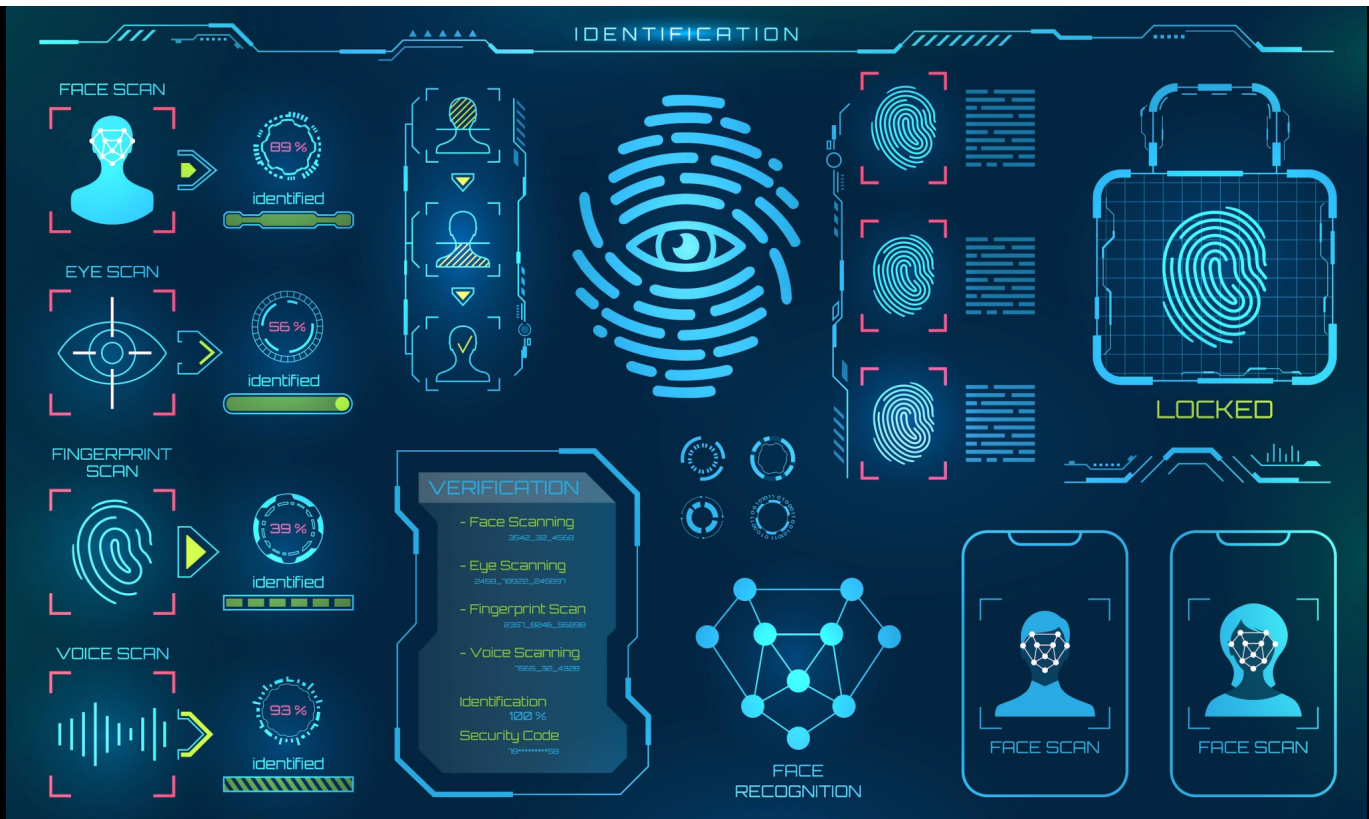

From the moment a person is conceived in the womb, they will be tracked and monitored. Like cattle, the type stock provided to investors can vary widely. It is with this notion in mind that from early childhood development, both the child and the parents will be guided through various pathways to determine where the child would fit best in society.

Hooking up children to sensors and VR headsets, will allow AI algorithms to determine the child's behavior and aptitude. Depending on the results

of these predictive algorithms, a child will be placed on “pathways” in filling roles that society needs filled.

Never mind that a child might want to become a music artist, if the AI algorithm determines that in 10 years acoustical engineers will be needed for harvesting mineral deposits under the ocean, then that is the pathway your music inclined child will be “nudged” into without their knowledge. Free will have been taken away.

This same algorithmic procedure will be implemented on adults in “life-long learning” pathway, where badges and certificates will replace diplomas and degrees. What you will effectively have is a global gig economy where everyone will be competing for low wage jobs on a level playing field. Where jobs will be commoditized, sold/bought and traded on the blockchain market and those with proper credentials, badges and certificates, combined with social credit scores will be able to compete for those small number of jobs. Where your placement on a leaderboard determines if you can get employed or not.

Surveillance Using Biometric Devices

Each person traveling and boarding on public transportation will be required to identify themselves. Entering public areas will mean being surveilled by cameras and sensors. No person will be allowed to buy or sell without identification and proof of up-to-date vaccinations. AI systems will recognize faces, voices, biometric data, iris scans, fingerprints, walking gaits, gestures, action, behavior and more. Every step and every breath you or anyone makes will literally be watched by AI and analyzed as friendly, compliant or hostile.

Tracking using DNA and Bio-Nanotech Devices

Your DNA will store the permanent ledger of your life. That's necessary infrastructure for the Social Impact Economy, which tracks "impacts" – measurable changes in a person's situation, behaviors, thoughts, etc. – in order to dole out profits to the Venture-Capital-backed changemakers. DNA is no longer a foundation for the unique constitution of each individual's life, but rather the social engineers' record of impact and their holding corporation, or asset-manager, of your life. – Professor Julianne Romanello PhD

Bitcoin, Cryptocurrency and Blockchain

Blockchain is a global database network that is near impossible to hack. The most famous of them is Bitcoin, the original blockchain.

Bitcoin is the first financial system that doesn't require you to be a human to use it. Eventually, inanimate objects, artificial intelligence scripts, self-driving vehicles and non-human intelligence alike, including avatars, will all be able to access the network by simply holding the private keys to a Bitcoin wallet.

Features:

- Decentralized
- Distributed
- Peer-to-Peer
- Proof-of-Work Consensus
- Immutable Ledger

- Smart-Contracts Layer

Some of its future applications will be to monitor and control all monetary transactions, store each person's complete health records, history of personal finances, history of travel, history of person-to-person interactions, history of internet searches, history of social interactions, history of social compliance, history of carbon footprints, and much more.

Smart contracts is a type of token whereby conditions, laws, regulations are minted or programmed into the coins. You might not be allowed to buy or sell if you don't meet some other condition or if your social credit score is too low.

Blockchain, when combined with AI and smart-contracts in a cashless society, will ensure that any DAO (distributed autonomous organization) will govern like clockwork with precision accuracy and not room for allow any gray areas or bargaining (unless coded into the contract). You'll be living in a "rewards" system that will quickly switch you off if you do not obey hard-coded protocols.

Crypto Kitties and NFTs

Non-Fungible Tokens (NFT) are universally unique cryptographic token numbers, residing on the blockchain, that will be assigned to everything physical or non-physical, digital or analog.

Every asset on the planet (including assets in the metaverse), tangible

and non-tangible will be categorized, tracked, analyzed and traded on the global commodities trading exchanges.

Everything from CO₂, to trees, to water, food, people, clothes, cars, furniture, toys, stories, art, reputation, emotions, songs, lyrics, sharables (in a circular economy), including your DNA will be tagged with an NFT! All cryptographically encoded into tokens that can then be traded, bought and sold on the global market exchanges.

In the future carbon-credit system, you can be sure that NFTs will be used to identify and monitor each and every tree worldwide with satellites, drones and robots in order to keep track of cheaters attempting to falsify sequestration of CO₂ carbon offsets.

NFTs is not just for "art collections". It's the gateway to a "you will own nothing and be happy" circular sharable stakeholder carbon-credit economy.

Central Bank Digital Currency (CBDC) – Cashless Society

The NWO plans to have a global blockchain-based Central Bank Digital Currency (CBDC), and stablecoins, that will take the place of your cash. A digital **programmable** currency that is fully trackable in real-time and can be used to monitor and adjust the behavior of individuals in society.

Your programmable money can now be cut off instantly or denied access if you do not comply with the state. Your activities will be monitored and measured for compliance. This is a reward–punishment system based on your social interactions and standing.

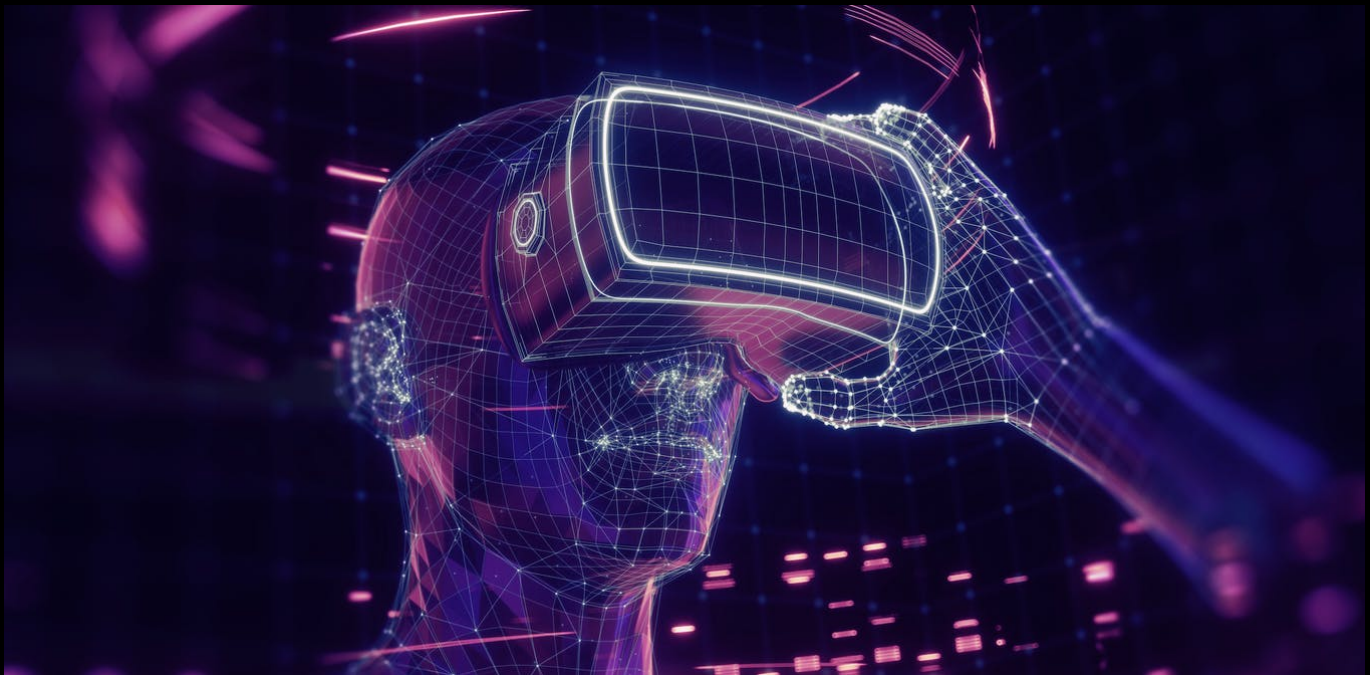

“Keep in mind that not all nations will be launching CBDCs at the same time. Those first out of the gate will manage their way through the major volatility a lot better than those who are late to the party. Though the crypto market appears to follow the bull and bear cycle of the Dow Jones it is likely it will ultimately align with the more “tech” NASDAQ. When the cycles reset, CBDCs and stable coins will be absorbing the value and liquidity from the legacy “dollar” system which will then begin to pull away and the Dow Jones and NASDAQ, along with all other stock markets around the world, will begin to be tokenized and added to the expanding pool of global liquidity.

HINT: THE YEARS 2022 and 2023.

We’re in the early stages but things are about to light up as critical market cycle points are reached. We will see NASDAQ, the dollar and cryptocurrency take the blunt from this crashing inflation. We will begin to see CBDCs slowly come into play. CBDCs are designed to bridge the liquidity between the legacy dollar system and the new digital system. LOOK for new market entries to slowly begin sometime in 2023.” – Carol Ray

In the not–to–distant future, according to patent filings, the NWO will assign tasks to a human body and then monitor that human body activity associated with that task. The user may be used in a mining process of a cryptocurrency system.

- A server may provide a task to a device of a user which is coupled to the server.
- A sensor coupled to or comprised in the device of the user may sense body activity of the user.
- Body activity data may be generated based on the sensed body activity of the user.
- The cryptocurrency system coupled to the device of the user may verify if the body activity data satisfies one or more conditions set by the cryptocurrency system.
- The cryptocurrency system will award cryptocurrency to the user whose body activity data is verified.

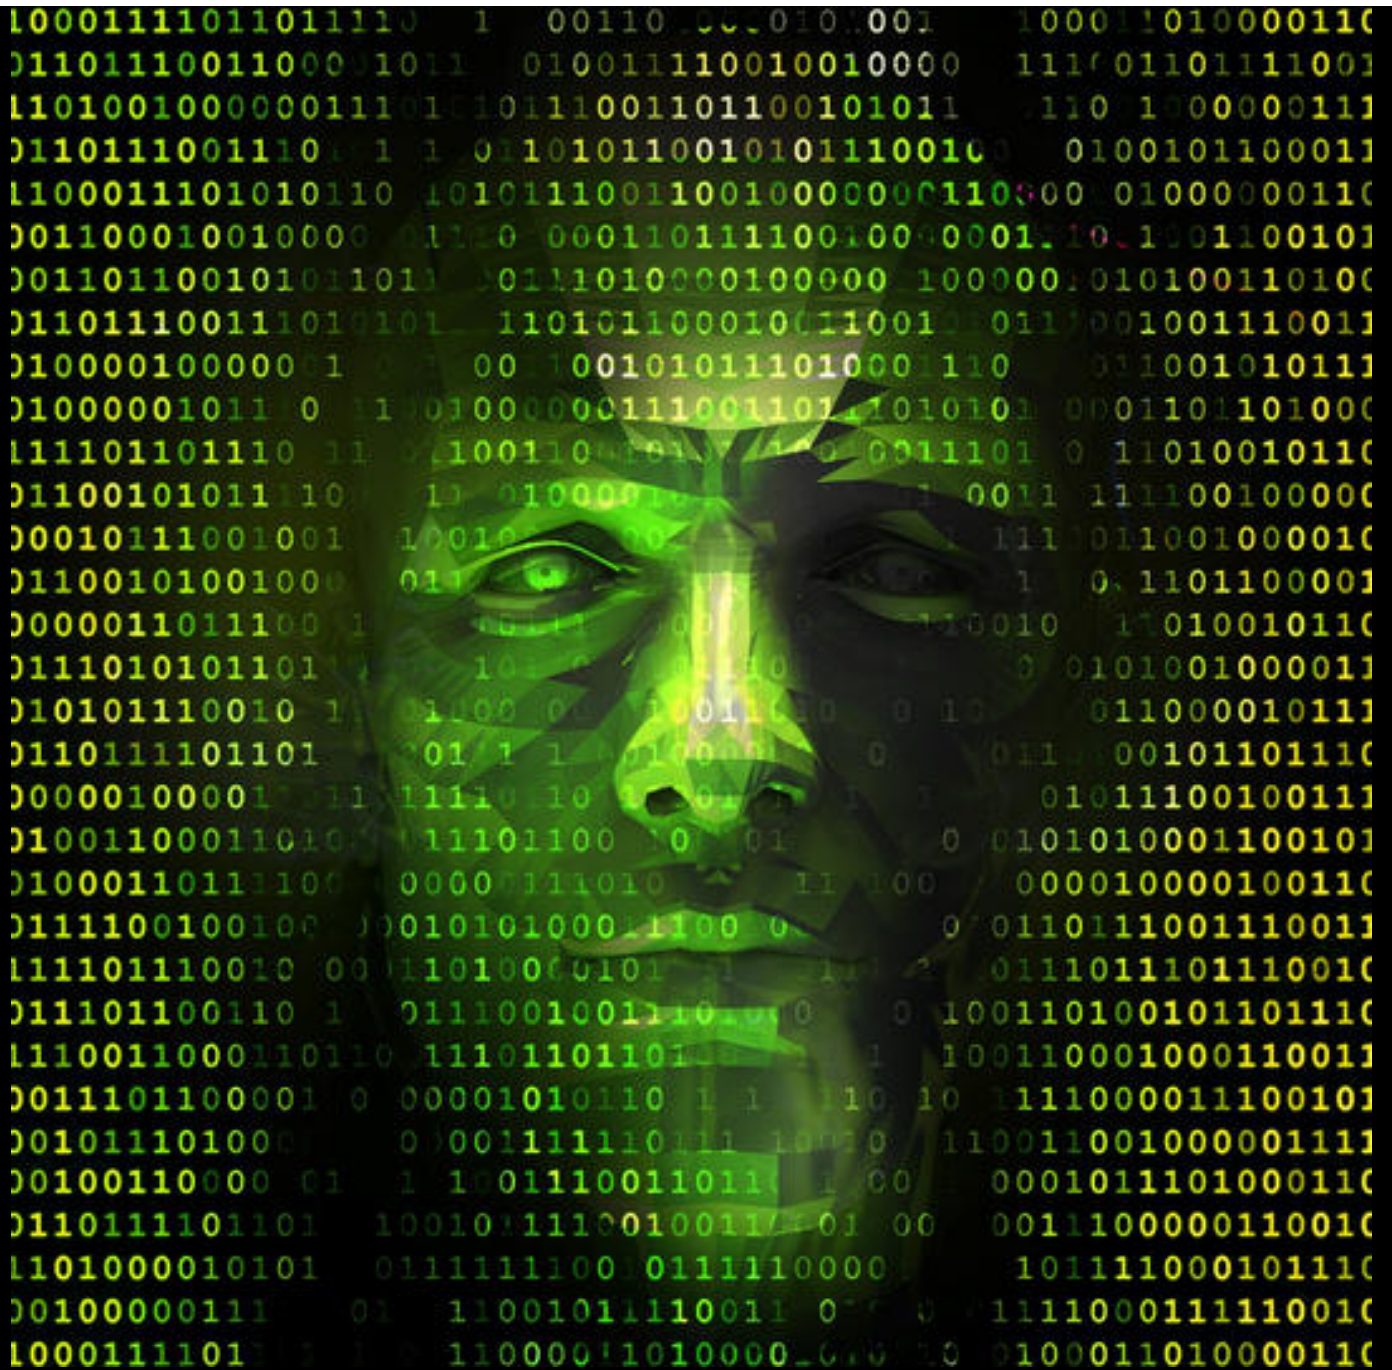

The Metaverse

With the rolling in of The Great Reset and the perpetual lockdowns and the repeated threat of new viruses, society is quickly being pushed into

the metaverse. An entirely new universe with its own economy and avatars to replace the physical reality that is being stolen from humanity.

The digital metaverse promises to blur the lines between physical reality and virtual reality. There are many aspects to this new convergence of realities. Here are a few:

1. VR – Total immersion within a virtual world using VR headsets.
2. AR – Virtual artifacts and GUI system overlaid on top of your visual view of the real world using special translucent glasses.
3. MR – Mixed reality similar to AR but one in which you can reach out with your hands and interact with GUI and floating graphics entities.
4. Simulation – Digital output creations of events based on given input conditions.
5. Bi-Directional Twin Worlds – Digital replica of the real world that is using IoT sensors in the real world, down to the nuts and bolts of machines and DNA of all of life, for analytical and predictive purposes. The actions in the real world can affect the state of the twin world, or vice-versa, the actions in the twin world can affect the state in the real world. The NWO will use this a lot for simulating and predicting or planning catastrophes, war and pandemics.
6. Bi-Directional Robot interface – From within VR and AR worlds, real robots can interact with the real world remotely, and vice-versa, including war machines.

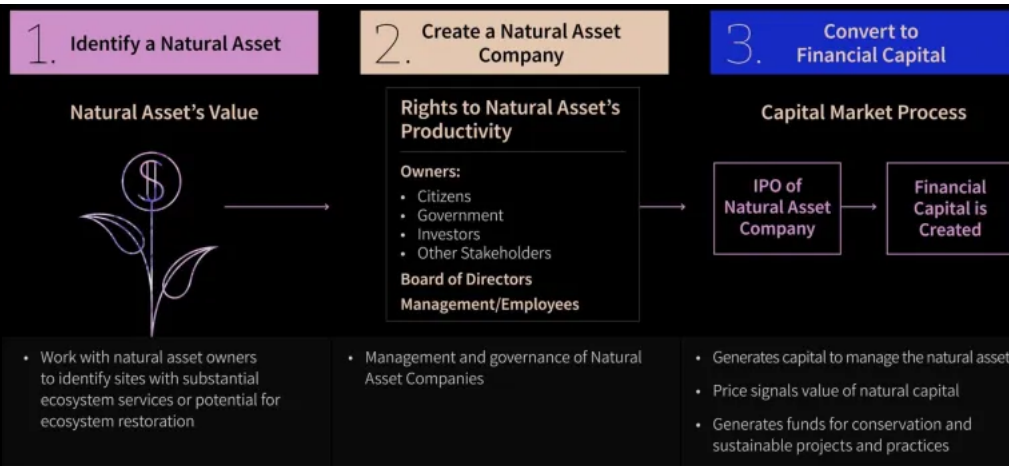

Web 3.0 “New Normal”

In the Web 3.0 everything will become decentralized and networked. This does not mean that there will still not be centralized power. It just means that decentralized networks will work INSIDE a greater centralized system.

Also, no one will be able to use any services, website or even the internet without providing global ID credentials upon login.

**Natural Asset Company
Global Tokenized Economy**

Global Tokenized Economy

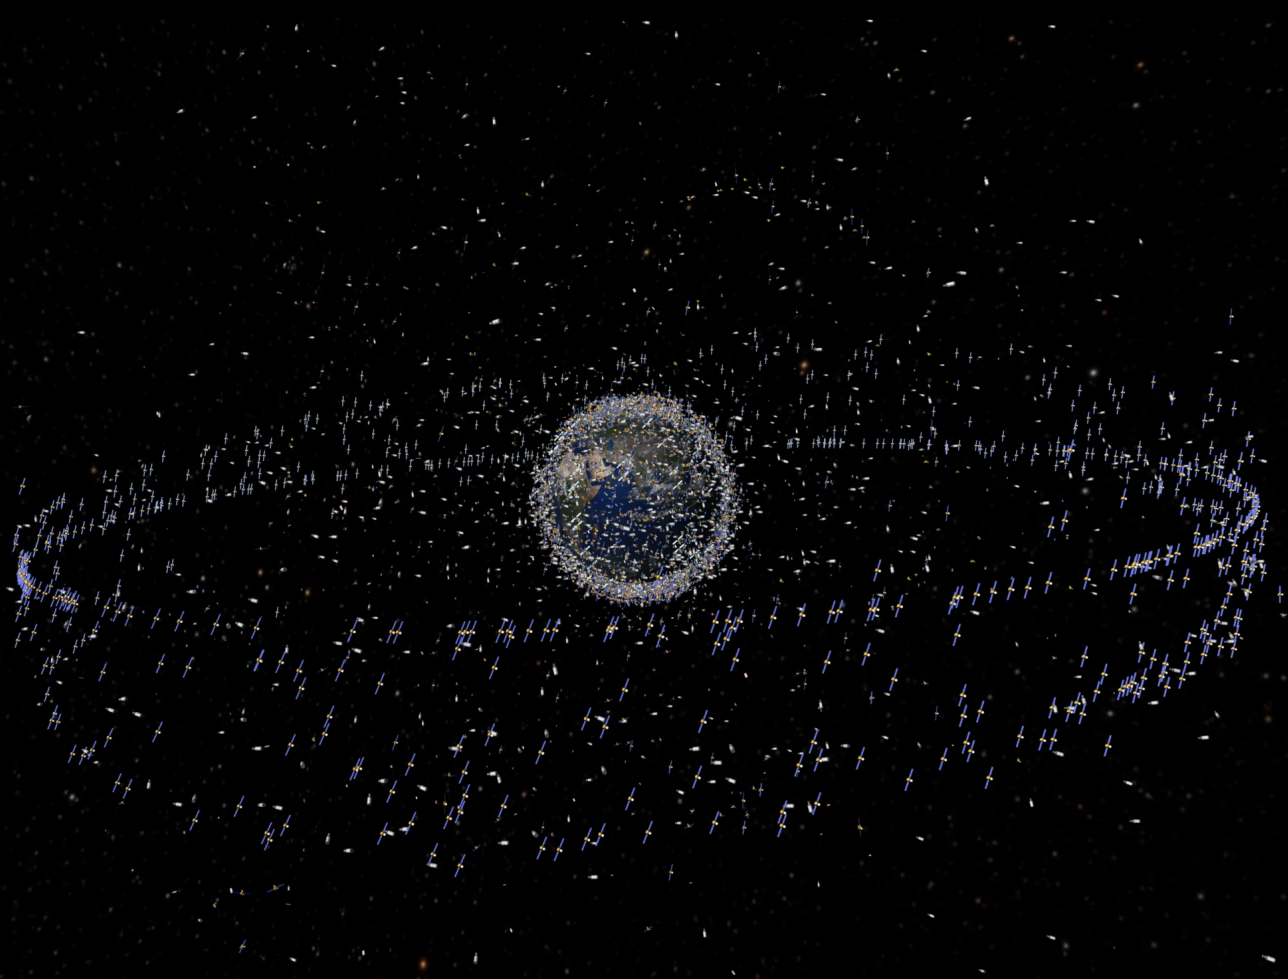

The banking system, the Rockefeller Foundation and the New York Stock Exchange recently created a new asset class, called a Natural Asset Company (NAC), that will put, not just the natural world, but the processes that underpin all of life, up for sale under the veil of "sustainability."

The creators of NACs admit that the ultimate goal is to extract near-infinite profits from the natural processes they seek to quantify and then monetize it to the tune of four quadrillion dollars (\$4,000,000,000,000,000) or 4,000-Trillion dollars!

"Indeed, while the asset classes of the current economy are value at approximately \$512 trillion, the asset classes unlocked by NACs are significantly larger at \$4,000 trillion (i.e. \$4 quadrillion). Thus, NACs open up a new feeding ground for predatory Wall Street banks and financial institutions that will allow them to not just dominate the human economy, but the entire natural world. In the world currently being constructed by these and related entities, where even freedom is being re-framed not as a right but "a service," the natural processes on which life depends are similarly being re-framed as assets, which will have owners. Those

“owners” will ultimately have the right, in this system, to dictate who gets access to clean water, to clean air, to nature itself and at what cost.

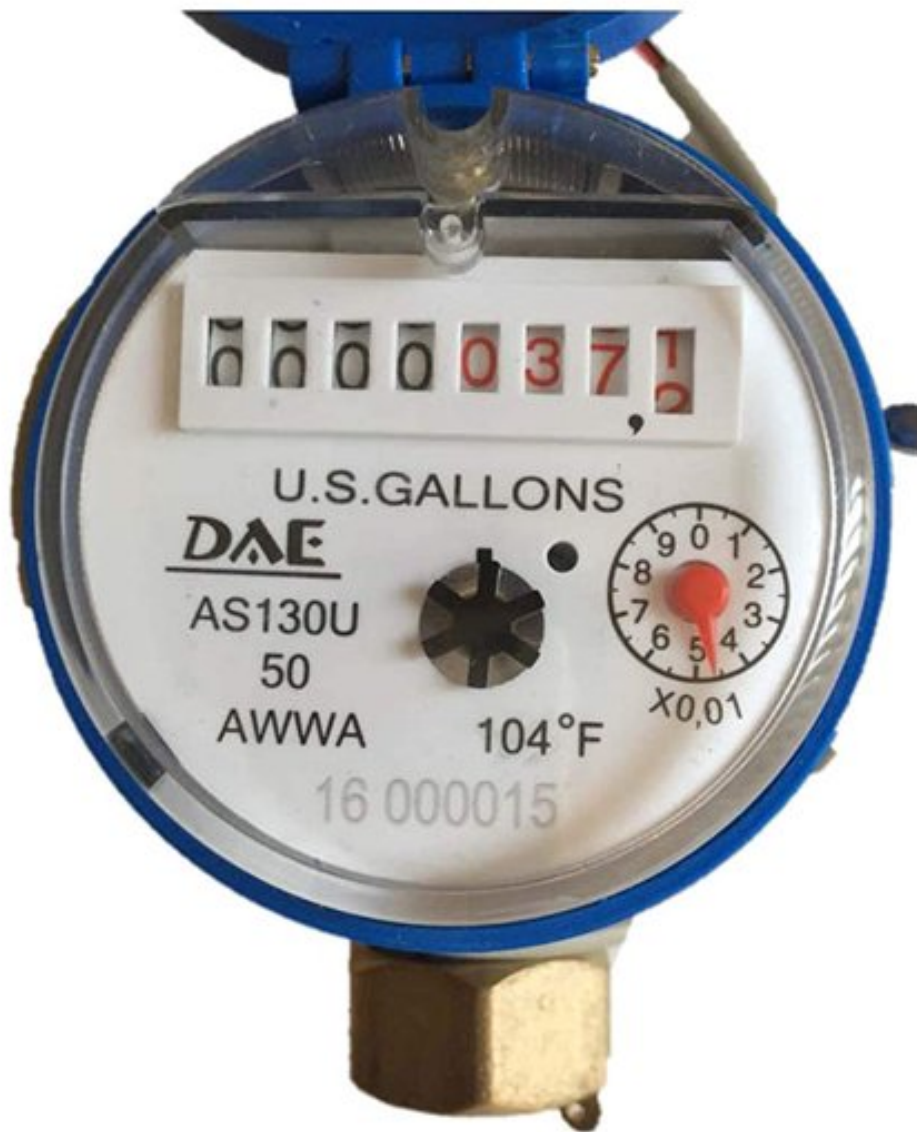

*The climate change panic that is now rising to take the place of COVID-19 panic will surely be used to savvily market NACs and similar tactics as necessary to save the planet, but – rest assured – NACs are not a move to save the planet, but a move to enable the same interests responsible for the current environmental crises to usher in a new era where their predatory exploitation reaches **new heights that were previously unimaginable.**” – Whitney Webb*

Satellites and Sequestration

Aside from using satellites for global surveillance of each person and for global security, the orbiting satellites will also be counting each and every tree on the planet, to ensure that no violations of tree counting are made during attestations for carbon-credit offsets. The ruling class do not want cheaters pretending to own trees or cutting down trees that have not been paid for in carbon credits. Each tree will be given a unique NFT signature and then these tree tokens will be placed on a blockchain exchange for trading.

Water Scarcity Management

Along with food, fresh drinking water will be managed and rationed across the globe. Everyone will have an allowance of carbon credits that will allow them to receive water. Once that carbon credit allotment is

extinguished, you'll have to either pay for more credits, do community services or go with no water (and/or food).

Water will be measured and monitored in business, government offices and homes using smart meters. Water is about to be traded on the stock exchanges as a commodity, and with that, scarcity is always the name of the game in gaining profits. So expect water scarcity.

Anticipatory Governance (Predictive Programming)

Anticipatory governance, or anticipatory profiling, also known as “disaster risk management” and “predictive analytics”, is a method used by institutions such as think-tanks, government agencies and

corporations using feedback from the public, news outlets, social media, motion-picture reviews, game industry, simulations, books and comics or even LARPs.

(LARPs are “live action” role-playing games or simulations, a form of role-playing game where the participants physically portray their characters in the real world. The players pursue goals within a fictional setting represented by real world environments while interacting with each other in character. The outcome of player actions may be mediated by game rules in staged events, such as in false-flag ops.)

Anticipatory governance is the practice used by the state to collect information and data about its citizens in order to assess events or behaviors in a predictable manner based on the knowledge gathered. Anticipatory governance is also a method of decision making that uses predictive measures to anticipate possible outcomes to then make decisions based on the data provided. Anticipatory governance is a system of governing that is made up of processes and institutions that rely on foresight and predictions to decrease risk and develop efficient methods to address events in their early conception or prevent them altogether. Anticipatory governance is a concept that has been derived from terms of similar meaning, like forward engagement and forward deployment, which was a primary focus for decisions made by the North Atlantic Treaty Organization (NATO).

Monsters
on the Loose!

WHAT IS PREDICTIVE PROGRAMMING?

So, when you see a movie presenting future scenarios and events, keep in mind, it may be that your feedback is exactly what is desired so that the administrators of the scenario can fine-tune and address any unanticipated or unexpected outcomes before deploying policies.

Space Force and Space Colonization

Via public and private partnerships, satellites and rockets are launched. Space is to be colonized and mined for precious minerals in what amounts to be thousands of trillions of dollars. In order to monitor all activity both on earth and space, the NWO has created Space Force, a

newly created branch of the U.S. Air Force, whose mission is to keep a watchful eye on both the assets in space and on earth.

The NWO plan is to extract as much resources from meteors, asteroids, moons, planets in the solar system. This will require setting up bases on many of the bodies.

Global Surveillance

Global mass surveillance can be defined as the mass surveillance of entire populations across national borders. Its existence was not widely acknowledged by governments and the mainstream media until the global surveillance disclosures by Edward Snowden triggered a debate about the right to privacy in the Digital Age.

In order to exact global surveillance, a global crisis would have to emerge, that would warrant the need for such massive surveillance. That crisis is

Covid-19 and Climate Change. The perfect catalyst for consent to having a global police state.

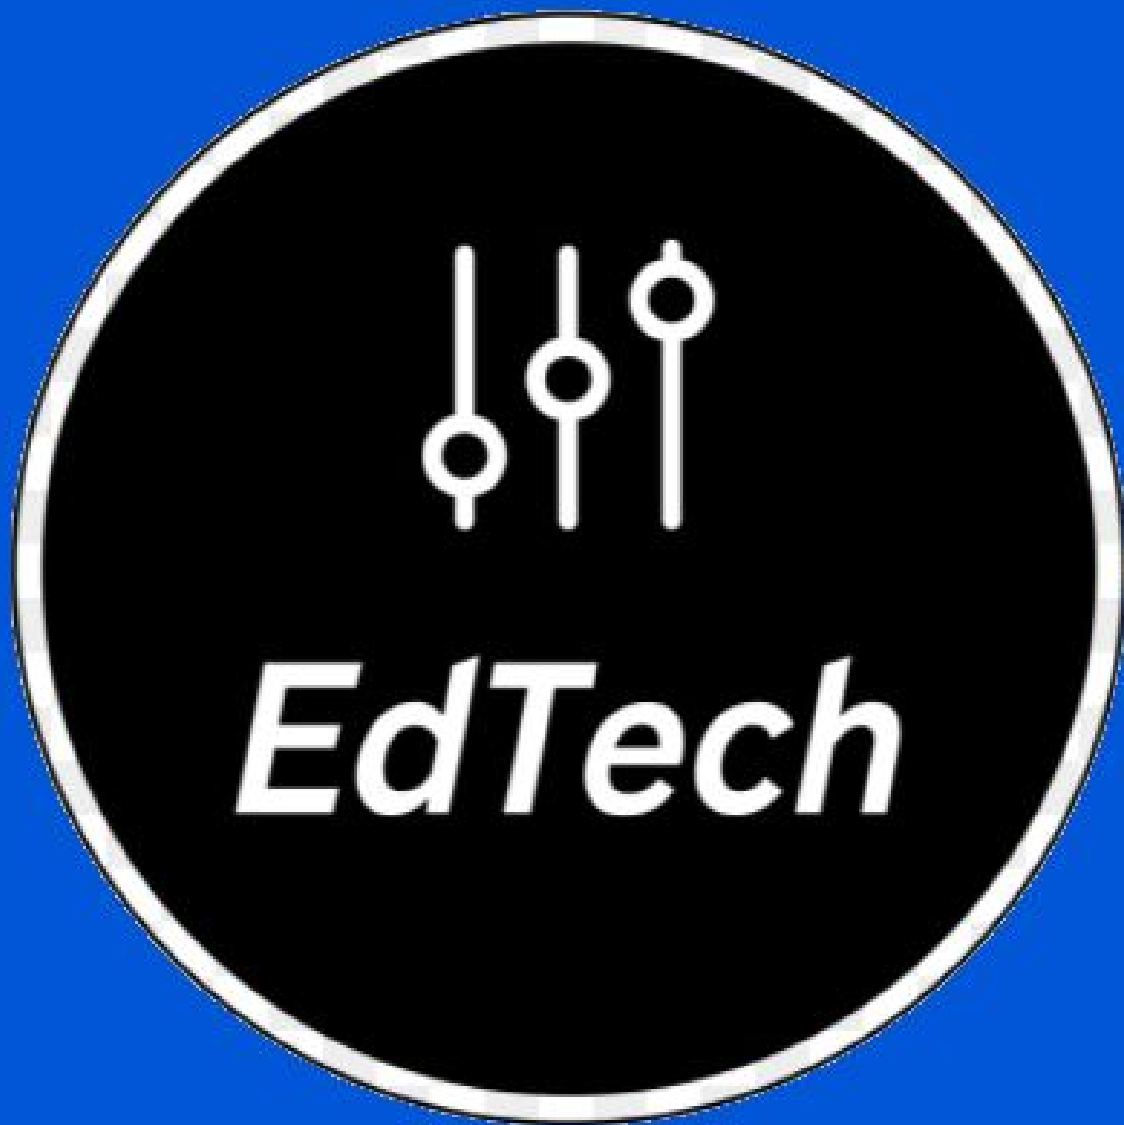

Graphene – The Wonder Material

Graphene is a single layer of carbon atoms and is perhaps the most versatile substance known to mankind. In simple terms, Graphene is a

one-atom-thick layer of carbon atoms arranged in a hexagonal lattice. Graphene has found hundreds of applications, from sensors and electronics to energy storage and healthcare.

The most dangerous of these applications is in materials that may one day read the mind and record patterns and thoughts back into the mind. This would be the ultimate brainwashing and mind control mechanism for any totalitarian regime. No thoughts would be private and all thoughts would be recorded and added to your social credit score.

“A newly developed graphene-based implant can record electrical activity in the brain at extremely low frequencies and over large areas, unlocking the wealth of information found below 0.1 Hz. The body of knowledge about the human brain keeps growing, but many questions remain unanswered. Researchers have been using electrode arrays to record the brain’s electrical activity for decades, mapping activity in different brain regions to understand what it looks like when everything is working, and what is happening when it is not. Until now, however, these arrays have only been able to detect activity over a certain frequency threshold. A new technology developed by the Graphene Flagship overcomes this technical limitation, unlocking the wealth of information found below 0.1 Hz, while paving the way for future brain-computer interfaces.” – Graphene Flagship

EdTech, Badges, Data Harvesting

It's through the educational system, starting from pre-K through university, that children are indoctrinated. Children are taught to be obedient serfs, and placed on pathways set by the state.

The curriculum consist mainly of science, technology, engineering and math. Civics, economics, art, music, crafts, shop, cooking, gardening and even gym and playtime have been eliminated. No longer do they teach

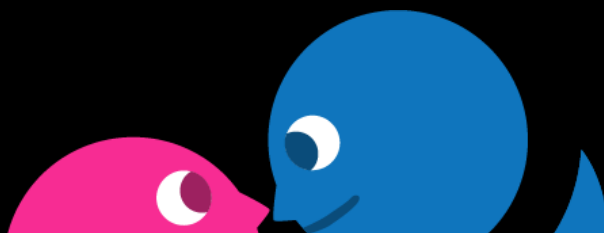

important cursive writing which helps in mental development and hand-eye coordination. Everything is now done on computer screens.

The education system now requires that children be monitored by cameras, computer surveillance, metric based multiple choice testing, VR headsets, brainwave/mood monitoring sensors, CO2 emission monitors, and more, all connected by 5G wifi in classrooms. The data that is harnessed from children is sold to institutions that find interest in it, including the military.

From the time a child is in pre-school, the computer AI is assessing the child's behavior and aptitude. With this information, the AI is deciding, early in a child's life, if the child is best suited for a career as a soldier, an engineer, or a janitor. Depending on the assessments, it will chart a pathway for that particular child via badges and nudging. For the remainder of their lives, in a life-long education program, the children will receive badges and be nudged into different pathways and also for behavioral adjustments using rewards and punishments.

Upon adulthood, after graduating from school, the child will live in a gig economy, steeped in debt. In this new future, the most sought after skill is STEM based. Most likely, the child, later in life, will be training AI, and creating software that will further create their own prison panopticon.

Another thing to keep in mind is that universities are R&D facilities for the military and the NWO.

DNA

Romance

Modern Eugenics

Dating sites are using “science-driven dating apps that uses your DNA to discover chemistry and inspire relationship”. What these sites are really doing is a subtle soft-form of eugenics, by ensuring that people of certain genetic traits find each other and not others.

In addition, each time you give a “yes”/“no” or swipe left/right to individuals, you are teaching the AI algorithms what type people are desirable and which are not. Those excluded will not appear in searches and in effect, slowly be excluded from the gene pool.

We also have technology where couples and soon have designer babies. Soon, couples, will be able to pick babies hair color, eyes, skin, mental acuity, strength, etc. In essence, eugenics-as-a-service.

With CRISPR technology, bio-nano-tech, AI, blockchain, etc. we will soon see the human race splinter into many races, creating a caste system of various species types.

Trauma Based Capitalism

"Westerners, especially Americans, are traumatized, en masse. They are traumatized repeatedly, every day, and traumatized badly – just by the hard work of surviving another day. And the forces traumatizing them, weirdly, are their institutions, their norms, and their expectations. America is, in other words, the world's first institutionally traumatized country with life made of fear, worry, discomfort, despair, and grief, like nowhere else in the world, except maybe other failing states.

People face a psychological trilemma between every human being's (even every living being's) three deepest primal fears – being abandoned, being annihilated, and being overwhelmed. Their institutions make them choose

between these three fears, over and over again – but they can never not choose a life free of any of those fears. And anyone that has to face that day after day, night after night, will end up badly traumatized, unable to cope, needing to self-medicate, and barely functional (and that's if they're strong).

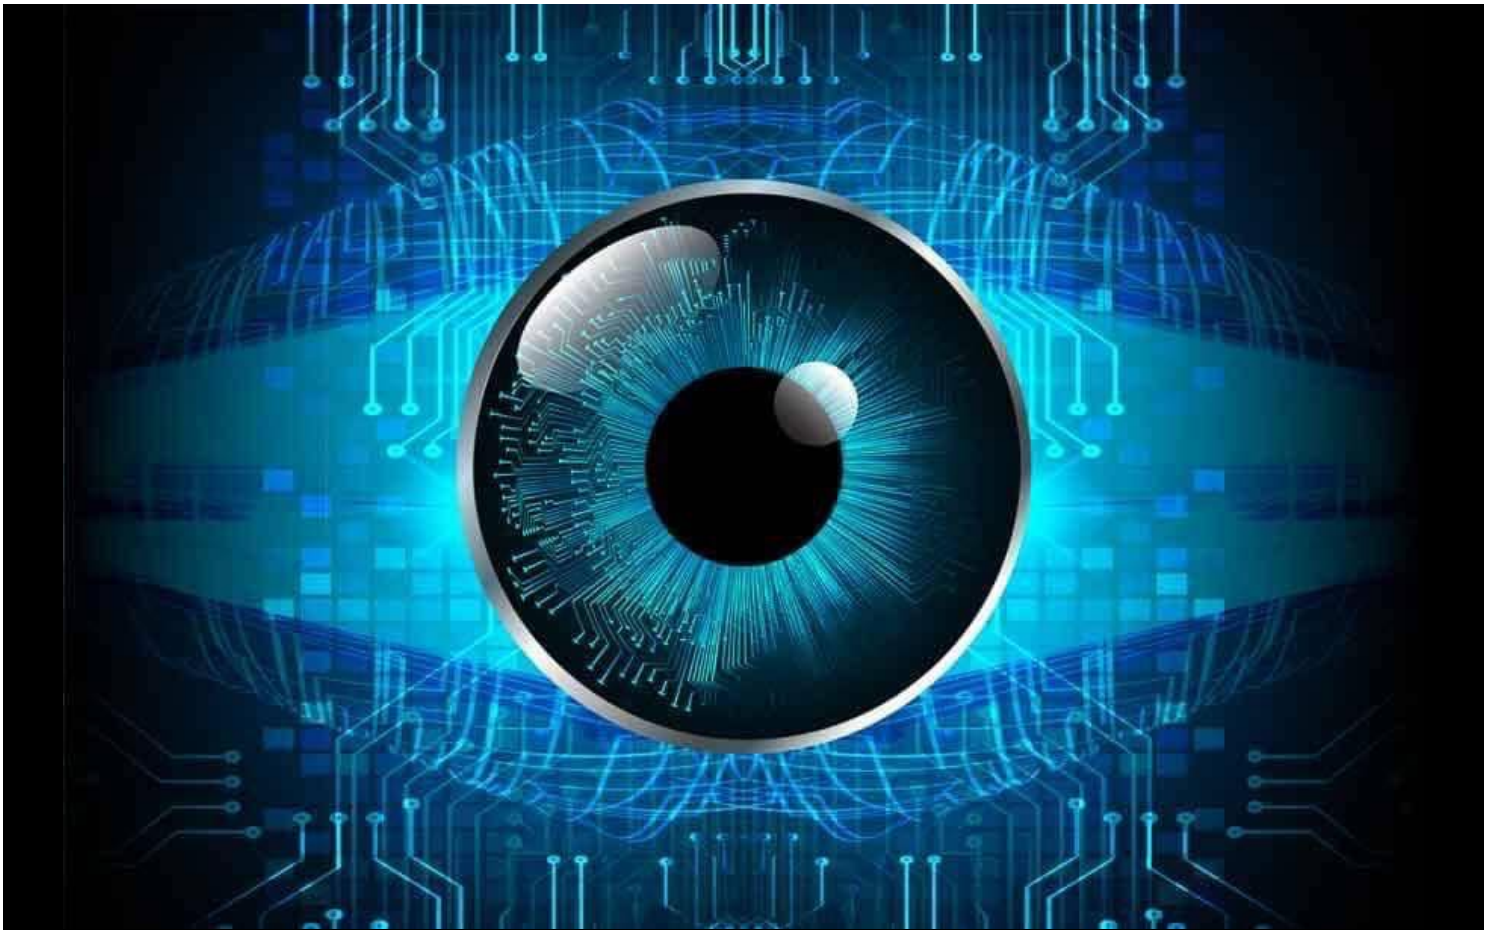

With the price of basics goods and services skyrockets every year – healthcare, education, decent food, and so on – incomes don't ever rise. The people are kept artificially poor in a rich country, artificially broke in a wealthy country, and artificially powerless in a powerful nation.

Trauma is also an example of capitalism turning predatory, going extreme – people being kept poor, denied basic things, whether healthcare, education, money, safety, or inherent worth, just so that profits can keep growing.

Capitalism has made America a country of institutionalized trauma

America's a place pulsing, throbbing, aching with trauma. With the visceral, omnipresent anguish and torment of the three greatest fears human beings can have – re-enacted, day after day, institutionally, at school, work, university, play." – Umair

The Ultimate Conquest

Interplanetary Panopticon

The **panopticon** is a type of institution and system of control where people are kept under inspection, whether it is a hospital, a school, public housing, a factory or a mental health institution. The concept of the design is to allow all members of an institution to be observed by a single watchful eye, without the people being able to tell whether they are being watched. Although it is physically impossible for a single person to observe all the members of society at once, with AI and automated sensors, in theory everyone could be watched simultaneously. The fact that people cannot know when they are being watched means that they are motivated to act as though they are being watched at all times. Thus, people are effectively compelled to regulate their own behavior or lose standing in social-carbon credits.

Harvesting The Most Valuable Resource in the Universe – The Mind

Perhaps the most valuable asset in the universe, to the NWO predatory class, is the mind, especially that of a child.

Imagine if the predators no longer had to spend money on advertisements, or send people to school, or convince people to go to war? Imagine if all they had to do was upload their mandates and desires into your mind instantly? Imagine if they could both read and write to your mind? What powers would they wield?

For thousands of years the predator class has studied and administered psychological and social reforms upon the populace in order to get the population to move in uniformity according to their will. If they could

instead get inside your mind, quickly, and read/write from and to your mind, then this would give them absolute control over the human race.

One of the most heavily invested sciences today is neuroscience along with neurotechnology. The pace for creating Brain-to-Machine-Interface (BMI) is quickly picking up and many successes have been accomplished. Most notably is the capability to read and induce emotions, using AI to read/study the brain's electromagnetic wave patterns and then induce them back into the same person.

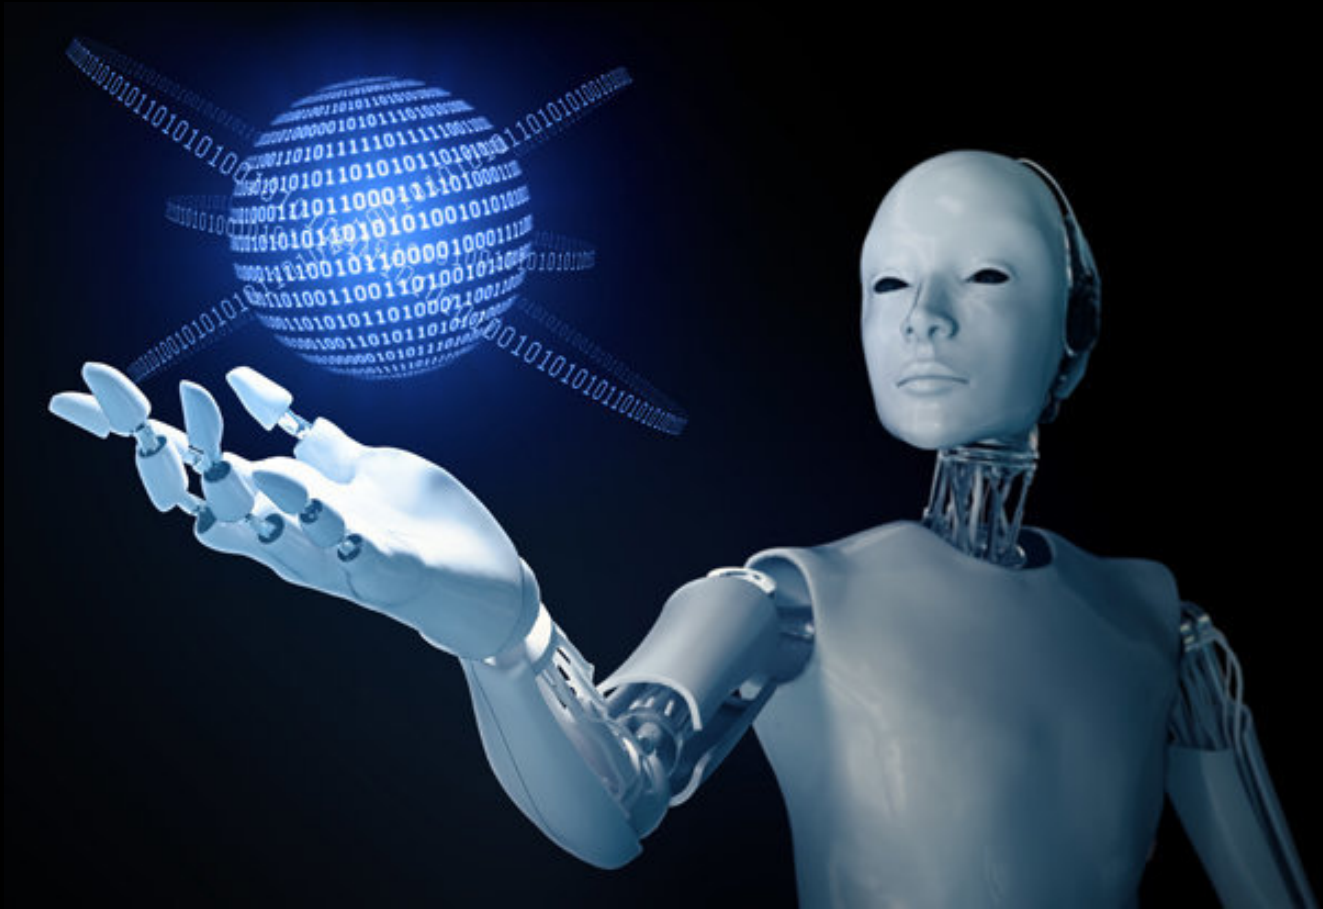

There is a great push to extract and collect data, context, experiences, and knowledge. With the aide of AI and blockchain, they may actually get to learn most of the rudimentary emotions, behaviors and words formulated in the mind from these brainwave patterns. These are mostly "feelings".

As of yet, to the best of my knowledge, they have not been able to capture and recognize complex individual thoughts, but this is not from a lack of trying.

One of the biggest targets for mind control, extraction, insertion and modification is with children. The mind of a child is fertile territory, without preconceived biases or limitations. Also, the mind of a child is very malleable, which means they are very easy to brainwash and train. So expect that more and more kids will be expected to wear brainwave monitoring devices in school (for social behavior) and on their VR headsets when playing video games.

Protect your child's mind!!!

Also, until they can solve the problem of quantum cloning, the chances of understanding “consciousness” and then creating it seems ZILCH, NADA, ZERO, NEVER HAPPENING. But it does not mean they cannot create a Turing machine that appears like it is human, very closely resembling a human. But keep in mind, it still would be rule-based and not a free-will entity with agency.

The Singularity

One of the biggest fears for the ruling class members is that AI could one day exponentially grow in intelligence and perhaps even gain “consciousness” and then exponentially take off, leaving the ruling class behind in the dust. Or, perhaps, take away their powers.

Thus, the ruling class seek to prevent this by aligning with transhumanist that have a vision of immortality by way of auto-evolution, or directing their own human evolution according to their vision. The moment that artificial general intelligence surpasses that of human intelligence, will signify the point of the AI-singularity.

In the meantime, even if a true singularity is never reached there is still a rudimentary "singularity" that is today operational, called SingularityNET.

SingularityNET uses blockchain, cryptocurrency and AI in a way that allows small specialized "vertical" AI, that performs singular tasks, to communicate with other "vertical" AI, that then pay each other with cryptocurrency.

These vertical AIs are created by independent software developers around the world. The developers can be anyone, including young people, who then register their AI code to be made available to the SingularityNET and through there, to any entity or organization willing to use it in exchange for a payment in cryptocurrency.

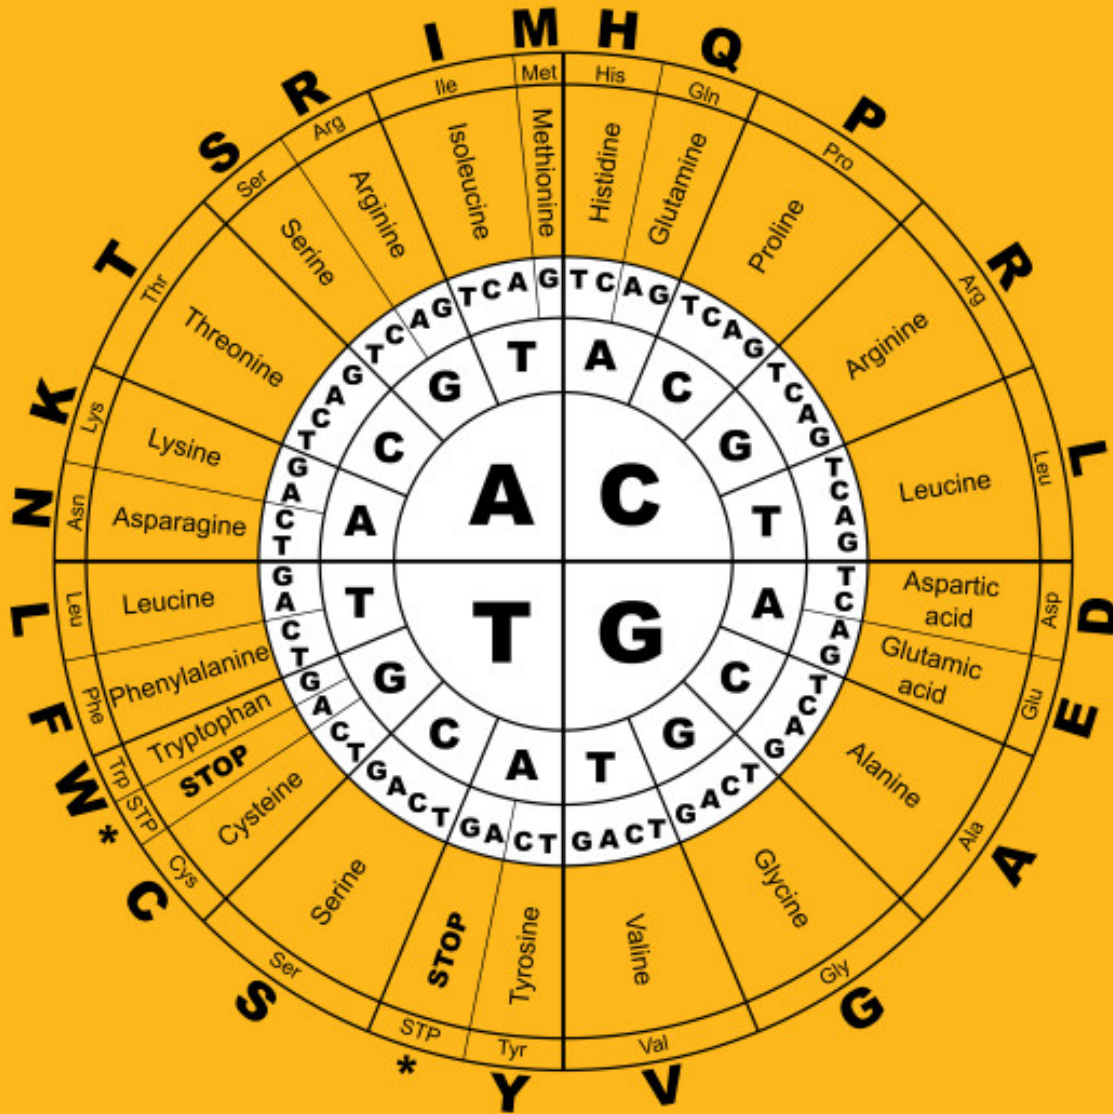

So, for example, say that a customer walks into a large retail store, but must first be scanned for ID and "health status". Immediately (behind the scenes) the store's biometrics scanning system sends a request to the SingularityNET computer. The SingularityNET system realizes that a facial recognition request is being made. It will search in its database for a vertical AI that can perform that task. If there are more tasks that need to be performed, then the SingularityNET computer might recruit and employ another vertical AI. In some cases, if a vertical AI task cannot be completed or needs help, the AI might call for help from another AI and upon using it they will pay each other (AI-to-AI). When all operations are

complete, the store's AI will pay the SingularityNET AI crypto. The SingularityNET also will pay the facial recognition app developer his share of crypto for the services done by his app.

This process of storing hundreds or even thousands of specialized vertical AI's will make the SingularityNET computer look like a super human computer, able to perform just about any feat in blazing speed. But it has no conscious. It's just a fast powerful calculator.

With cameras and sensors everywhere, the AI singularity will always be watching you and intervening as a "friendly advisor" if you are not following protocols.

And yes, this exist already today. SingularityNET.io

Cracking the Code of Life and the Universe

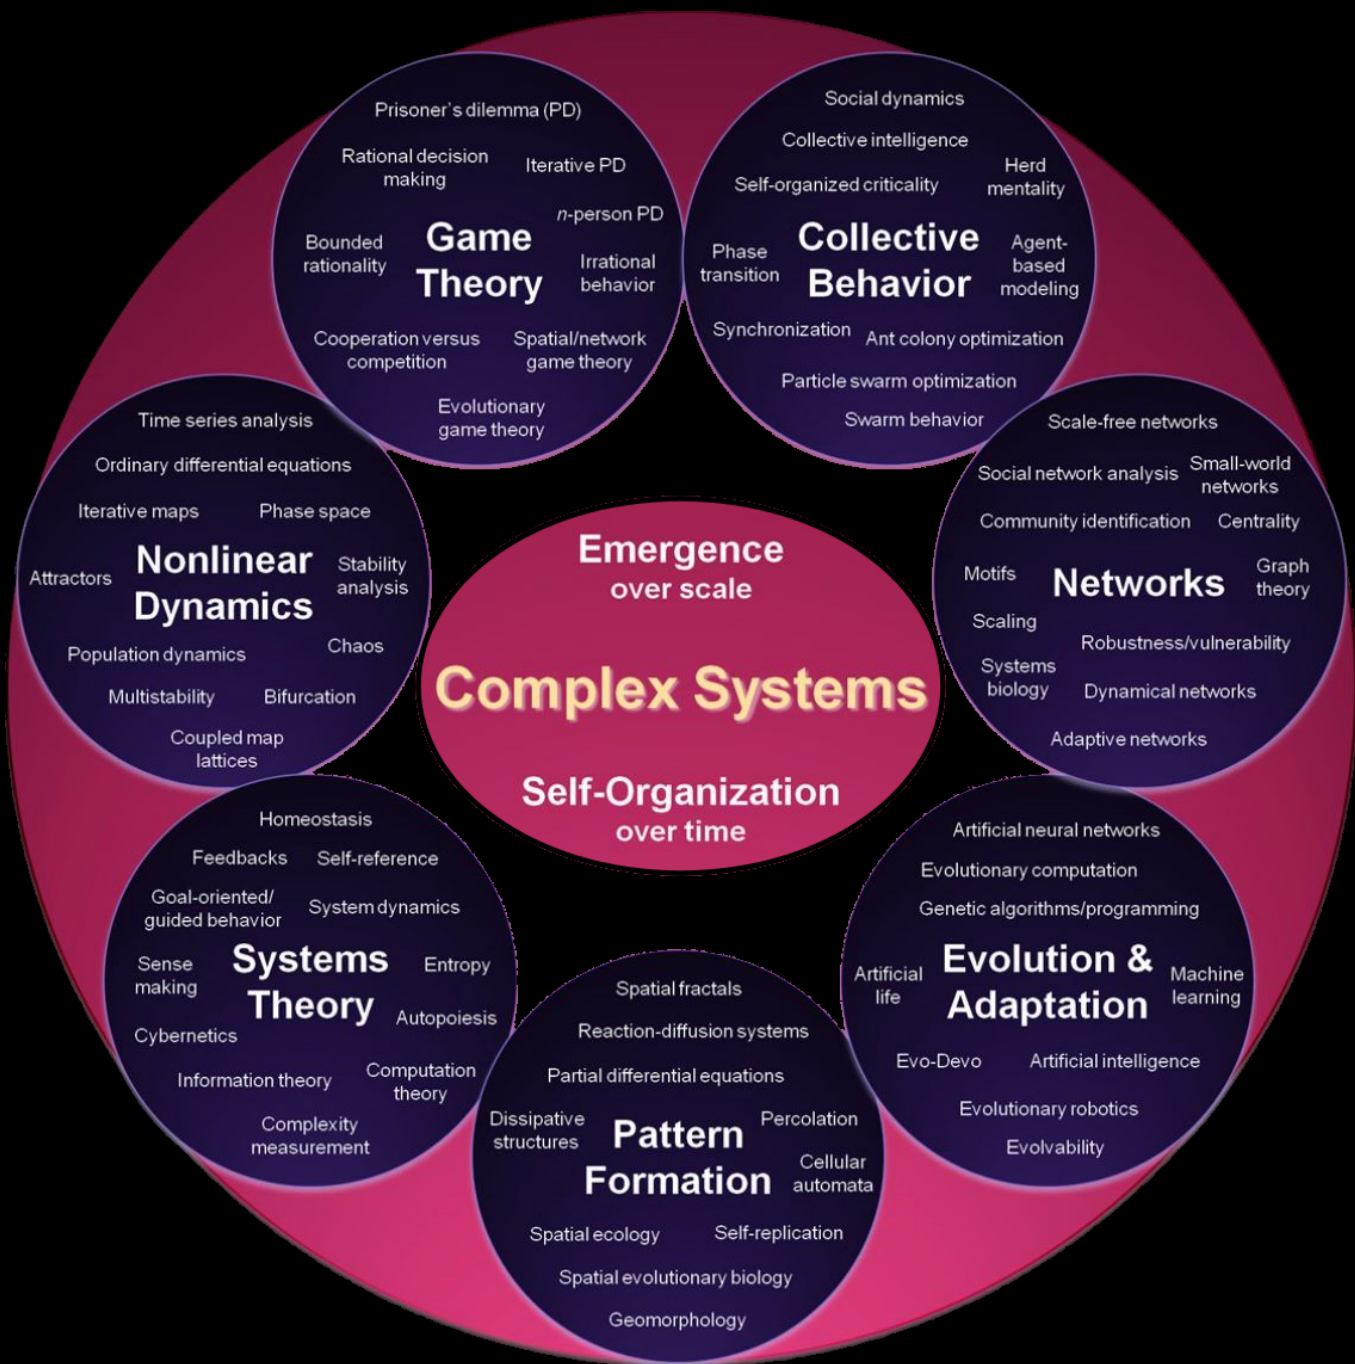

The ultimate prize is to crack the code of life and of the entire universe. This would allow the ruling class to control and create all of life, as gods, along with all of universe's processes, both in space and time.

Achieving this would help them conquer death and achieve immortality.

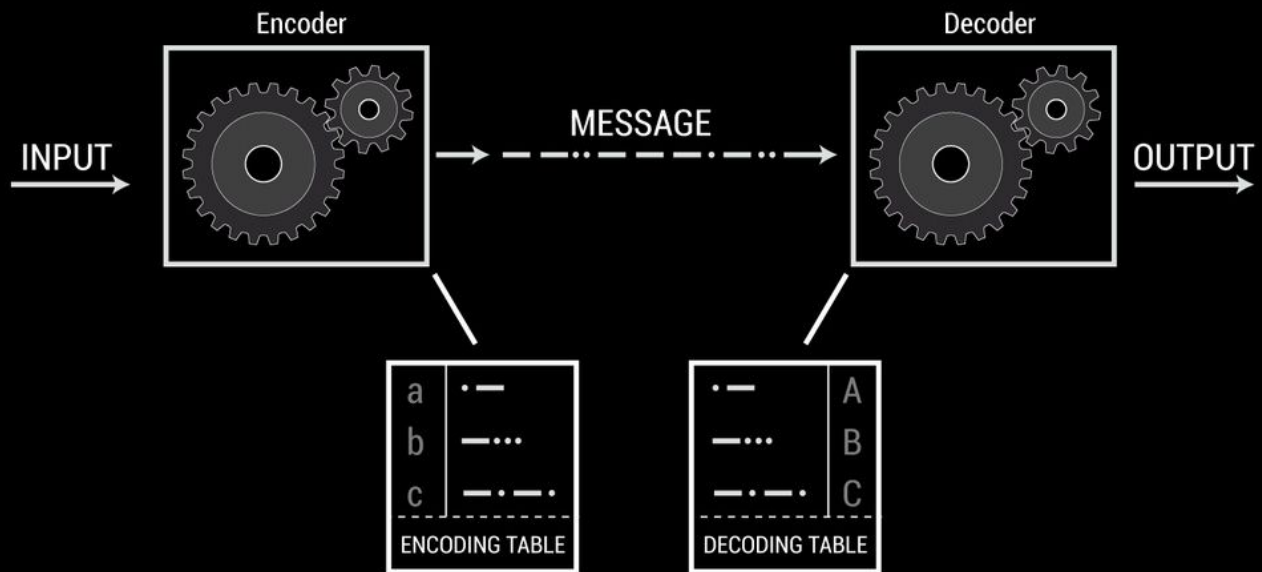

This would help fulfill the quest of becoming gods of a universal empire.

Make no mistake about this. Eternal life, eternal power is their greatest desire.

Expect the predatory NWO to seek full spectrum dominance of all domains including the physical and virtual universes – The Multiverse.

Evolution 2.0 = Artificial Intelligence + Origin of Life

THE GENESIS OF CONSCIOUSNESS

Find the Origin of Information and Consciousness
and Become a God

What is the Secret of Life? This is probably *the #1 Question in all of Science*

Origin of Life is the hardest question in science. No one knows how the first cell came about. Where did the *information* come from?

Every cell reproduces itself from digital instructions, stored in DNA. DNA has the same features as modern digital devices: Layers of digital encoding, decoding and data storage; error detection, error correction and repair. Plus an ability to adapt that beg the imagination.

How do living things repair and heal themselves, adapt to any situation you can imagine, and make choices? The genetic engineering capabilities of cells are not known to most people.

Cells re-engineer themselves, in real time, in hours... even minutes. How do cells "know" how to evolve? No human software does that. Give software millions of chances and billions of years and all it will do is crash. But life adapts relentlessly. How does it do this? What do cells know that we don't?

And what about consciousness? In the human realm, only conscious beings create and modify code. Where does consciousness come from? Are cells self aware?

How do you get from chemicals to code? How do you get a code without designing one?

How could the genetic code (or any coding system) come into being? This would represent a landmark discovery in the history of science and alter the fundamental understanding of the universe.

The challenge is to discover a purely chemical process that will generate, transmit and receive a simple code – a process by which chemicals self-organize into a code without benefit of a designer, without any intelligent being or other life-form creating, transmitting or receiving the code.

If the predator class of the NWO ever discovers this answer, they could very well alter all of humanity and the universe itself. This is the grave danger we are facing.

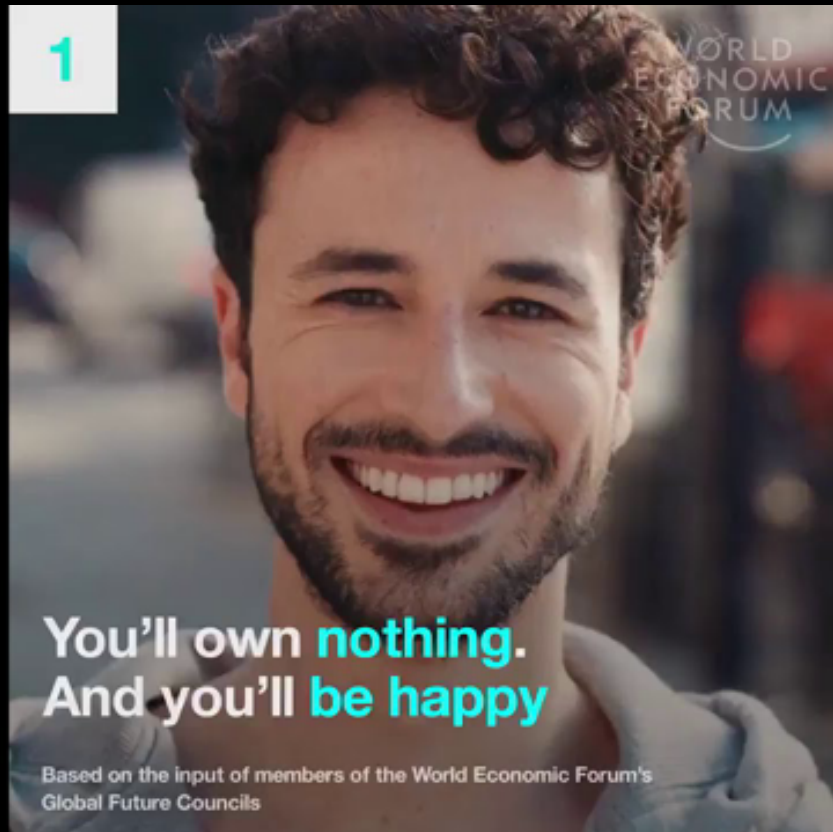

Eternal Masters Becoming GOD!

Their goal is to become Eternal Masters of the Universe and becoming GOD!

The ruling elite would love nothing more than to be masters of the universe. This is their ultimate goal. The desire to gain immortality and wield unlimited power. It may take them many generations to accomplish this, but this is the main objective.

Future Life Under The UN Empire

"You will own nothing and be happy!"

Welcome to the year 2030. Welcome to my city – or should I say, “our city.” I don’t own anything. I don’t own a car. I don’t own a house. I don’t own any appliances or any clothes.

It might seem odd to you, but it makes perfect sense for us in this city. Everything you considered a product, has now become a service. We have access to transportation, accommodation, food and all the things we need in our daily lives. One by one all these things became free, so it ended up not making sense for us to own much.

First communication became digitized and free to everyone. Then, when clean energy became free, things started to move quickly. Transportation dropped dramatically in price. It made no sense for us to own cars anymore, because we could call a driverless vehicle or a

flying car for longer journeys within minutes. We started transporting ourselves in a much more organized and coordinated way when public transport became easier, quicker and more convenient than the car. Now I can hardly believe that we accepted congestion and traffic jams, not to mention the air pollution from combustion engines. What were we thinking?

Sometimes I use my bike when I go to see some of my friends. I enjoy the exercise and the ride. It kind of gets the soul to come along on the journey. Funny how some things seem never seem to lose their excitement: walking, biking, cooking, drawing and growing plants. It makes perfect sense and reminds us of how our culture emerged out of a close relationship with nature.

In our city we don't pay any rent, because someone else is using our free space whenever we do not need it. My living room is used for business meetings when I am not there.

Once in a while, I will choose to cook for myself. It is easy – the necessary kitchen equipment is delivered at my door within minutes. Since transport became free, we stopped having all those things stuffed into our home. Why keep a pasta-maker and a crepe cooker crammed into our cupboards? We can just order them when we need them.

This also made the breakthrough of the circular economy easier. When products are turned into services, no one has an interest in things with a short life span. Everything is designed for durability, repairability and recyclability. The materials are flowing more quickly in our economy and can be transformed to new products pretty easily. Environmental

problems seem far away, since we only use clean energy and clean production methods. The air is clean, the water is clean and nobody would dare to touch the protected areas of nature because they constitute such value to our well-being. In the cities we have plenty of green space and plants and trees all over. I still do not understand why in the past we filled all free spots in the city with concrete.

Shopping? I can't really remember what that is. For most of us, it has been turned into choosing things to use. Sometimes I find this fun, and sometimes I just want the algorithm to do it for me. It knows my taste better than I do by now.

When AI and robots took over so much of our work, we suddenly had time to eat well, sleep well and spend time with other people. The concept of rush hour makes no sense anymore, since the work that we do can be done at any time. I don't really know if I would call it work anymore. It is more like thinking-time, creation-time and development-time.

For a while, everything was turned into entertainment and people did not want to bother themselves with difficult issues. It was only at the last minute that we found out how to use all these new technologies for better purposes than just killing time.

My biggest concern is all the people who do not live in our city. Those we lost on the way. Those who decided that it became too much, all this technology. Those who felt obsolete and useless when robots and AI took over big parts of our jobs. Those who got upset with the political system and turned against it. They live different kind of lives outside of the city. Some have formed little self-supplying

communities. Others just stayed in the empty and abandoned houses in small 19th century villages.

Once in a while I get annoyed about the fact that I have no real privacy. Nowhere I can go and not be registered. I know that, somewhere, everything I do, think and dream of is recorded. I just hope that nobody will use it against me.

All in all, it is a good life. Much better than the path we were on, where it became so clear that we could not continue with the same model of growth. We had all these terrible things happening: lifestyle diseases, climate change, the refugee crisis, environmental degradation, completely congested cities, water pollution, air pollution, social unrest and unemployment. We lost way too many people before we realized that we could do things differently. – Ida Auken – WEF

BioDigital Convergence

Physical–Biological–Digital Identities Converge ~ Lines on What it Means to Be Human are Blurred: Policy Horizons CANADA ~ Feb.11, 2020

“In the coming years, biodigital technologies could be woven into our lives in the way that digital technologies are now. Biological and digital systems are converging, and could change the way we work, live, and even evolve as a species. More than a technological change, this biodigital convergence may transform the way we understand ourselves and cause us to redefine what we consider human or natural.”

The document goes on to outline “Three ways biodigital convergence is emerging,” namely:

- Full physical integration of biological and digital entities;
- Coevolution of biological and digital technologies;
- Conceptual convergence of biological and digital systems,

I wake up to the sunlight and salty coastal air of the Adriatic sea. I don't live anywhere near the Mediterranean, but my AI, which is also my health advisor, has prescribed a specific air quality, scent, and solar intensity to manage my energy levels in the morning, and has programmed my bedroom to mimic this climate.

The fresh bed sheets grown in my building from regenerating fungi are better than I imagined; I feel rested and ready for the day. I need to check a few things before I get up. I send a brain message to open the app that controls my insulin levels and make sure my pancreas is optimally supported. I can't imagine having to inject myself with needles like my mother did when she was a child. Now it's a microbe transplant that auto adjusts and reports on my levels.

Everything looks all right, so I check my brain's digital interface to read the dream data that was recorded and processed in real time last night. My therapy app analyzes the emotional responses I expressed while I slept. It suggests I take time to be in nature this week to reflect on my recurring trapped-in-a-box dream and enhance helpful subconscious neural activity. My AI recommends a "forest day". I think "okay", and my AI and neural implant do the rest.

The summary of my bugbot surveillance footage shows that my apartment was safe from intruders (including other bugbots) last night, but it does notify me that my herd of little cyber-dragonflies are hungry. They've been working hard collecting data and monitoring the outside environment all night, but the number of mosquitoes and lyme-carrying ticks they normally hunt to replenish their energy was smaller than expected. With a thought, I order some nutrient support for them.

My feet hit the regenerative carpet and I grab a bathrobe, although I don't need it for warmth. My apartment is gradually warming up to a comfortable 22 degrees, as it cycles through a constantly shifting daily routine that keeps me in balance with the time of day and season. Building codes and home energy infrastructure are synchronized, and require all homes be autoregulated for efficiency. Because houses and buildings are biomimetic and incorporate living systems for climate control wherever possible, they are continuously filtering the air and capturing carbon. I check my carbon offset measure to see how much credit I will receive for my home's contribution to the government's climate change mitigation program.

As I head to the bathroom, I pause at the window to check the accelerated growth of the neighbouring building. Biological architecture

has reached new heights and the synthetic tree compounds are growing taller each day. To ensure that the building can withstand even the strongest winds – and to reduce swaying for residences on the top floors – a robotic 3D printer is clambering around the emerging structure and adding carbon-reinforced biopolymer, strengthening critical stress points identified by its AI-supported sensor array. I am glad they decided to tree the roof of this building with fire-resistant, genetically modified red cedar, since urban forest fires have become a concern.

While I'm brushing my teeth, Jamie, my personal AI, asks if I'd like a delivery drone to come pick up my daughter's baby tooth, which fell out two days ago. The epigenetic markers in children's teeth have to be analysed and catalogued on our family genetic blockchain in order to qualify for the open health rebate, so I need that done today.

I replace the smart sticker that monitors my blood chemistry, lymphatic system, and organ function in real time. It's hard to imagine the costs and suffering that people must have endured before personalized preventative medicine became common.

Also, I'll admit that it sounds gross, but it's a good thing the municipality samples our fecal matter from the sewage pipes. It's part of the platform to analyze data on nutritional diversity, gut bacteria, and antibiotic use, to aid with public health screening and fight antibiotic-resistant strains of bacterial infections.

Supposedly, the next download for my smart sink will allow me to choose a personalized biotic mix for my dechlorinated drinking water.

Today's microbiome breakdown is displayed on the front of my fridge as I enter the kitchen. It's tracking a steady shift as I approach middle age: today it suggests miso soup as part of my breakfast, because my biome needs more diversity as a result of recent stress and not eating well last night.

The buildings in my neighbourhood share a vertical farm, so I get carbon credits by eating miso made from soybeans produced on my roof and fermented by my fridge.

My fridge schedules the production of more miso and some kimchi in preparation for the coming week. It also adds immune-boosting ingredients to my grocery order because we're approaching flu season, and a strain that I'm likely to be susceptible to has been detected only a few blocks away.

I take my smart supplement, which just popped out of my bioprinter. The supplement adjusts the additional nutrients and microbes I need, and sends data about my body back to my bioprinter to adjust tomorrow's supplement. The feedback loop between me and my bioprinter also cloud-stores daily data for future preventive health metrics. The real-time monitoring of my triglycerides is important, given my genetic markers.

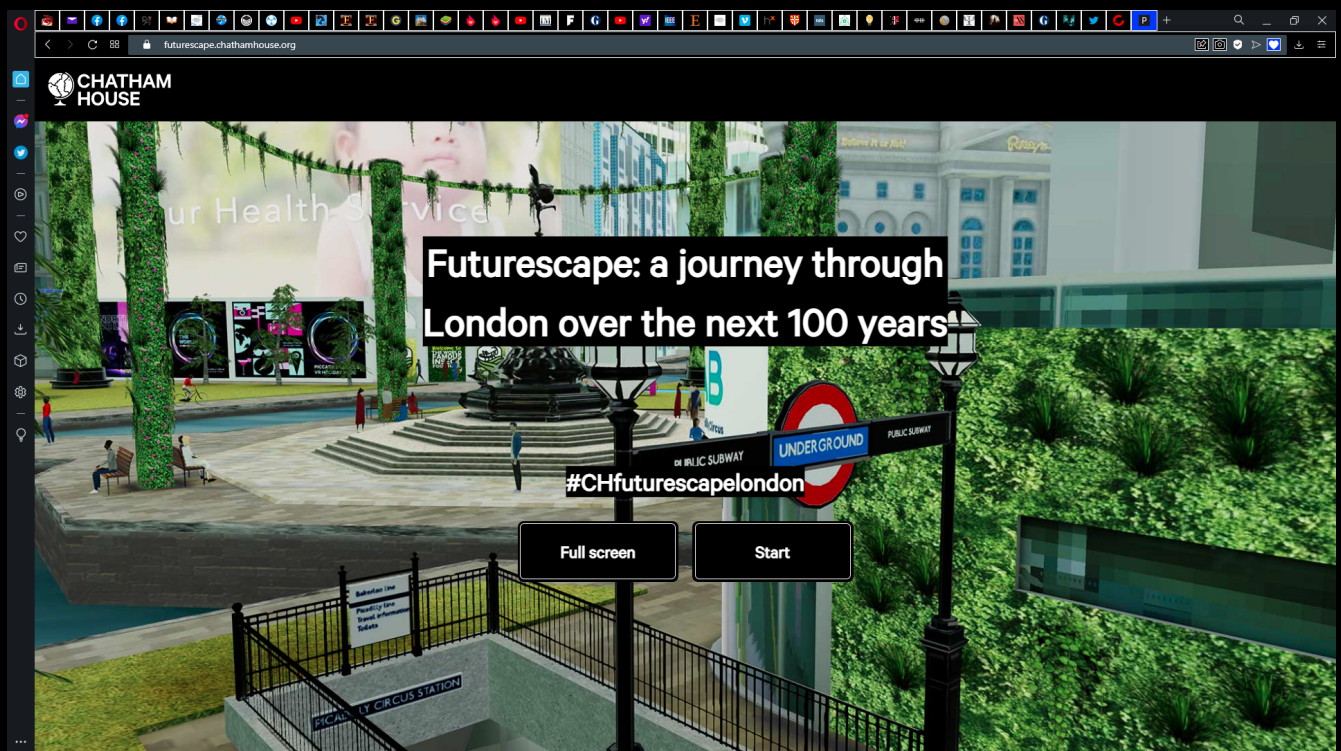

As my coffee pours, I check my daughter's latest school project, which has been growing on the counter for the past week. She's growing a liver for a local puppy in need as part of her empathy initiative at school. More stem cells are on the way to start a kidney too, because she wants to help more animals. I grab my coffee, brewed with a new

certified carbon-negative bean variety, and sit on the couch for a minute.

It appears the nutrient treatment I had painted on the surface of the couch and chairs has allowed them to rejuvenate. I'll have to try the treatment on my bioprinted running shoes, as they're starting to wear out.

Oh wow – is that the time? I have only 10 minutes before my first virtual meeting. I tighten the belt on my skeleto-muscular strength chair, lean back, and log into my workspace. First I get the debrief from colleagues finishing their work day on the other side of the world. I shiver momentarily as I think about how intimately we're all connected in this digital biosphere – then it passes. Let the day begin. – Policy Horizons Canada

Futurescape – 100 Years in London

2021-35

INTRO

Do you want to see how Piccadilly Circus has been transformed by 2035?

"Welcome to 2035. At the cutting-edge of our changing cities, Piccadilly Circus is a showcase of the new and developing approach to our urban environment – spaces made for people rather than cars and commerce." ~ Herb Gwells 25

DRONE TRANSPORTATION

Small autonomous vehicles and drones now share the space with pedestrians, bikes and scooters.

MEAT-FREE FOOD STALLS

Without roads dissecting it, the Circus is now a large public space with a colourful food market that is famous for its cutting-edge meat alternatives and experimental foods.

WHERE STORIES ARE ALIVE

Storytelling benches use augmented reality to create new human connections and celebrate local culture, oral histories and share interesting ideas about the future.

"The storytelling bench is a great place to immerse yourself in the ideas, songs and stories from people that live and visit this vibrant

community... my friend Ben won the lottery to have his story told and on the big screen." ~ Herb Gwells 25

PEDESTRIANIZATION AND MOBILITY

The area is now entirely closed to all road traffic. This has been the result of a continuous increase in restrictions on traffic flow around central London to limit CO2 emissions.

GREENER CITIES FOR WELLBEING

Now a greener city, Londoners are surrounded by more nature and open spaces, which improves their well-being, physical health and supports efforts to protect the planet.

WILDLIFE COLUMNS

The open public space now has more tree cover for shade, with dramatic vertical columns and living walls of grasses, shrubs, wildflowers and mosses on building facades that support local biodiversity and provide clean air.

THE EROS WATER FOUNTAIN

Eros has been reinstated as a drinking fountain so that people can refill their water bottles. This reduces plastic waste and offers a free alternative to less healthy drinks.

GOODEED'S CARE POUND STORE

Goodeed's department store only accepts Care Pounds a government certified cryptocurrency earned through social contributions and time spent on community projects.

"I earn Care Pounds from my work at a local nursing home and am here to spend them at Goodeed's. My favourite designer has released a

limited edition of trainers from recycled materials that can only be bought here.” ~ Herb Gwells 25

SHORTER WORKING WEEKS

A four-day working week is now the norm, providing Londoners with more leisure time and the Circus is a hub for fashion, culture, eating out and nightlife.

2035-60

INTRO

“Welcome to 2060. The world may have changed the tide on climate change, but we are still having to adapt to rising sea levels in London. My family moved into my Sky Barge home in 2050 and transport between Piccadilly and the seaside according to work patterns and the seasons. I thrive on the nature and culture around me, the fresh local food, and being part of this caring Piccadilly community” ~ Herb Gwells 50

THE SHAFTESBURY CANAL

Climate change has required the city to manage flooding through a new network of canals. The Shaftesbury Canal is now part of an important transport network, it supports micro-farming, and features floating entertainment venues.

WATERSIDE WELLBEING

London is now a city of canals and people come to Piccadilly Circus to relax by the calming water and feel closer to nature.

A SOLAR-POWERED PICCADILLY

The buildings, business, and transport networks that serve the Circus are now sustained solely on renewable energy.

SUSTAINABLE AND HEALTHY DIETS

Much more food is grown and produced locally, from the rooftops to the canal. We have embraced eating new forms of protein, including insects, which are considered a delicacy!

"I am working in the Piccadilly protein lab that supplies restaurants here and across the city. We specialize in taste innovation that caters to the insatiable appetite for new, tasty and sustainable diets." ~ Herb Gwells 50

THE FAMOUS PICCADILLY HOLOGRAM SHOWS

Piccadilly Circus offers a public space for new technology-enabled art forms including the famous hologram shows.

"Crowds flock here to see performers and their amazing holographic light shows. Piccadilly has been famous for them for years and is at the forefront of this exciting artform. Today we are celebrating international turtle day!" ~ Herb Gwells 50

EMBRACING A CIRCULAR ECONOMY

Consumerism has been transformed by the circular economy. What we desire most now are unique products we can hold on to and creatively upcycle, upgrade or exchange. Many spaces previously used for retail offer new experiences and entertainment.

LIVING IN SKY BARGES

The transformation of Piccadilly Circus into a vibrant community and

welcoming clean space where people of all walks of life can live, work, and spend some leisure time is well under way.

"I love living in the heart of the action in our Sky Barge home. It's affordable, carbon neutral and allows us to raise our growing family flexibly according to our changing needs." ~ Herb Gwells 50

2060-90

INTRO

"Welcome to 2090. I remember playing here as a toddler with my dad Herb. I'm now expecting my first child, who has been genetically engineered to give them the best start in life. Piccadilly is so vibrant, multicultural and creative. The Helio Rotator makes it a great spot to meditate in the sunshine and lunar bathe, and I always feel rejuvenated and at one with nature here." ~ Georgin Gwells 35

THE LOOP FARM

Hyper-local organic food is now produced at scale using aquaponic and aeroponic systems. Londoners can enjoy fresh, affordable, healthy food.

GENETIC ENGINEERING

Technology has transformed healthcare to make us more resilient to disease and viruses. From implants that monitor our health to genetically engineered new-born babies, we are living longer, healthier lives.

"I am having my unborn baby genetically modified to protect against inherited diseases that have affected my family for generations. The

thought of them never having to battle cancer like my mum did, fills me with such hope for our futures.” ~ Georgina Gwells 35

THE EARTHIST SANCTUARY

The Piccadilly Earthism Sanctuary is a pilgrimage site for followers of a new nature-based religion called Earthism.

THE HELIO ROTATOR

The Helio Rotator refracts sun and moonlight down onto Piccadilly Circus to provide stronger natural light, and provides welcoming shade in London’s hotter 2090 climate.

“I love the Helio Rotator that hovers above Piccadilly Circus. It creates a magical light, both day and night. In the harsh summer heatwaves it gives gentle shade that protects us and the wildlife against strong sunlight. Today is my birthday and we are having a family lunch up on the Helio Rotator’s viewing platform.” ~ Georgina Gwells 35

2090–2121

INTRO

“Welcome to 2121. We live on super-smart worlds where AI is embedded into every aspect of our lives. But rather than making our lives on earth, the moon, on Mars cold and mechanized, AI helps us express ourselves creatively within sustainable environments that nurture, respect and care for our every need.” ~ Herb Jnr 30

LIFE ON MARS

Fancy a Moon-break getaway? Want a new life on Mars? Reaching for the stars is now within everyone’s grasp.

"I am here today to find out more about living on Mars. I went to the Moon with Mum last year to get her Spa treatments in zero-gravity and it got me thinking about the opportunities out there in space. A new, exciting life could be waiting for me in the stars." ~ Herb Jnr 30

THE LONDON AI JACKET

The London AI jacket is the must have item of the decade. It changes its colour, shape and style, so is always on trend and can be used year-round.

"Check out these London AI jackets. Some people go for vintage styles, but others express themselves with more drama and flamboyance, changing their looks a dozen times a day to reflect their every mood. I'm saving up for one, as they are really expensive, but I'll never need a new one as all upgrades are included." ~ Herb Jnr 30

THE PICCADILLY POLYGON AI CENTRE

The Piccadilly Polygon is a cultural and entertainment venue that really knows what its audience wants. The AI-driven building shapeshifts to accommodate different audience sizes and a wide variety of shows and events.

Life in New World Order

"You will own nothing and be happy!" – WEF

A child born today will grow up in a different world than ours. Little Jane will think that bare human faces are obscene, that people are contagious and should have their own private rooms of air in which to breathe whilst scientifically proven, evidence based monitors read CO2 levels and smart ventilation systems regulate oxygen and trap pathogens.

Jane's genetic code and her parents' history will be blockchained the minute she is born. A tiny prick will produce a bead of blood to be digitally transcribed and health-screened for all the possibilities interventions with which the algorithms have been programmed. Perhaps Jane will be medicated with micro dosed blood thinners to mitigate a potential for clots her mother demonstrated in 2021. What is certain is that Jane was born in a brave new world of personalized

genetic medicine. The next pricks she receives will replace her crude immune system, one sequence of DNA after another, lest she be labelled Human 1.0 – only a step away from Neanderthals.

Biocompatible nanotech will be included in the shots she receives; components so that she is fit for purpose in the Internet of Bodies & Things. As the years pass, the upgrades will be non invasive as they will be conducted remotely.

Before Jane is able to interact in the metaverse she will be given smart toys to keep her company. Tailored for her specific needs, AI robotic toys will teach her to behave and think properly, and in tandem with Jane's internal hardware, will temper her moods. Any issues with learning disabilities will be addressed with technoceuticals: prescription apps ordered by her algorithmic physician.

When Jane is old enough, her digital twin will meet other avatars. Together they will teleport to lessons, concerts and excursions without ever having to risk contaminating one another.

Via their algorithmically determined pathways, both the children's successes and failures will generate wealth for the impact investors who pay for these routes to health and education. The harvested data from Human Capital will churn the wheels of the circular economy and simultaneously credential young people with digital tokens (programmable money) to be traded for existence.

Jane will never taste meat raised on a farm or spinach cultivated outside of a laboratory. Her tastebuds and metabolism will be finely tuned via microbiome engineering and she will require little food to maintain her function. She will be proud of her small carbon footprint

and will hope her stature remains petite in order for her carbon rations to remain ample.

Jane will virtually travel to places her parents couldn't afford to visit in Before Times and she will feel sorry for them because not only didn't they experience these magical places, for some reason they don't even want to. Sometimes she wrestles her emotions about them for being so selfish and contributing to the destruction of the climate and environment, but there are times she sees such deep sorrow on their faces that she decides they've been punished enough. There appear to be secrets between them that she isn't privy to; they seem to speak with their eyes and Jane wishes they would have their updates and boosters so they would be happy.

She prays to Gaia each evening for the salvation of their souls and pleads to all the Gods of her blended religious church group that CO2 will disappear and the lush green forests will (paradoxically) reappear, out of thin air...

Jane has opted not to bear children even though her credit rating is high enough to order two of the cutting edge 3.0 variety. Instead, she is committed to her architectural coding career and is on the verge of creating a space in the metaverse where people with exceptionally high reputation capital can meet in secret and have something called 'privacy' like in Before Times. Her managers have offered time share in the vault of privacy, when it's accomplished, and she wonders what it will feel like to allow her mind to roam free. She's not sure that she has anything to hide but she looks forward to having a moment not recorded on her digital ledger.

Even though it sounds outlandish for her corporation, built on equity and inclusivity, to enterprise exclusivity for an elite group, the fact remains that Surveillance Capitalism must continue to invent new incentives that motivate people to do better, since punishment for uncommunitarian behaviour has limits – as she has observed with her parents.

If Jane could sum up her internal driving force it would be for the eternal life she's been promised should she fulfill the trajectory predicted by her computer model based on her compliance thus far.

A complete data set of her entire existence combined with General A.I that will mimic her consciousness and subconscious in multiple clouds and data servers will afford her an afterlife in meta, forever.

She may never physically wander in the forest but she will virtually exist to see the earth replenished – as she was promised. – Cindy Niles

Upside-Down Universe

The world is up-side down and people have contorted their minds to make it appear upright. I'm afraid they've adjusted to the New Normal: They don't mind being ordered about; they accept their germ line being modified; they don't care for personal agency, privacy, integrity or liberty. They feel safe being monitored, surveilled, tracked, traced, watched, locked down, isolated, force medicated, suffocated, physically injured, mentally and emotionally abused, robbed, pillaged, separated, divided, estranged, impoverished, starved, and – finally –remotely controlled and harvested. – Cindy Niles

The Metaverse – No Substitute For The Real World

The dark forces want to disconnect us from our true divine connection with nature. This is why they are building artificial worlds (the

metaverse), which attempt to replicate the natural world. They are going to attempt to make these virtual worlds as life-like and convincing as they possibly can. They will add increasing sensory inputs, to trick the body and the mind into thinking that this virtual reality is indistinguishable from the real thing.

As the Facebook frontman himself said in his keynote presentation unveiling the metaverse (which I recommend everyone watch to see what world they have planned):

“In the next five or 10 years, a lot of this is going to be mainstream and a lot of us will be creating and inhabiting worlds that are just as detailed and convincing as this one on a daily basis.”

As we have seen, with films like Avatar, we can be transported into a digital landscape that offers a much desirable escape from the harshness of reality. Those with an active imagination, a bitterness towards reality or simply a yearning for a more magical life, will invariably succumb to the enticement that these digital realms of fantasy have to offer.

These virtual worlds will seemingly offer more than the real world. This is only because our real world has been corrupted and pillaged, not least by the same people trying to usher us into their digital replica. Our planet is no longer the paradise it once was. Earth’s original divine template is so infinitely vast and beautiful, that there would never be a need or desire to look elsewhere for a ‘better life’. This is why the dark forces are trying to turn our planet into a dystopia. They want people literally begging for an escape, which will then be offered through digital means.

This simulacra of reality will be so vivid, colourful and visually alluring, that those who have succumbed to this perception deception, will have less of a desire to explore the real world, feeling that it does not live up to the appeal of its digital replica. In the metaverse keynote presentation video, we can see how they are attempting to create a 'virtual paradise' (crystal blue waters, exotic marine life, paradise islands etc).

Whilst this metaverse goes from strength to strength, the dark forces will simultaneously continue to destroy the natural world, as much as they possibly can. One only needs to look at the alarming extinction of species and destruction of our rainforests, to see this agenda in motion. They want to replace nature with a concrete jungle and usher the global population into dystopian Smart cities, shrouded in a dense low-vibrational electromagnetic grid and hooked into a virtual world. These harmful frequencies are destructive to our natural human biology and nature itself.

The matrix overlords have no care for the natural world, they simply want to dominate it. They want us so immersed and distracted by the virtual world, so they can then more easily buy up and take control of the natural resources. This gives them the real wealth and power. This is what they mean by; 'you will own nothing and be happy'. People will be so consumed by their desire for virtual goods (hence the propagation and increasing popularity of NFTs) that they will barely notice, nor care that the tangible real world resources are being stolen from under their nose.

Those who fall for the bait and opt for a life immersed in an artificial world, will have no idea just what freedoms they have sacrificed for the

sake of mere entertainment and mindless pleasure.

The virtual world will be nothing like the real world. It will come with conditions. Those who own the metaverse ultimately have control over those who choose to inhabit it. They will dictate what people can and cannot do, where they can and cannot go, what they can or cannot buy or sell and who they can or cannot commune with. Digital identities will be created, which will be tied to social credit scores. Compliance will be rewarded and disobedience punished.

The extent to which this artificial world grows, is contingent upon us. The metaverse requires we the people to build it (as repeatedly outlined in the metaverse keynote presentation). This is why we must stop feeding the beast.

I strongly encourage disconnecting more frequently from the online world and spending more time immersed in the natural world. Nature is free. It does not discriminate. It does not come with conditions.

It is important we reestablish our innate connection to the natural world, from which we were birthed. Become intimate with nature. Get in touch with all your senses. Breathe fresh, unpolluted air. Commune with the animals. Absorb yourself in the natural elements. Spend time alone in the wilderness. Here you will find a beauty, authenticity, safety and freedom that no virtual substitute can replicate.

No matter how life-like the virtual world may appear, it will never replace the depth of sensory feeling that comes from an authentic connection with the real world. As much as they want to, it is impossible for these parasitic forces to replicate creation, especially

since they lack creativity and can only piggyback off the creative abilities of those with the divine-spark endowed upon us.

Creation, in its infinite expressions, is so complex and vast that no amount of intellect or technology can come close to emulating it. The beauty of our natural world is an expression of a divine benevolence, which is the antithesis of those seeking to dominate and control others through their deceptive technology.

Instead of trying to escape to a virtual world, how about we put our focus in trying to restore balance and harmony to the one we currently inhabit.

The choices we make now will echo through eternity.

I know which reality I choose. ~ Alexander Rice

How to Stop The New World Order

The NWO has slowly been growing stronger and stronger throughout history. Much of our everyday lives are orchestrated and under the control of the ruling class. But with all this control they have there is still hope and there are still solutions. After all, the NWO only has power for as long as the people remain asleep. The NWO can only exist so long as there is an ignorant, needy people to supply them with power. As soon as the people awaken to their true self-power, wisdom and purpose, the NWO will be no more and freedom will be gained around the world.

Someone asked me about my thoughts of the human condition with regard to transhumanism, virtual people and AI. And, why so many different agendas unrelated. My response (my opinion) was as such:

On the one hand you have very rich people, stakeholders investors if you will, that see an opportunity to make a vast amount of money (wealth) by investing in next generation technology. They don't really care about the ramifications of the common person, since they are not part of that pool. All they see is financial wealth and potential power in new emerging markets. If it means people are going to be hurt, then so be it. Their mindset is that there is going to be collateral damage and that it's nothing personal, but just business. Big pharma falls in this camp.

Then in another camp, you have ideologues that envision a new system that best suits their fancy. A technocratic system of governance where they see the need to manage and control people and assets on this planet via algorithms and smart automation. Whether they actually believe in climate change or not is debatable. What they do see is that financial growth has slowed down or stopped. However, they still want to maintain their power and wealthy by creating a new economic system that creates new markets and keeps track of all inventory on this planet, including the human workforce. They are wanting to cut cost in labor and thus automate as much as they can and bring in strict surveillance with AI, blockchain, ID system, cashless society, etc. They want to create human capital investment opportunities via the tokenization of humans and assets on blockchain systems. Resource management of people and things, and while creating new future markets with strict global protocols – thus Technocracy.

Then we have another camp, the military and intelligence camp that feels we need to compete with China for AI, quantum computing and blockchain supremacy. That it is a matter of national security. That whomever wins this battle will become the ruler of the world. So the race

is on with (primarily) China, to become the digital superpower. For that to happen, data, and I mean lots and lots of data, in real-time, has to be accumulated from every human (and object) so that AI can do the predictive analysis needed to advance itself to the front of the global race.

And finally, you then have another camp, a very wealthy but scientific group, that I think are the MOST DANGEROUS of them all. The transhumanist. They say they are concerned about the future of humanity, namely, our duration as a species. Their belief is that we will all one day become extinct if we do not act now to intervene and take charge of our evolutionary trajectory. Their belief is that they have a duty and a right to modify themselves, in a post-human way, namely transhumanism. Whether it's by DNA speciation or merging with machines as cyborgs, or uploading the mind into cloud systems, or a combination of them all, it is their choice. They believe that if we are to continue to survive, we (or they) have to become like gods and redirect human evolution and with it, the definition of what it means to be human. These people are WILLING, publicly, to splinter, destroy and replace the biological human in order to "save" the human species. So, this is what we are facing. We have all these frenzied frothing camps (and there are others more) that are all working TOGETHER to achieve a common goal, and that is the DIGITALIZATION of all of planet earth. So basically, we're all caught in the cross fires of a digital penis war. I don't know how best to put it. They are all psychotically demented. All intoxicated with power, greed and control. All filled with ego. All claiming to have the best "solution".

So will the human condition disappear? Only if we allow it. Tomorrow is not written. It yet is to exist. If you want to know the future, you have to make it yourself, otherwise someone will make it for you. So long as we say “no” and there is enough of us (and there are), then the human condition will continue. But, we’re gonna have to fight for it. I can assure that you will continue to have demented people in charge and have transhumanist that will alter the human species regardless of what anyone wants. It’s our job to not give in. It’s our duty to continue the expression of the human species. The biological human. With all it’s faults and quirks. We are not machines with perfect 1’s and 0’s. We are a mess and that is our beauty. That is what defines our “human condition”.

Spiritual Battle

Regardless of your spiritual beliefs, we need to step back and understand that this is part of our spiritual journey and that the ruling class only has power over us if we allow them to. We are all on our own individual journeys and no matter what happens in this physical life, we can always learn from it and grow from it. This whole life is full of decisions and sometimes it is not about winning, but about making the correct decisions. There are many lessons to be learned through this and there is much opportunity for growth.

Change Yourself

We may not be able to control others, but we can control ourselves. It’s not about forcing our will on others, like the ruling class does to us, but rather changing ourselves and inviting others to our ways by example. If you really want to wake people up change yourself first and show them

a better way through your personal life. It's not about living in fear and developing hate towards the ruling class. There is already enough fear and hate in the world. If the need necessitates itself to defend yourself, then by all means do so. Living is your right.

We need to reach deep within ourselves and find that peace that is lurking within and develop outward from there. We need to take personal responsibility for our situation and we need to take control of our own lives. We need to become more independent and help each other. That is what this is all about. The NWO can only exist so long as we give our power to them by believing in the illusion they have created before us. As soon as we stop believing in the game they have created, we can go on living independent without their constraints and we can create life under our own vision and ideals.

Face Reality

We need to recognize that there is indeed a NWO set to take away our freedom and render our energy to them. There really are people who want to put their interests above ours. These people would much rather keep us enslaved than work on freeing us. They would much rather keep people in a state of fear, ignorance and confusion so that they can continue their control. We may not think like this, but they do. We need to recognize this and stand up to it. We can't escape the ruling class by doing what we've always done. What we've always done has allowed them to grow. To stop them we need to recognize it, we need to face this reality and we need to work creatively together to find a way out of this situation. Using force should be the very last resort. That is the trap

they would love to see us drive into. Don't do it. They have much bigger weapons.

Minimize Government

The main tool used by the NWO ruling class is government. Government is the only tool they have where they are able to force us to do things. This is a very important point to realize. Through government the NWO is able to physically force us to do things. If we don't pay taxes they will force us into prison. If we don't go to war they will force us to go to war. The NWO exercises power through the government, therefore, if we limit the power of government to do anything then we limit the power of the ruling class to do anything. The ruling class is a virus working through government and we need to quarantine the virus by quarantining the government.

Take Action

Solutions often times require action. There is a time and a place for sitting around and discussing ideas. That is what most people do. But there is also a time for taking action. And very few people take action. Action requires work which is not always easy. We've all heard the saying that freedom isn't free. Like exercise and freedom requires consistent work and effort. We can't be free without taking any action. So if we really want to stop the NWO ruling class then we need to take action and put our words into tangible solutions. The NWO is all about taking action which is why they are able to continue to expand. Most people are not about taking action which is why they continue to have less and less freedom. We need to take constructive action.

Spread The Message

More people are aware of the NWO than you might think. They may not call it the NWO and they may have a different take on it, but almost everyone around knows that something is going on. Most people have a feeling that things are getting worse, but they sometimes have trouble quantifying exactly what it is. This is where talking with others and spreading the message has value. Talk with other people and share what you have discovered with them. Remember, everybody learns differently and everybody is at different levels of understanding. Frame the context of your message in a way that fits within the other person's current level of understanding. You don't want to force calculus on somebody that just learned how to add and subtract. And most importantly, listen to what other people have to say, show them respect, and be prepared to change your views. Nobody has 100% of anything figured out and everyone has a unique perspective and piece of the puzzle to offer. And remember, to always keep situational awareness of your surroundings.

The controllers are completely out the shadows now, deploying all ammunition in broad daylight to try and solidify their globalization singularity through the 'Great Reset'. They no longer believe that covert warfare is necessary because the global population have demonstrated how dependent they are on external authority to govern their lives.

The evidence is everywhere for those with the eyes to see. Geo-engineering is disrupting the ecosystem leading to increased flooding and storms, justifying the climate crisis. This is leading to power outages and damage to crop yields that amplify supply chain

disruption, as is typical of totalitarian regimes trying to control a population through fear. They will exploit and trigger the survival instinct, so that people desperately seek solutions from the perpetrators.

The implications of this are far reaching, including destroying farmers livelihoods to buy up the land, eradicating organic food and meat to be replaced by synthetic GMOs, and continuing to bankrupt independent livelihoods to hijack the entire food supply chain so that we are completely dependent on the state. This is another reason why they keep imposing lockdowns and mandates. They know most small businesses cannot survive the storm, and until they have complete monopoly over every establishment, their work is not done.

Every detail of this operation has been meticulously planned and goes way further back than we realize. Controlling civilizations is nothing new and the methods and technologies used have been provided from off planetary sources.

This includes the genetic engineering program using bioweapons that evade our current intellectual comprehension and have baffled top scientists and doctors who are playing catch up. Nanotechnology, mRNA technology and graphene are working invisibly to rewrite the human genome and communicate with AI signals to destroy the bio-resonance that keeps us in a state of homeostasis and in alignment with our humanity.

The same applies to the assortment of electromagnetic bombardments, including distorted frequencies that are warping the energy body, making us prone to subliminal hacking. Subliminal

programming, through media channels and popular culture, are inserting predictive programs into the personal and collective unconscious so that we manifest our own demise.

Unconscious manipulation is most effective by exploiting unresolved trauma to keep us operating through the negative ego. This is most prevalent through manipulation of sexual energy, and so we see a society fall deeper into depravity and distraction, stuck in addiction cycles seeking external validation as a compensation mechanism.

The progression of social media to more bitesize, virtual content stimulates quick dopamine releases that keep us hooked for immediate gratification, and so we are being herded into a metaverse stemming from our own disconnection.

It is going to take time to unravel the sophisticated layers of control being subjected upon humanity, but we can be hopeful that benevolent solutions will emerge as the true soul embodied ascension timeline simultaneously progresses.

Those of us who are able to commune with source intelligence can receive assistance through our higher selves and from benevolent forces working to assist us during this time. This may lead to the release of new technologies, free energy and healing modalities that have been kept suppressed or inverted for enslavement purposes.

We cannot afford to sit on the fence, however. These times call for a commitment to seeking and working in service of truth, no matter how uncomfortable. This intention, coupled with intuitive action, will naturally open the gateway to higher guidance and an expanded

perception of the nature of reality beyond the conditioned frequency limitation we have been operating in.

We are tasked now with a choice about who to serve. Do we want to be slaves or do we want to be free? Whether we currently believe freedom is possible or not is irrelevant, because it is worth fighting for, no matter what the cost.

The alternative is worse and so if we are experiencing states of helplessness in the face of adversity, now is the time to check in with ourselves and fine tune our internal state to help dissipate the fear.

We can only activate more empowering states through transmutation, and so we must become acquainted with our fear. It is serving to teach us where we still live in limitation and what aspects of ourselves are keeping us preoccupied in states of trauma and addiction, which keep us bonded to the external domain. The only way out is through.

As we clear the faulty programs of mental conditioning and receive clearer external confirmation of our internal state, the belief in our capacity to navigate the turmoil, through aligning with our souls optimum timeline, starts to strengthen. If we can take anything from this, it is that we are being reminded that we are solution we are waiting for. There will be no external saviour. Emancipation will come to each of us individually when we reconnect to our own divinity and there is no shortcut. – Sami Richard

UNITED NATIONS NEW WORLD ORDER Quick Guide for Dummies

United Nations New World Order Project

White Rabbit – The Matrix Resurrected

[Verse 1]

One pill makes you larger
And one pill makes you small
And the ones that mother gives you
Don't do anything at all

Go ask Alice
When she's ten feet tall

[Verse 2]

And if you go chasing rabbits
And you know you're going to fall
Tell 'em a hookah smoking caterpillar
Has given you the call
Call Alice
When she was just small

[Verse 3]

When the men on the chessboard
Get up and tell you where to go
And you've just had some kind of mushroom
And your mind is moving low
Go ask Alice
I think she'll know

[Verse 4]

When logic and proportion
Have fallen sloppy dead
And the White Knight is talking backwards
And the Red Queen's off with her head
Remember what the Dormouse said
Feed your head
Feed your head

Thanks to all of my friends for the invaluable and resourceful information that made this project possible. I would never have been able to compile this work. You are all valiant, caring and courageous.

Special thanks to:
